Statistical Summary

Benefit Recipients

The largest percentage of the Systems' benefit recipients are service retirees. Service retirement benefits are payable to members who have met age and service requirements. The number of PSRS service retirees on the payment rolls increased by 2,058 from 47,594 at June 30, 2013 to 49,652 at June 30, 2014. The number of PEERS service retirees on the payment rolls increased by 1,239 from 21,434 at June 30, 2013 to 22,673 at June 30, 2014. An additional 106 PSRS service retirees and 92 PEERS service retirees had their benefits on hold at June 30, 2014.

Disability benefits in PSRS and PEERS are paid to members who are unable to earn a livelihood due to permanent disability and who have met certain eligibility requirements. The number of PSRS disability retirees on the payment rolls increased by 14 from 842 at June 30, 2013 to 856 at June 30, 2014. The number of PEERS disability retirees on the payment rolls increased by 27 from 705 at June 30, 2013 to 732 at June 30, 2014.

In both PSRS and PEERS, beneficiary payments are available to survivors if the retiree elected this option. Three Joint-and-Survivor benefit plans and two Term-Certain benefit plans are available. In PSRS, survivor benefits are also available to designated beneficiaries of members who die before retirement.

The charts on page 108 detail the number of benefit recipients by type and monthly benefit amount for each System.

Pension Funding

An unfunded actuarial accrued liability (UAAL) for pension benefits generally represents the difference between the present value of all benefits estimated to be payable to plan members as a result of their age, salary and service through the valuation date and the actuarial value of plan assets available to pay those benefits. This amount changes over time as a result of changes in accrued benefits, pay levels, rates of return on investments, changes in actuarial assumptions, and changes in the demographics of the employee base. Each year an outside actuary performs a valuation to determine the present value of the benefits payable (actuarial accrued liability) and compares this to the assets available to arrive at the funded status of the Systems.

The charts on page 116 show a comparison of the assets and liabilities of the Systems over time. As of June 30, 2014, PSRS was 82.8% pre-funded, while PEERS was 85.1% pre-funded. Both Systems showed a significant increase in funding from the June 30, 2013 funded percentages of 80.1% for PSRS and 81.6% for PEERS.

Changes in Fiduciary Net Position

The charts on page 109 detail a 10-year history of the additions (revenue) and deductions (expenses) of the Systems.

Other charts in this section detail demographic information concerning our members and employers.

The data in this section was derived from internal sources and the annual actuarial valuation reports.

PSRS Summary of Benefit Recipients By Type As of June 30, 2014

Amount of Monthly Benefit	Service Retirement	Disability Retirement	Beneficiary Recipients				Total
