Mission Statement, Goals, Focus Areas

MISSION STATEMENT

To provide financial security and peace of mind for Missouri's public education community.

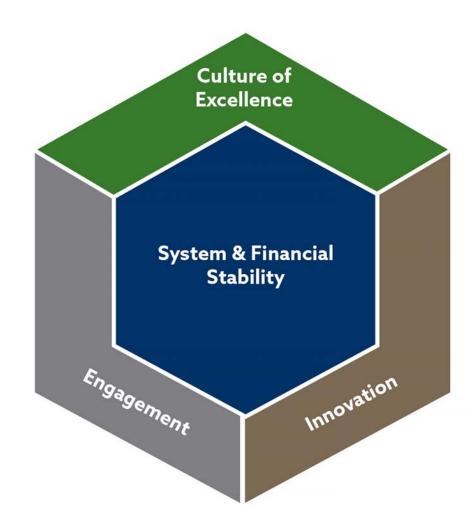

GOALS

To provide retirement security to Missouri's educators and education employees after a full career of service.

To help school districts attract and retain the best and brightest educators and employees for Missouri's school children.

To manage the Systems in a prudent and cost-efficient manner while continuing to provide exceptional service to our members.

FOCUS AREAS

Economic Impact

The benefits distributed by PSRS/PEERS make a sizable contribution to Missouri's economy and help Missouri public schools attract and retain quality teachers and education employees.

As of June 30, 2023, approximately 107,000 individuals received benefits from PSRS/PEERS. Total annual benefits paid for the one-year period ended June 30, 2023 were over \$3.6 billion. Of this amount, almost \$3.2 billion, or 88%, was distributed among Missouri's 114 counties, positively impacting the state's economy.

INTRODUCTORY SECTION

Embracing Change for Long-Term Success

Like any type of organization, pension plans must adapt and embrace change. Successful, planned and strategically orchestrated change allows us to thrive and reach our goals.

At PSRS/PEERS, we welcome opportunities to improve, and that gives us a distinct advantage. For us, meaningful change involves all areas of our business, including internal processes, technology upgrades, member and employer interactions, investment portfolio construction and legislative enhancements.

Enhanced Employee Engagement: Hybrid Work

We began a trial of remote work for our staff in 2018-2019, as part of our overall business continuity and disaster recovery planning. As a result, we had the technology and procedural foundations in place for large-scale remote work when it became necessary during the COVID-19 pandemic in 2020-2021.

Although staff returned to the office in 2021, many expressed a desire to work on a hybrid schedule, working remotely part of each week. We have integrated this into the work schedules of many employees. Flexible, hybrid work schedules have successfully provided improved employee engagement and retention, without sacrificing the quality or quantity of the work performed.

Enhanced Employer Reporting Experience: Employer Web Portal

In March 2020, we began work on a new and improved Employer Web Portal (EWP). EWP is the online system our partner-employers use to report payroll data and contributions. The information they provide is used to determine our members' service and retirement eligibility.

The goal of the EWP rewrite was to create a robust, intuitive and user-friendly employer reporting experience. Many of the changes were based on feedback from our employers. The new EWP went live in early 2023. Now, employers can submit data, get messages and view outstanding invoices all in one place. Our employers have been complimentary of the simpler processes, helpful new calculators and wizards incorporated into the system to make their reporting easier and more accurate.

Enhanced Investment Efficiency and Productivity: Horizon

Our investment staff manages a large, world-class investment program that requires work involving many contacts and relationships that must be tracked. Horizon, our internally developed investment application, was originally created to streamline and manage the deal flow of our Private Equity, Private Credit and Private Real Estate portfolios.

The application went live in 2020 but has since been built out to include a customer relationship management module for all of our investment manager, consultant and advisor relationships, as well as a securities litigation module. Currently, we are working on expanding Horizon to include the full lifecycle of all the Systems' investment portfolios.

Enhanced Educator and School Opportunity: Legislation

The PSRS/PEERS Board of Trustees supports retirement system legislation that helps our members and participating employers, while causing no harm to

INTRODUCTORY SECTION

them or the Retirement Systems. Legislative change can be a powerful way to provide our schools and our members with new opportunities and beneficial programs.

In 2022, legislation was passed to help address statewide teacher shortages by waiving all working after retirement limits for PSRS/PEERS retirees who return to work for covered employers as substitute teachers. This work limit waiver remains in effect through June 30, 2025. The Systems' external actuaries have emphasized the importance of such legislation to be temporary and that any permanent increase or removal of such limits would likely come with a significant fiscal cost to the Systems.

During the 2023 Missouri legislative session, legislation was passed to provide even more support in this area, increasing work limits for PSRS retirees working in non-certificated positions, and for PSRS/PEERS retirees working in positions declared as having a critical shortage of qualified applicants.

From left to right: House Pensions Committee Chairman Barry Hovis, PSRS/PEERS Chief Counsel Mike Moorefield, PSRS/PEERS Executive Director Dearld Snider, Governor Mike Parson (seated), a constituent of Senator Rusty Black and Senator Rusty Black.

In addition, legislation was passed to help encourage experienced teachers to stay in the classroom longer by restoring a higher retirement benefit factor for PSRS members who retire with 32 or more years of service. This new provision resulted in an actuarial gain of \$242.3 million.

These are just a few improvements achieved by embracing change. We recognize that change provides us with ongoing opportunities and look forward to even more positive outcomes in the years ahead. Embracing change isn't just a choice, it is a necessity as we move forward. By harnessing the power of change, we are better positioned for success in the ever-evolving public pension landscape.

Board of Trustees

As of June 30, 2023

The PSRS/PEERS Board of Trustees is charged by law with the administration of PSRS/PEERS. Trustees are committed to providing services to the members and beneficiaries professionally, promptly, courteously and efficiently. The Board meets regularly six times a year, with special meetings called as necessary.

It is the fiduciary responsibility of those charged with the administration of PSRS and PEERS to:

- Effectively collect contributions,
- Prudently invest the assets to obtain optimum returns,
- Equitably provide benefits,
- Impartially and in accordance with applicable law administer the benefit programs, and
- Set contribution rates that are adequate to fund promised benefits.

The seven-member Board consists of three elected PSRS active members; one elected PEERS active member; and three governor-appointed trustees, one of whom must be a PSRS or PEERS retiree.

Trustees serve four-year terms and serve without compensation.

Dr. Jason Steliga, Chair Elected PSRS Trustee

Beth Knes, Vice Chair Appointed Trustee

Dr. Eric ParkAppointed Trustee

Allie Gassmann Elected PEERS Trustee

Dr. Kyle CollinsElected PSRS Trustee

Katie Webb Elected PSRS Trustee

NOTE: As of June 30, 2023, an appointed Trustee position was vacant.

Transmittal Letter

December 1, 2023

To the Board of Trustees and Members of the Retirement Systems:

On behalf of all management and staff, it is our pleasure to present the *Annual Comprehensive Financial Report* (ACFR) of the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS) for the fiscal year ended June 30, 2023.

The Systems' mission of providing retirement security to Missouri's educators in the most efficient and cost-effective manner possible is unwavering. Providing secure and well-funded benefits at the highest level of service for our members is the ultimate goal now and into the future. While the Systems' mission remains the same as it has for the past seven decades, we must continuously *adapt and embrace change to achieve long-term success*. At PSRS/PEERS, the willingness and ability to *adapt* is something we meet not with trepidation but with resolve. This is a long-standing mindset of the Systems, and it has resulted in making PSRS/PEERS one of the strongest and best funded public pension funds in the nation. We have and continue to navigate challenges large and small. In recent years, volatile investment markets, high inflation, rising interest rates and a worldwide pandemic all reminded us that we must *adapt to succeed*. The Systems have historically been and continue to be, a forward-thinking organization. Even after 77 years in the public pension industry, we continue *to adapt to succeed*, *be proactive and excel*. Our members can rest assured that their Retirement Systems remain financially stable and well-funded. We will continue to *adapt and serve* with excellence now and in the future.

