

PEERS (then called the Non-Teacher Retirement System of Missouri or NTRS) was created in 1965 to provide Missouri's non-certificated public school employees and their families with a significant and stable source of retirement income.

Anyone who has spent any time at their child's school quickly realizes it takes many hands to keep such a complex operation running smoothly. PEERS members play important roles in our schools, and in the lives of the students who attend them.

After a career dedicated to being there for others, we are proud to say to our retired PEERS members, "We are here for you." Enjoy the retirement security you have earned while serving others.

## STATISTICAL SUMMARY

### Benefit Recipients

The largest percentage of the Systems' benefit recipients are service retirees. Service retirement benefits are payable to members who have met age and service requirements. The number of PSRS service retirees on the payment rolls increased by 1,752 from 45,842 at June 30, 2012 to 47,594 at June 30, 2013. The number of PEERS service retirees on the payment rolls increased by 980 from 20,454 at June 30, 2012 to 21,434 at June 30, 2013. An additional 52 PSRS service retirees and 85 PEERS service retirees had their benefits on hold at June 30, 2013.

Disability benefits in PSRS and PEERS are paid to members who are unable to earn a livelihood due to permanent disability and who have met certain eligibility requirements. The number of PSRS disability retirees on the payment rolls increased by 41 from 801 at June 30, 2012 to 842 at June 30, 2013. An additional one disability retiree had his benefit on hold. The number of PEERS disability retirees on the payment rolls increased by 40 from 665 at June 30, 2012 to 705 at June 30, 2013. An additional four disability retirees had their benefit on hold.

In both PSRS and PEERS, beneficiary payments are available to survivors if the retiree elected this option. Three Joint-and-Survivor benefit plans and two Term-Certain benefit plans are available. In PSRS, survivor benefits are also available to designated beneficiaries of members who die before retirement.

The charts on page 108 detail the number of benefit recipients by type and monthly benefit amount for each System.

### Pension Funding

An unfunded actuarial accrued liability (UAAL) for pension benefits generally represents the difference between the present value of all benefits estimated to be payable to plan members as a result of their age, salary and service through the valuation date and the actuarial value of plan assets available to pay those benefits. This amount changes over time as a result of changes in accrued benefits, pay levels, rates of return on investments, changes in actuarial assumptions, and changes in the demographics of the employee base. Each year an outside actuary performs a valuation to determine the present value of the benefits payable (actuarial accrued liability) and compares this to the assets available to arrive at the funded status of the Systems.

The charts on page 116 show a comparison of the assets and liabilities of the Systems over time. At June 30, 2013, PSRS was 80.1% pre-funded and PEERS was 81.6% pre-funded. These percentages have decreased from the June 30, 2012 pre-funded percentages of 81.5% for PSRS and 82.5% for PEERS.

### Changes in Net Assets

The charts on page 109 detail a 10-year history of the additions (revenue) and deductions (expenses) of the Systems.

Other charts in this section detail demographic information concerning our members and employers.

The data in this section was derived from internal sources and the annual actuarial valuation reports.
