## Statistical Summary

### Benefit Recipients

The largest percentage of the Systems' benefit recipients are service retirees. Service retirement benefits are payable to members who have met age and service requirements. The number of PSRS service retirees increased by 1,626 from 34,631 at June 30, 2006 to 36,257 at June 30, 2007. The number of PEERS service retirees increased by 687 from 15,332 at June 30, 2006 to 16,009 at June 30, 2007.

Disability benefits in PSRS and PEERS are paid to members who are unable to earn a livelihood due to permanent disability and who have met certain eligibility requirements. The number of PSRS disability retirees increased by 12 from 671 at June 30, 2006 to 683 at June 30, 2007. The number of PEERS disability retirees increased by 11 from 478 at June 30, 2006 to 489 at June 30, 2007.

In both PSRS and PEERS, beneficiary payments are available to survivors if the retiree elected this option. Three Joint-and-Survivor options and two Term-Certain options are available. In PSRS, survivor benefits are also available to designated beneficiaries of members who die before retirement.

The chart on page 102 details the number of benefit recipients by type and monthly benefit amount for each System.

### Pension Funding

An unfunded actuarial accrued liability (UAAL) for pension benefits generally represents the difference between the present value of all benefits estimated to be payable to plan members as a result of their age, salary, and service through the valuation date and the actuarial value of plan assets available to pay those benefits. This amount changes over time as a result of changes in accrued benefits, pay levels, rates of return on investments, changes in actuarial assumptions, and changes in the demographics of the employee base. Each year an outside actuary performs a valuation to determine the present value of the benefits payable (actuarial accrued liability) and compares this to the assets available to arrive at the funded status of the Systems.

The charts on page 110 show a comparison of the assets and liabilities of the Systems over time. At June 30, 2007, PSRS was 83.5% funded and PEERS was 83.2%. These percentages have remained relatively constant for the past four fiscal years.

### Changes in Net Assets

The charts on page 103 detail a 10-year history of the additions (revenue) and deductions (expenses) of the Systems.

Other charts in this section detail demographic information concerning our members and employers.

The data in this section was derived from internal sources and the annual actuarial valuation reports.