This letter provides a brief overview of the contents of the ACFR. We encourage you to read the Management's Discussion and Analysis on pages 21 to 29 for a more detailed analysis of our financial position for the fiscal year.

In addition to providing information to our Board of Trustees and members concerning the financial condition of the Systems, this report also meets our reporting requirements under Sections 169.020.(4).16 and 169.450.(4).11 of the Revised Statutes of Missouri (RSMo). Printed copies are available to the public upon request and the complete report is also posted on our website, www.psrs-peers.org.

Report Contents and Structure

Responsibility for the preparation, accuracy, and completeness of this report, including all disclosures, rests with the management staff of PSRS/PEERS. The Systems' financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) within the guidelines established by the Governmental Accounting Standards Board (GASB). To the best of our knowledge, the enclosed data is accurate in all material respects and fairly presents our financial position and operating results.

The management of the Systems is responsible for internal accounting controls, which are designed to provide reasonable but not absolute assurance that the financial statements are free of any material misstatements and assets are safeguarded. The cost of internal controls should not exceed the benefits to be derived. The Systems employ two internal auditors who perform operational reviews to ensure that the internal controls are functioning effectively. We believe the internal controls in place are adequate to meet the purpose for which they were intended.

Our independent external auditors, selected by the Board of Trustees, have conducted an audit of the basic financial statements in accordance with U.S. generally accepted auditing standards. This audit and the financial statements and related footnotes are presented on pages 19 to 64 of this report.

Transmittal Letter, continued

Overview of the Retirement Systems

The Public School Retirement System of Missouri (PSRS), a cost-sharing multiple employer retirement system, was established in 1945 (and became operative on July 1, 1946) by the Missouri legislature to provide certificated public school employees and their families with a significant and stable source of retirement income, disability, and survivor benefits. The majority of PSRS members do not contribute to Social Security.

The Non-Teacher School Employee Retirement System of Missouri (NTRS), also a cost-sharing multiple employer retirement system, was established in 1965 by the Missouri legislature to build a plan similar to PSRS, but for non-certificated public-school personnel. The name of the non-teacher system was changed to the Public Education Employee Retirement System of Missouri (PEERS) in August 2005 to represent the members of the System more positively. Members of PEERS contribute to Social Security.

PSRS and PEERS are governed jointly by a seven-member Board of Trustees, composed of three elected active PSRS members, one elected active PEERS member and three members appointed by the governor.

Unlike most public pension systems, the members of PSRS and PEERS and their employers share equally in funding the contributions to the Retirement Systems. The contribution rates in total approximate the contribution rates of similar public plans. However, this funding mechanism has kept the employer contributions lower and the employee contributions higher than many similar public plans.

The combined Systems serve over 307,000 total members in 535 school districts and other employers. As of June 30, 2023, over 107,000 individuals received retirement benefits from the Systems. Total annual benefits paid were over \$3.6 billion for the year ended June 30, 2023. At June 30, 2023, PSRS/PEERS had a net position of approximately \$55.2 billion, making it larger than all other public retirement systems in the state of Missouri combined.

Legislative Changes During Fiscal Year 2023

During the fiscal year, the General Assembly passed legislation (CCS SB 20 and HCS SS SB 75), referred to as Senate Bill 20 and Senate Bill 75, impacting the Systems. Governor Michael L. Parson signed both pieces of legislation on July 6, 2023. The legislation restores the 2.55% benefit factor for PSRS members and increases working after retirement limits for PSRS retirees working in non-certificated positions, among other changes. The restoration of the 2.55% benefit factor for PSRS members resulted in an actuarial gain of \$242.3 million. All other legislative changes are estimated to have no significant fiscal impact on the Systems.

Senate Bill 20 and Senate Bill 75 contain several provisions, listed below, which took effect August 28, 2023.

- Restored the 2.55% benefit factor for PSRS members who have 32 or more years of service at retirement. Between July 1, 2001, and July 1, 2014, PSRS members could retire with a 2.55% benefit factor with 31 or more years of service.
- Increased the salary limit for PSRS retirees working in non-certificated positions to 133% of the annual Social Security earnings limit from August 28, 2023 to June 30, 2028, and then to 100% of the annual Social Security earnings limit thereafter.
- Modified the Critical Shortage Employment provision to expand the allowed lifetime limit on time worked from two years (24 months) to four years (48 months) and increase the potential number of Critical Shortage positions available for PSRS retirees who are teaching.
- Allowed certain retirees who nominated a same-sex domestic partner as beneficiary for lifetime monthly benefits
 under a Joint-and-Survivor benefit plan to have their monthly retirement benefit "pop-up" to the amount they
 would have received if they had not elected to receive reduced monthly benefits.

The only variance for the Systems between Senate Bill 20 and Senate Bill 75 is the fact that Senate Bill 20 did not include the "pop-up" provision for certain retirees who nominated a same-sex domestic partner. Therefore, throughout this publication the Systems focus on the impacts of Senate Bill 75 as the legislation fully encompasses all changes made

INTRODUCTORY SECTION

by Senate Bill 20. The Systems are grateful for legislation that assists our members, retirees and partner-employers in adapting to the many challenges they are facing, while maintaining the financial integrity of the Systems.

Funding Status and Valuation Results

The Board of Trustees evaluates a large amount of information each year including, but not limited to, the annual actuarial valuations prepared by the Systems' external actuaries, PwC US. Annually, the Board of Trustees reviews the sensitivities to changes in cost-of-living adjustment (COLA) assumptions, inflation projections, and investment returns. The Systems completed comprehensive experience studies in May 2021. All economic and demographic assumptions were reviewed and certain assumptions were updated, where appropriate, based on the results of the studies and effective with the June 30, 2021 valuations. For the June 30, 2022 valuations, the long-term inflation assumption was re-evaluated considering the current inflationary environment, short- and long-term inflation assumptions reflected in the capital market forecasts from various investment advisors and analysts, and volatility of capital market assumptions in recent years. A large amount of data was considered including the abnormal volatility of recently observed inflation and the unprecedented efforts by the Federal Reserve Open Market Committee to reduce inflation. Based on this information, the current long-term inflation assumption and the related COLA assumption were not adjusted. For June 30, 2023, the assumption was again revisited due to continued elevated inflation. After a detailed review, no changes were made to the assumption for the current year. We continue to monitor data sources and the effectiveness of the Fed's actions in reducing inflation in determining whether the long-term inflation assumption or COLA assumption should be updated before the next experience studies.

Due to the passage of Senate Bill 75, selected PSRS retirement rate assumptions were amended at the October 30, 2023 Board meeting and effective for the June 30, 2023 PSRS valuation. There were no other assumption changes for PSRS and no assumption changes for PEERS. Based on the results of the actuarial valuations, inflation analysis, and sensitivity analysis, the Board of Trustees did not make any additional amendments to the Systems' Actuarial Funding Policies, beyond the PSRS Retirement Rates. The Board of Trustees had last revised the Actuarial Funding Policies for the Systems at their June 8, 2021 Board meeting. The revisions incorporated the recommendations from the 2021 actuarial experience studies and are in alignment with the Board of Trustees funding goals. The purpose of the policies is to record the funding objectives and policies set by the Board of Trustees for the Systems. The Board established the policies to ensure the systematic funding of future benefit payments for the Systems' current and future members. The policies include the Board's Principles of Funding and Risk Factors that must be considered. The policies govern the methods used by the actuarial consultants in performing the actuarial valuations which are the basis for the determination of the annual contribution rates charged to employers and members.

The Board of Trustees funding goals are: 1. Provide for the security and financial stability of the Systems, including maintaining at least an 80% pre-funded ratio, continuing to amortize the unfunded liability until PSRS/PEERS is 100% pre-funded, and allowing for a reasonable assumed rate of return given capital market estimates, 2. Maintain the contribution rates of both Systems at or below current levels, and 3. Provide a consistent Cost-of-Living Adjustment (COLA) for PSRS/PEERS benefit recipients to maintain their purchasing power, noting COLAs should be dependable and affordable without harming the financial stability of the Systems. The Board of Trustees funding goals are in direct alignment with the Systems' mission, goals, and strategic plan.

The Systems' funding objective continues to be to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, funded ratio is defined as the actuarial value of assets divided by the actuarial accrued liability determined under the entry age normal cost method and the actuarial assumptions adopted by the Board of Trustees. As of June 30, 2023, PSRS was 85.9% pre-funded, while PEERS was 87.3% pre-funded. The funding status of PSRS increased from the June 30, 2022, funded percentage of 85.2% and PEERS remained unchanged from the June 30, 2022, funded percentage of 87.3%. The liabilities increased more than expected mainly due to salary increases being greater than assumed, but the actuarial value of assets also increased by more than the 7.3% expected return assumption because average returns over the last five years have exceeded the assumed returns. Over time, we expect the annual gains/losses to be offsetting. Additional information on actuarial assumptions and funding can be found in the Actuarial Section of this report. Based upon the June 30, 2023 valuations and overall financial projections, the Board of Trustees set the fiscal year 2025 contribution rates equivalent to the fiscal year 2024 level for both members and employers.

Transmittal Letter, continued

Investment Activities

Fiscal year 2023 was a challenging year for the financial markets including inflation at multi-decade highs, aggressive central bank rate hikes, banking sector instability, the continued Ukraine/Russian war, AI-related advances and slowing economic growth. Despite the difficult market environment, the Russell 3000 Index (broad measure of the U.S. stock market) produced a 19.0% return for the year. The Non-U.S. equity markets also performed well but not to the same extent as the U.S. equity markets with the MSCI ACWI ex-USA Index (broad measure of the international stock markets) increasing 12.7% for the year. Bond markets experienced considerable interest rate and spread volatility during the year. The Systems' investment in global stocks supported the fiscal year 2023 total fund performance while diversification into other asset classes provided mixed results. For example, bonds produced negative returns for the third consecutive year, and real estate was re-priced lower. The PSRS and PEERS investment return was 6.4% (or 6.2% net of all fees and expenses) for fiscal year 2023.

The total plan return, net of all investment expenses and fees, fell short of the policy benchmark return for the fiscal year. The total fund return was marginally below the long-term investment goal (actuarially assumed return) of 7.3%. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objectives. For the 10-year time period ended June 30, 2023, the total plan return exceeded the policy benchmark return by 150 basis points. The Systems' internal investment staff and external investment managers added value above the policy benchmark of almost \$7.0 billion net of all fees and expenses over the last 10 years. Performing well over time, during periods of both strong and weak markets, signifies the Systems' well-structured and diversified investment portfolio's ability to deliver higher returns and lower risk than the policy benchmark. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objective. The annualized investment return for the Systems is 7.7% (7.5% net of all investment expenses and fees) over the last 30 years.

Additional detailed information regarding the Systems' investments, including asset allocation, policies, and strategies, can be found in the Investment Section of this report.

Other Key Initiatives During Fiscal Year 2023

During the current fiscal year, the Board of Trustees approved the addition of a secondary office in St. Louis to meet the needs of an expanded investment opportunity set within private markets. The secondary office is expected to facilitate enhanced investment staff recruitment/retention and long-term succession planning.

Awards

Public Pension Coordinating Council (PPCC), Public Pension Standards Award

PSRS and PEERS each received the Public Pension Standards Awards in 2023 in recognition of meeting professional standards for plan administration and plan funding as set forth in the Public Pension Standards of the PPCC. These awards are presented by the PPCC, a confederation of the National Association of State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR).

Certificate of Achievement for Excellence in Financial Reporting

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to PSRS and PEERS for the *Annual Comprehensive Financial Report* for the fiscal year ended June 30, 2022. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized *Annual Comprehensive Financial Report*. This report must satisfy both generally accepted accounting principles, applicable legal requirements and GFOA standards. A Certificate of Achievement is valid for a period of one year only. We believe our current *Annual Comprehensive Financial Report* continues to meet the Certificate of Achievement program requirements and we are submitting it to GFOA to determine eligibility for another certificate.

INTRODUCTORY SECTION

Professional Services

Certain professional services are provided to the Systems by retained consultants. The required opinion letters from two of those consultants, PwC US, actuaries, and Williams-Keepers LLC, independent certified public accountants, are contained elsewhere in this report.

General investment consulting services have been provided by Russell Investments.

Acknowledgements

We would like to express our thanks and gratitude to the Board of Trustees, staff and consultants who have worked diligently to produce this report and to ensure the continued successful operation of the Systems. Their willingness to embrace the Systems' philosophy of adaptation and making it a seamless part of our everyday operations is appreciated.

Respectfully submitted,

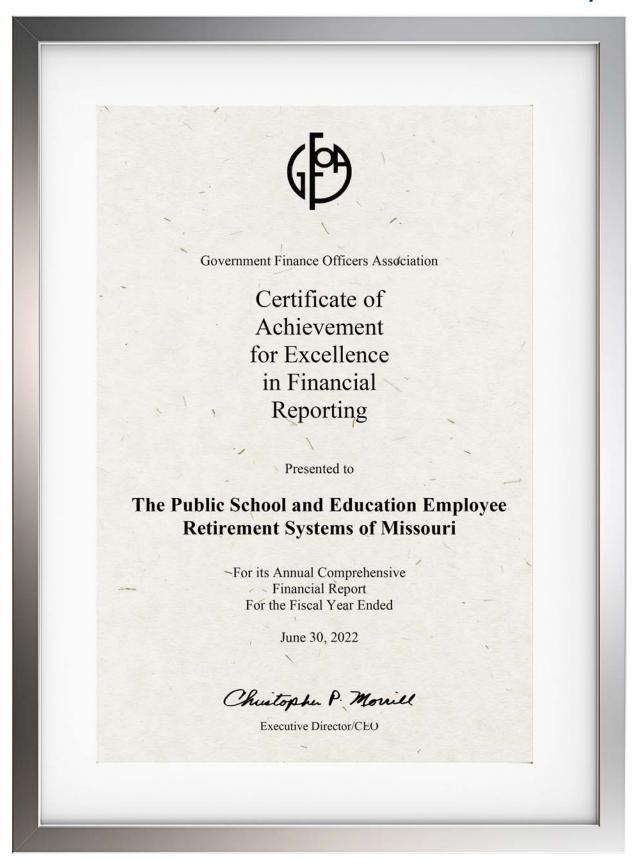

Dearld Snider

The Board of Trustees of the Public School and Public Education Employee Retirement Systems of Missouri

Opinions

We have audited the accompanying statements of fiduciary net position of the Public School and Public Education Employee Retirement Systems of Missouri (the Systems), as of June 30, 2023, and the related statements of changes in fiduciary net position for the year then ended, and the related notes to the financial statements, which collectively comprise the Systems' basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Public School and Public Education Employee Retirement Systems of Missouri as of June 30, 2023, and the changes in fiduciary net position for the year then ended, in accordance with U.S. generally accepted accounting principles.

Basis for Opinions

We conducted our audit in accordance with U.S. generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditors' Responsibilities of the Audit of the Financial Statements section of our report. We are required to be independent of the Systems and to meet our ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Systems' ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

American Institute of Certified Public Accountants | Missouri Society of Certified Public Accountants | Member, Allinial Global

Independent Auditors' Report, continued

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Systems' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Systems' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis on pages 21-29, schedules related to the defined benefit plans (schedules of changes in the employers' net pension liability, employers' net pension liability, employer contributions, investment returns, and notes to schedules) on pages 56-61, and schedules related to the defined benefit OPEB plan (schedule of changes in the net OPEB liability and related ratios) on page 62 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the required supplementary information in accordance with U.S. generally accepted auditing standards, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Public School and Public Education Employee Retirement Systems of Missouri basic financial statements. The introductory, investment, actuarial and statistical sections and the schedules of administrative expenses, schedules of professional services, and schedules of investment expenses presented on pages 63 through 64 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The additional information on pages 63 through 64 is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards. In our opinion, the additional information presented on pages 63 through 64 is fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory, investment, actuarial and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Columbia, Missouri December 1, 2023

Williams - Keepers LLC

Management's Discussion and Analysis

Introduction

This discussion and analysis of the financial position of the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS), collectively referred to as the Systems, provides an overview of the Systems' financial activities for the fiscal year ended June 30, 2023. We encourage you to consider the information presented here in conjunction with the *Transmittal Letter* included in the *Introductory Section* and the financial statements and other information presented in the *Financial Section* of this *Annual Comprehensive Financial* Report (ACFR).

Financial Highlights

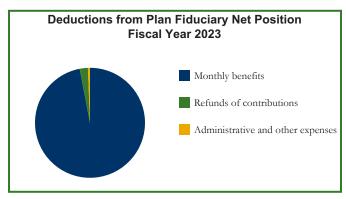

The following highlights are explained in more detail for each System later in this discussion.

- Senate Bill 20 (CCS SB 20) and Senate Bill 75 (HCS SS SB 75) were passed by the Missouri General Assembly during the current fiscal year and subsequently signed by Governor Parson. The legislation provides for a 2.55% benefit factor for PSRS members who have 32 or more years of service at retirement. Between July 1, 2001 and July 1, 2014, PSRS members could retire with a 2.55% benefit factor with 31 or more years of service. The new provision results in an actuarial gain of \$242.3 million.
- The legislation also contained several new provisions to increase working after retirement limitations for both PSRS and PEERS retired members. These new provisions are not expected to have a fiscal impact on the Systems. The only variance for the Systems between Senate Bill 20 and Senate Bill 75 is the fact that Senate Bill 20 did not include the "pop-up" provision for certain retirees who nominated a same-sex domestic partner. Therefore, throughout the publication the Systems focus on the impacts of Senate Bill 75 as the legislation fully encompasses all changes made by Senate Bill 20.
- The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience for the Systems, derived from experience studies conducted every fifth year. The most recent comprehensive experience studies were completed during fiscal year

- 2021. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the studies and effective with the June 30, 2021 valuations. The PSRS funding policy was most recently amended at the October 30, 2023 Board meeting, to update selected retirement rate assumptions pursuant to the passage of Senate Bill 75 for the June 30, 2023 valuation. The PEERS funding policy was unchanged. The significant actuarial assumptions are detailed in the notes to the financial statements and the notes to the schedules of required supplementary information. The next experience studies are scheduled to occur during fiscal year 2026.
- As of June 30, 2023, PSRS' fiduciary net position as a percentage of the total pension liability decreased to 85.4% from 86.0% for the prior year. PSRS' net pension liability approximated \$8.4 billion as of June 30, 2023. As of June 30, 2023, PEERS' fiduciary net position as a percentage of the total pension liability decreased to 86.5% from 87.9% for the prior year. PEERS' net pension liability approximated \$998.9 million as of June 30, 2023. The net pension liability is calculated utilizing the fair value of assets in accordance with Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Pension Plans, for accounting presentation purposes.
- The pre-funded status of the Systems is measured as the ratio of assets available for benefits to a benefit liability measure for the Systems. While there are several such measures that could be appropriately used, the benefit liability measure that ties most closely to the Systems' funding policies is the actuarial accrued liability (AAL) computed in accordance with assumptions and methods approved by the Board of Trustees. The pre-funded ratio uses the actuarial value of assets (AVA), a smoothed asset value that recognizes 20% of the total investment gain or loss on the AVA for each of the preceding five years. This is the significant difference between accounting measurements in accordance with GASB Statement No. 67 and funding calculations. As of June 30, 2023, the prefunded ratios for funding purposes were 85.9% for PSRS and 87.3% for PEERS. In general, this means that for each dollar of future pension liability, PSRS and PEERS have accumulated approximately \$0.86 and \$0.87, respectively, to meet that obligation. To fully understand the funding status of a retirement

- system, it is advisable to view the actuarial data in conjunction with financial data.
- Fiscal year 2023 investment markets continued to experience rising interest rates and elevated inflation levels throughout the world. Additionally, fiscal year 2023 investment markets experienced banking failures, escalating China-US tension, a continued Ukraine/Russian War and overall geopolitical tension. The Systems' diversified portfolio resulted in fiscal year 2023 total fund performance of 6.4% (6.2% net of all investment expenses and fees). The total plan return, net of all investment expenses and fees, fell short of the policy benchmark return for the fiscal year. The total fund return was marginally below the long-term investment goal (actuarially assumed return) of 7.3%. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objectives. For the 10-year time period ended June 30, 2023, the total plan return exceeded the policy benchmark return by 150 basis points. The Systems' internal investment staff and external investment managers added value above the policy benchmark of almost \$7.0 billion net of all fees and expenses over the last 10 years. The annualized investment return for the Systems is 7.7% (7.5% net of all investment expenses and fees) over the last 30 years.
- The Systems' investment returns for the last fiveyear and ten-year time periods exceeded 74% of the peer group as defined by the Wilshire TUCS universe of public pension plans with assets in excess of \$1 billion. Additionally, the Systems generated the consistently higher returns while taking substantially less risk than the policy benchmark (as measured by standard deviation) and less risk than most comparable public funds over all time periods.
- Cost-sharing, defined-benefit retirement systems such as the Systems have a long-term perspective on financial activities. The Systems' primary responsibility is to ensure that sufficient funds will be available to provide retirement, disability and survivor benefits to current and future members. Condensed Statements of Fiduciary Net Position and Statements of Changes in Fiduciary Net Position are provided for each System on the following pages.
- Pension benefits are funded through a combination of member and employer contributions and investment income. Approximately, 63% of every

- dollar used to pay retirees is generated from investment earnings (based on a twenty-five year average for fiscal years 1999-2023).
- Expenses are incurred for the sole purpose for which the Systems were created: the payment of benefits to the Systems' membership and their beneficiaries. Included in the deductions from fiduciary net position were monthly benefit payments, refunds of contributions due to member terminations or deaths, and administrative and other expenses. The pie chart depicts the combined Systems' deductions from Plan Fiduciary Net Position for the year ended June 30, 2023.

- The combined net position of the Systems increased by \$1.4 billion. The net position of PSRS increased by \$1.2 billion while the net position of PEERS increased by \$249.1 million.
- Total revenues for fiscal year 2023 were comprised of contribution revenue of \$1.93 billion and investment gains of \$3.22 billion, compared to contribution revenue of \$1.85 billion and investment losses of \$1.64 billion for fiscal year 2022.
- Expenses increased 7.9% over the prior year from \$3.5 billion to \$3.7 billion. Retirement benefits increased by \$262.1 million and member refunds increased by \$9.1 million from the prior year, while administrative expenses increased by \$2.2 million during the same time period.
- During the current fiscal year, the Board of Trustees approved the addition of a secondary office in St.
 Louis to meet the needs of an expanded investment opportunity set within private markets. The secondary office is expected to facilitate enhanced investment staff recruitment/retention and longterm succession planning.

Overview of the Financial Statements

The ACFR reflects the activities of the Systems as reported in Statements of Fiduciary Net Position and the Statements of Changes in Fiduciary Net Position (the Systems' financial statements). The Systems' financial statements, notes to the financial statements, and required supplementary information were prepared in conformity with GASB Statement No. 67, Financial Reporting for Pension Plans, as amended. This discussion and analysis are intended to serve as an introduction to the financial section of the ACFR. The financial section of the ACFR consists of the basic financial statements comprised of the Statements of Fiduciary Net Position and the Statements of Changes in Fiduciary Net Position, the notes to the basic financial statements, required supplementary information and other supplementary information.

The Statements of Fiduciary Net Position present information on the Systems' assets, deferred outflows, liabilities, deferred inflows and resulting net position, where assets plus deferred outflows less liabilities and deferred inflows is reported as net position. The net position of the Systems reflects the resources available to pay benefits to members when due. Over time, increases and decreases in net position measure whether the Systems' financial position is improving or deteriorating.

The Statements of Changes in Fiduciary Net Position present information detailing the changes in net position that occurred during the current fiscal year. All changes in net position are reported on an accrual basis. This means that the revenue or expense is recognized as soon as the underlying event giving rise to the change occurs, regardless of when the actual cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods. For example, contributions due from an employer, even though not yet paid by year end, will be reflected as revenue. Earned vacation accruals will be reflected as an expense, even though they have not been paid to employees.

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes can be found on pages 32 through 55.

The report also contains required supplementary information in addition to the basic financial statements

themselves. The required supplementary information consists of the following schedules and related notes:

- The Schedules of Changes in the Employers' Net Pension Liability include historical trend information about the annual changes of the net pension liability, including assumption changes and variances of assumed experience.
- The Schedules of Employers' Net Pension Liability include historical trend information about whether each System's net position is increasing or decreasing over time relative to the total pension liability. The schedules provide a long-term, ongoing perspective of the accumulation of assets to pay benefits when due.
- The Schedules of Employer Contributions present historical trend information about the actuarially determined contributions of employers and the actual contributions made by employers.
- The Schedules of Investment Returns present historical annual money-weighted rate of returns.
- The Schedules of Changes in the OPEB Liability and Related Ratios include historical trend information about the defined benefit other postemployment benefit (OPEB) plan from a long-term, ongoing perspective.
- The Notes to the Schedules of Required Supplementary Information provide additional information that is essential to a full understanding of the data provided in the schedules.

Other supplementary schedules are also included. The Schedules of Administrative Expenses present the overall cost of administering the Systems. The Schedules of Professional Services further detail this category of administrative expense. The Schedules of Investment Expenses show the costs associated with investing the assets of the Systems. These expenses are shown as a reduction of revenue on the Statements of Changes in Fiduciary Net Position.

Financial Analysis of the Public School Retirement System of Missouri (PSRS)

PSRS is a mandatory cost-sharing multiple employer retirement system for full-time certificated employees and certain part-time employees of participating employers. PSRS members were required to contribute 14.5% of their annual covered salary during fiscal year 2023. The employer was required to match that amount. Most PSRS members do not contribute to Social Security, except for employees hired after 1986 who contribute to Medicare only. In some instances, positions may be determined not to be exempt from Social Security contributions. PSRS members required to contribute to Social Security are required to contribute two-thirds of the approved PSRS contribution rate and their employer is required to match the contribution. The members' benefits are further calculated at twothirds the normal benefit amount.

Public School Retirement System of Missouri Fiduciary Net Position (000's)									
	2023	2022	Change

Fiduciary net position	\$ 48,833,108	\$ 47,671,055	\$ 1,162,053						

Assets

Total assets of PSRS as of June 30, 2023 were \$50.1 billion and were mostly comprised of cash, investments, investment sales receivables and contributions due from employers. Total assets increased by \$1.0 billion from the prior year due to investment gains that were offset by a decrease in invested securities lending collateral. The reduction in securities lending collateral is due to the Systems' decision to cease securities lending activity.

Liabilities

Total liabilities as of June 30, 2023, were \$1.3 billion and were mostly comprised of payables from the purchase of investments. Total liabilities decreased by \$0.1 billion from the prior year. The decrease was due to a significant decrease in obligations under security lending

arrangements, which was partially offset by an increase in investment purchase payables and the new lease liability for the Systems' secondary office location. As previously noted, the Systems made a decision to cease securities lending activity during the fiscal year.

Deferred Outflows and Inflows of Resources

Deferred inflows and outflows are a result of the System's Post-Employment Healthcare Plan and are presented in accordance with GASB Statement No. 75.

Net Position

PSRS assets exceeded liabilities on June 30, 2023, by \$48.8 billion. This was an increase of \$1.16 billion from the 2022 net position. The increase was primarily due to an increase in investment earnings previously discussed. Investment gains totaled \$2.84 billion for the year. In addition, benefit payments and other expenses exceeded contribution revenue by \$1.68 billion, as expected in a mature defined benefit plan.

Public School Retirement System of Missouri Changes in Fiduciary Net Position (000's)							
	2023 2022 Change						
Additions							
Member contributions	\$	832,155	\$ 807,546	\$ 24,609

Revenues – Additions to Fiduciary Net Position

The reserves needed to finance retirement benefits are accumulated through the collection of employer and employee contributions and through investment earnings. Total contribution revenue for the year increased by \$52.9 million to \$1.6 billion. This was a 3.4% increase over the prior year. Retirement contributions were calculated at 14.5% of retirement

salary for each member during fiscal year 2023. The employer matched this amount. Contribution rates were unchanged from the prior year. An increased retirement salary base and the addition of new members resulted in the increase in contributions.

The net investment gain was \$2.84 billion as compared to a net investment loss of \$1.45 billion in 2022. The current year gains are reflective of a 6.2% net return on the Systems' diversified investment portfolio, compared to net investment losses of 3.1% in the prior year. All investment related expenses, such as fees paid to investment managers, are reflected as a reduction in revenue and are accounted for in this net figure. The *Investment Section* of this report contains additional information regarding the investment portfolio and related activity.

Expenses – Deductions from Fiduciary Net Position

The primary expenses of PSRS include the payment of pension benefits to members and beneficiaries, refunds of contributions to former members, and the cost of administering the System. Total expenses for fiscal year 2023 were \$3.3 billion, an increase of 7.7% over fiscal year 2022. The overall increase was directly related to the System's mission of providing retirement benefits to Missouri educators. Benefit increases represented over 99% of the overall increase in expenses.

Monthly benefit expenses increased by \$226.9 million to \$3.2 billion. This was a result of an overall increase of 1,831 monthly benefit recipients from the prior year-end and eligible benefit recipients receiving a 5.0% cost-of-living increase on January 1, 2023 and January 1, 2022. There were no changes to the benefit formula for payments during 2023. As previously discussed, Senate Bill 75 provides for a 2.55% benefit factor for PSRS members who have 32 or more years of service at retirement. This change was effective with retirements after August 28, 2023. Refunds of contributions increased by \$7.0 million during the current year to a total of \$62.6 million.

Administrative expenses increased by \$1.3 million to \$13.0 million. The Systems experienced the impacts of elevated inflation levels across a variety of expenditures. Specifically, the System recognized increases in depreciation with the completion of the building expansion and renovation project and personnel expenses. Personnel expenses increased due to the

addition of staff, adverse medical insurance experience and merit allocations to staff. These increases were partially offset by a decrease in credit monitoring services for our membership and furniture and fixtures expenditures related to the completion of building expansion project. The cost of administrative items was charged 59% to PSRS and 41% to PEERS for the fiscal year (60% for PSRS and 40% for PEERS during fiscal year 2022) unless the expense was determined to be of direct benefit to only one System. In such instance, the allocation of expense was 100% to the benefited System. As always, we will continue to look for ways to streamline costs when prudent.

Financial Analysis of the Public Education Employee Retirement System of Missouri (PEERS)

PEERS is a mandatory cost-sharing multiple employer retirement system for non-certificated employees and certain part-time certificated employees of participating employers. PEERS members were required to contribute 6.86% of their annual covered salary during fiscal year 2023. The employer was required to match that amount. PEERS members also contribute to Social Security.

Assets

Total assets of PEERS as of June 30, 2023 were \$6.6 billion and were mostly comprised of cash, investments, investment sales receivables and contributions due from employers. Total assets increased by \$0.2 billion from the prior year due to investment gains that were offset by a decrease in invested securities lending collateral. The reduction in securities lending collateral is due to the Systems' decision to cease securities lending activity.

Liabilities

Total liabilities as of June 30, 2023 were \$169.9 million and were mostly comprised of payables from the purchase of investments. Total liabilities decreased by \$5.6 million. The decrease was due to a significant decrease in obligations under security lending arrangements, which was partially offset by an increase in investment purchase payables. As previously noted, the Systems made a decision to cease securities lending activity during the fiscal year.

Deferred Outflows and Inflows of Resources

Deferred inflows and outflows are a result of the System's Post-Employment Healthcare Plan and are presented in accordance with GASB Statement No. 75.

Net Position

PEERS assets exceeded liabilities on June 30, 2023 by \$6.4 billion. This was an increase of \$249.1 million from the 2022 net position. The increase was primarily due to an increase in investment earnings previously discussed. Investment income totaled \$373.2 million for the year offset by benefit payments and other expenses which exceeded contribution revenue by \$124.1 million.

Revenues – Additions to Fiduciary Net Position

The reserves needed to finance retirement benefits are accumulated through the collection of employer and employee contributions and through investment earnings. Total contribution revenue for the year increased by \$24.5 million to \$303.9 million. This was an 8.8% increase over the prior year. Retirement contributions were calculated at 6.86% of retirement salary for each member during fiscal year 2023. The employer matched this amount. Contribution rates were unchanged from the prior year. The increase in total contributions is attributable to a higher retirement salary base and the addition of new members.

The net investment gain was \$373.2 million as compared to a net investment loss of \$189.3 million in 2022. The current year gains are reflective of a 6.2% net return on the Systems' diversified investment portfolio, as compared to net losses of 3.1% in the prior year. All investment related expenses, such as fees paid to investment managers, are reflected as a reduction in revenue and are accounted for in this net figure. The *Investment Section* of this report contains additional information regarding the investment portfolio and related activity.

Expenses – Deductions from Fiduciary Net Position

The primary expenses of PEERS include the payment of pension benefits to members and beneficiaries, refunds of contributions to former members, and the cost of administering the System. Total expenses for fiscal year 2023 were \$427.9 million, an increase of 9.8% over fiscal year 2022. The overall increase was directly related to the System's mission of providing retirement benefits to Missouri education employees. Benefit increases represented approximately 96% of the overall increase in expenses.

Monthly benefit expenses increased by \$35.3 million to \$393.9 million. This was a result of an overall increase of 1,539 monthly benefit recipients from the prior year-end and eligible benefit recipients receiving a 5.0% cost-of-living increase on January 1, 2023 and January 1, 2022. There were no changes to the benefit formula during 2023. Refunds of contributions increased by \$2.0 million from the prior year.

Administrative expenses increased by \$0.9 million. The System experienced the impacts of elevated inflation levels across a variety of expenditures. Specifically, the System recognized increases in depreciation with the completion of the building expansion and renovation project and personnel expenses. Personnel expenses increased due to the addition of staff, adverse medical

insurance experience and merit allocations to staff. These increases were partially offset by a decrease in credit monitoring services for our membership and furniture and fixtures expenditures related to the completion of the building expansion and renovation project. The cost of administrative items was charged 59% to PSRS and 41% to PEERS for the fiscal year (60% for PSRS and 40% for PEERS during fiscal year 2022) unless the expense was determined to be of direct benefit to only one System. In such instance, the allocation of expense was 100% to the benefited System. As always, we will continue to look for ways to streamline costs when prudent.

Summary

The Board of Trustees, management and staff are dedicated to keeping the Systems strong today and well into the future and continually strive to improve the financial position of the Systems through sound governance processes, comprehensive funding policies, a prudent investment program, and long-term strategic planning.

The Systems' funding objective continues to be to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, funded ratio is defined as the actuarial value of assets divided by the actuarial accrued liability determined under the entry age normal cost method and the actuarial assumptions adopted by the Board. The actuarial value of assets recognizes investment gains or losses over a period of five years to manage market volatility. Detailed information regarding the Systems' actuarial assumptions is included in the *Actuarial Section* of this report.

The Board of Trustees revised the Actuarial Funding Policies at their June 8, 2021 Board meeting based on results of actuarial experience studies conducted during fiscal year 2021. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the studies and the revisions were effective with the June 30, 2021 valuations. The PSRS funding policy was most recently amended at the October 30, 2023 Board meeting, to update selected retirement rate assumptions pursuant to the passage of Senate Bill 75 for the June 30, 2023 valuation. The PEERS funding policy was unchanged.

The economic factors of primary significance to the Systems is the investment rate of return earned in global capital markets and the overall impact of inflation on cost-of-living adjustments. Legislative, demographic, and actuarial assumption changes can also have a significant impact on the funded status of the Systems. All these factors are incorporated into the annual actuarial valuations, which determine the contribution rates at which participating employers must contribute in order to appropriately fund benefits.

The actuarial assumed rate of return was 8.0% from 1980 through fiscal year 2016. The Board of Trustees first reduced the actuarial assumed rate of return to 7.75%, effective with the June 30, 2016 actuarial valuations and fiscal year 2017 investment performance measurement. The Board of Trustees has continually considered the funded status of the Systems, expectations of capital markets and other factors. Based on these considerations the Board of Trustees has reduced the risk profile of the plans with further reductions of the actuarial assumed rate of return as of June 30, 2017 (7.6%) and June 30, 2018 (7.5%). As part of the fiscal year 2021 actuarial experiences studies, the Board of Trustees further reduced the risk profile by adopting a new actuarial assumed rate of return of 7.3%. The long-term investment objective of 7.3% was effective with the June 30, 2021 actuarial valuations and fiscal year 2022 investment performance measurement.

The Systems earned an investment return of 6.4% (6.2% net of all investment expenses and fees). The total plan return, net of all investment expenses and fees, fell short of the policy benchmark return for the fiscal year. The Systems' investment portfolio is well-diversified and structured to provide downside protection during volatile investment markets.

Due to the long-term nature of defined benefit pension plans, it is important to look at the financial performance of the Systems over a period of years and not just at this single point in time. Over long periods of time, the Systems continue to produce investment returns that meet or exceed the Systems' objectives. For the 10-year time period ended June 30, 2023, the total plan return exceeded the policy benchmark return by 150 basis points. The Systems' internal investment staff and external investment managers added value above the policy benchmark of almost \$7.0 billion net of all fees and expenses over the last 10 years. Additionally, the annualized investment return for the Systems over the last 30 years is 7.5%, net of all fees and expenses.

Detailed information regarding the Systems' investment portfolio is included in the *Investment Section* of this report.

The fiscal year 2025 contribution rates remain unchanged from the fiscal year 2024 rates and were approved by the Board of Trustees at their October 30, 2023 meeting. The fiscal year 2025 contribution rate for PSRS remains 29.0%. The fiscal year 2025 contribution rate for PEERS remains 13.72%. The fiscal year 2025 contribution rates are in compliance with the PSRS/PEERS Board of Trustees' Funding Policies and represent the continued stability of contribution rates for employers and members.

Requests for Information

This financial report is designed to provide the Board of Trustees, our members, and other users of our financial report with a general overview of the Systems' finances and to demonstrate the Systems' accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Public School and Education Employee Retirement Systems of Missouri (PSRS/PEERS), P.O. Box 268, Jefferson City, MO 65102.

Notes to the Financial Statements

Note 1 - Plan Descriptions

The Board of Trustees of the Public School Retirement System of Missouri administers two separate retirement systems, the Public School Retirement System of Missouri (PSRS) and the Public Education Employee Retirement System of Missouri (PEERS). The Board of Trustees consists of seven members, three of whom are elected PSRS active members, one elected active member of PEERS and three persons appointed by the governor, one of whom must be a retired member of either PSRS or PEERS.

The funds of the two Systems are managed simultaneously. Investments of the Systems are combined in a commingled investment pool as allowed by state statute. Each System owns an equity position in the pool and receives proportionate investment income from the pool in accordance with their respective ownership percentage. Each System's allocated share of each type of investment in the pool is shown on the Statements of Fiduciary Net Position. Investment gains and losses are reported in the Statements of Changes in Fiduciary Net Position. Each System's assets may be used only for the payment of benefits to the members of the separate System in accordance with the statutes governing that System as well as expenses required to administer the System.

The Public School Retirement System of Missouri (PSRS)

PSRS is a mandatory cost-sharing multiple employer retirement system for all full-time certificated employees and certain part-time certificated employees of all public school districts in Missouri (except the school districts of St. Louis and Kansas City), and all public community colleges. The System also includes certificated employees of PSRS, Missouri State Teachers' Association, Missouri State High School Activities Association, and certain employees of the state of Missouri who elected to remain covered by PSRS under legislation enacted in 1986, 1987 and 1989. The majority of PSRS members are exempt from Social Security contributions. In some instances, positions may be determined not to be exempt from Social Security contributions. Any PSRS member who is required to contribute to Social Security comes under the requirements of Section 169.070 (9) RSMo,

known as the "2/3's statute." PSRS members required to contribute to Social Security are required to contribute two-thirds of the approved PSRS contribution rate and their employer is required to match the contribution. The members' benefits are further calculated at two-thirds the normal benefit amount.

PSRS was established as an independent trust fund by the Missouri General Assembly effective August 1, 1945. Statutes governing the System are found in Sections 169.010-169.141 and Sections 169.560-169.595 RSMo. PSRS is a defined benefit plan providing service retirement, death and disability benefits to its members. Members are vested for service retirement benefits after accruing five years of service. Individuals who (a) are at least age 60 and have a minimum of five years of service, (b) have 30 years of service, or (c) qualify for benefits under the "Rule of 80" (service and age total at least 80) are entitled to a monthly benefit for life, which is calculated using a 2.5% benefit factor. Senate Bill 75 (HCS SS SB 75) was passed by the Missouri General Assembly during the current fiscal year and subsequently signed by Governor Parson. Senate Bill 75 provides for a 2.55% benefit factor for PSRS members retiring after August 28, 2023, who have 32 or more years of service at retirement. Between July 1, 2001 and July 1, 2014, PSRS members could retire with a 2.55% benefit factor with 31 or more years of service. Actuarially age-reduced benefits are available for members with five to 24.9 years of service at age 55 or with 25 years of service (if not yet age 55). Members who are younger than age 55 and who do not qualify under the "Rule of 80" but have between 25 and 29.9 years of service may retire with a lesser benefit factor. Members who are three years beyond normal retirement can elect to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time partial lump sum (PLSO) payment at retirement equal to 12, 24, or 36 times the Single Life benefit amount. Annual cost-of-living adjustments (COLAs) are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional benefit plans, up to a lifetime maximum of 80% of the original benefit amount.

For a more detailed summary of benefits for the members of PSRS, refer to the *Summary Plan Description* in the *Actuarial Section* of this report.

Contributions – PSRS members were required to contribute 14.5% of their annual covered salary during fiscal year 2023. Employers were required to match the

contributions made by employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions set in Section 169.030 RSMo. The annual statutory increase in the total contribution rate may not exceed 1% of pay. Administrative costs are financed through investment earnings. Contributions for employees of the State of Missouri were made by the state in accordance with the actuarially determined contribution rate needed to fund current costs and prior service costs of state employees as authorized in Section 104.342.8 RSMo.

Members – The number of PSRS members and benefit recipients served by the System at June 30, 2023:

Retirees and beneficia	69,507		
Inactive members ent	eiving		
benefits		10,835	
Active members:	Vested	60,445	
	Non-vested	17,992	
Total active members	_		78,437
Other inactive member	ounts	9,860	
Total			168,639

Employers – PSRS had 534 contributing employers during fiscal year 2023.

The Public Education Employee Retirement System of Missouri (PEERS)

PEERS is a mandatory cost-sharing multiple employer retirement system for all public school district employees (except the school districts of St. Louis and Kansas City), employees of the Missouri Association of School Administrators, and public community college employees (except the Community College of St. Louis). Employees of covered districts who work 20 or more hours per week on a regular basis and who are not contributing members of the Public School Retirement System of Missouri (PSRS) must contribute to PEERS. Employees of PSRS who do not hold Missouri educator certificates also contribute to PEERS.

PEERS was established as a trust fund by the Missouri General Assembly effective October 13, 1965. Statutes governing the System are found in Sections 169.600 - 169.715 and Sections 169.560-169.595 RSMo. The statutes place responsibility for the operation of PEERS on the Board of Trustees of the Public School Retirement System of Missouri.

PEERS is a defined benefit plan providing service retirement and disability benefits to its members. Members are vested for service retirement benefits after accruing five years of service. Individuals who (a) are at least age 60 and have a minimum of five years of service, (b) have 30 years of service, or (c) qualify for benefits under the "Rule of 80" (service and age total at least 80) are entitled to a monthly benefit for life, which is calculated using a 1.61% benefit factor. Members qualifying for "Rule of 80" or "30-and-out" are entitled to an additional temporary 0.8% benefit multiplier until reaching minimum Social Security age (currently age 62). Actuarially age-reduced retirement benefits are available with five years of service at age 55. Members who are younger than age 55 and who do not qualify under the "Rule of 80" but have between 25 and 29.9 years of service may retire with a lesser benefit factor. Members who are three years beyond normal retirement can elect to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a onetime partial lump sum (PLSO) payment at retirement equal to 12, 24, or 36 times the Single Life benefit amount. Annual cost-of-living adjustments (COLAs) up to a lifetime maximum of 80% of the original benefit amount are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional benefit plans.

For a more detailed summary of benefits for the members of PEERS, refer to the *Summary Plan Description* in the *Actuarial Section* of this report.

Contributions – PEERS members were required to contribute 6.86% of their annual covered salary during fiscal year 2023. Employers were required to match the contributions made by their employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. The annual statutory increase in the total contribution rate may not exceed 0.5% of pay. Administrative costs proportional to its membership size are reimbursed by PEERS to the Public School Retirement System of Missouri (PSRS) and are financed through investment earnings.

Members – The number of PEERS members and benefit recipients served by the System at June 30, 2023:

Retirees and beneficiaries receiving benefits 37,737									
Inactive members entity benefits	eiving	8,132							
Active members:	Vested	25,995							
	Non-vested	25,792							
Total active members	_		51,787						
Other inactive member	ounts	40,799							
Total			138,455						

Employers – PEERS had 531 contributing employers during fiscal year 2023.

Note 2 – Summary of Significant Accounting Policies

Basis of Accounting

For financial reporting purposes, the Systems adhere to accounting principles generally accepted in the United States of America. The Systems apply all applicable pronouncements of the Governmental Accounting Standards Board (GASB).

The Systems' financial statements, notes to the financial statements, and required supplementary information were prepared in conformity with GASB Statement No. 67, Financial Reporting for Pension Plans, as amended. GASB Statement No. 67 addresses accounting and financial reporting requirements for pension plans. Significant requirements include an actuarial calculation of total and net pension liability. It also includes comprehensive footnote disclosures regarding the pension liability, the sensitivity of the net pension liability to the discount rate and extensive investment activity disclosures. The total pension liability, determined in accordance with GASB Statement No. 67 is presented in Note 6 - Net Pension Liability of Employers.

The financial statements of both Systems were prepared using the accrual basis of accounting. For both Systems, member and employer contributions are recognized when due, pursuant to formal commitments and statutory requirements. Benefits and refunds are recognized when due and payable in accordance with the statutes governing the Systems. Expenses are recognized when the liability is incurred, regardless of when payment is made. Administrative expenses are funded through investment earnings.

Cash and Short-term Investments

Cash and short-term investments include deposits held for operational purposes at a commercial depository bank and cash and short-term investments with the master custodian.

Receivables

Receivables consist primarily of contributions owed and yet to be remitted by employers, pending investment trades and interest and dividends payable to the Systems as of the end of each fiscal year.

Method Used to Value Investments

Investments are reported at fair value. The fair value of investments is based on published market prices and quotations from major investment brokers at current exchange rates, as available. Many factors are considered in arriving at fair value. Fixed income securities not traded on a national or international exchange are based on equivalent values of comparable securities with similar yield and risk.

The value of private equity, private credit and private real estate investments, that do not have an established market, is determined based upon the most current net asset values and activities through fiscal year end. When values are not readily available, alternative investments are valued based on a good faith determination by the General Partner. The estimated fair value of these investments may differ significantly from values that would have been updated had a ready market existed. The estimated fair values can be significantly affected by uncertainty and volatility in financial markets. Consequently, fair value estimates in such instances may be subject to wide variations.

GASB Statement No. 72, Fair Value Measurement and Application, addresses accounting and reporting issues related to fair value measurements. The Statement requires disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques. Comprehensive footnote disclosure regarding this Statement is presented in Note 4 - Deposits, Investments and Securities Lending Program.

Capital Assets

Capital assets include tangible capital assets and intangible right-to-use assets. Capital assets are owned by PSRS. PSRS allocates depreciation and amortization expense to PEERS for the use of capital assets. PSRS has adopted capitalization thresholds to identify whether assets are classified as capital assets or operating expenses. Intangible assets are reported with capital assets on the Statements of Fiduciary Net Position. Capital assets are depreciated and amortized on a straight-line basis over their estimated useful lives. Additional information is presented in Note 5 - Capital Assets.

Adoption of New Accounting Pronouncements

The Systems review the requirements of all new GASB pronouncements and their impact on the financial statements. For the fiscal year ended June 30, 2023, there was no material impact to the Systems' financial statements resulting from the implementation of new accounting pronouncements.

Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net position restricted for pension benefits at June 30, 2023. Actual results could differ from those estimates.

Total Columns

The financial statements include total column information for the prior year. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. generally accepted accounting principles. Accordingly, such information should be read in conjunction with both Systems' financial statements for the year ended June 30, 2022, from which the information was derived.

Note 3 - Designations of Net Position - Restricted for Pensions

The Systems designate the net position – restricted for pensions for the following specific purposes:

Public School Retirement System of Missouri

	2023
Designated for Members' Contributions (Member Reserves) – Accumulation of active and terminated member contributions plus interest.	\$ 7,894,493,273
Designated for the Payment of Benefits to Present Retirees – Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the System's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	35,759,519,266
Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) – Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the System.	5,179,095,605
Net Position – Restricted For Pensions	\$ 48,833,108,144

Public Education Employee Retirement System of Missouri

	2023
Designated for Members' Contributions (Member Reserves) – Accumulation of active and terminated member contributions plus interest.	\$ 980,641,679
Designated for the Payment of Benefits to Present Retirees – Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the System's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	4,005,832,917
Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) – Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the System.	1,416,258,564
Net Position – Restricted For Pensions	\$ 6,402,733,160

Note 4 – Deposits, Investments and Securities Lending Program

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the Systems will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Systems would not be able to recover the value of investment or collateral securities that are in the possession of an outside party. To mitigate custodial credit risk, the Systems require that all cash deposits that exceed the Federal Deposit Insurance Corporation (FDIC) insurance amounts, be 100% collateralized with securities held in the Systems' name and held by a third-party agent.

Deposits

At June 30, 2023, the PSRS carrying amount of deposits at the depository bank was \$29,335,913 and the bank balance was \$14,538,584. Of the bank balance, \$250,000 was covered by federal depository insurance. In addition, the deposits were collateralized with U.S. agency securities held by a third-party institution in the System's name, totaling \$16,366,652.

At June 30, 2023, the PEERS carrying amount of deposits at the depository bank was \$3,651,883 and the bank balance was \$1,963,258. Of the bank balance, \$250,000 was covered by federal depository insurance. In addition, the deposits were collateralized with U.S.

agency securities held by a third-party institution in the System's name, totaling \$2,987,748.

Investment Policy and Asset Allocation

Funds for both Systems that are in excess of needed operating balances are invested under policies and procedures established by the Board of Trustees. Chapter 169.040 RSMo. authorizes any investment which a prudent person acting in a like capacity and familiar with similar matters would use in the conduct of an enterprise of a like character and with like aims. Any person with fiduciary responsibility with respect to the Systems is covered by this "prudent person" rule.

The Board of Trustees of PSRS and PEERS approved the commingling of assets for purposes of investment as allowed by state statute. In order to implement this change, PSRS and PEERS adopted the Missouri Education Pension Trust Agreement. The Missouri Education Pension Trust (MEPT) is managed by the PSRS and PEERS Board of Trustees and Investment Staff. Effective July 1, 2013, the invested assets of the Systems were pooled and invested in MEPT. All assets held by MEPT are for the exclusive benefit of PSRS and PEERS. Each of the Systems has equity in MEPT based on funds contributed and earnings allocated. Earnings of MEPT are allocated based on the average daily balances of each of the respective Systems. Individual investments in MEPT are not specifically identified to the respective Systems. For financial statement presentation, MEPT assets, liabilities, revenues, and expenses have been allocated to and presented in each respective system in the basic financial statements as required by investment pools. Due to the fact all invested assets are invested in MEPT, the rate of return for each of the Systems is approximately the same.

The Systems' policy in regard to the allocation of invested assets is established and may be amended by the Board of Trustees. System assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided by the Systems. The Board of Trustees approved the use of total plan leverage in fiscal year 2020. Leverage may be utilized (through futures, swaps, or other derivative instruments) to efficiently implement portfolio rebalancing and/or to apply modest leverage to total plan assets. The total direct leverage at the fund level shall not exceed 10% of the portfolio.

Based on the results of the fiscal year 2022 Asset Allocation/Liability Study, the Board of Trustees amended the following long-term asset allocation targets: Safe Assets decreased 5% and Private Risk Assets increased 5%. Within Private Risk Assets, Private Equity increased from 16% to 21%, while within Safe Assets, U.S. Treasuries decreased from 20% to 15%.

Implementation of the amended long-term targets will be achieved over time through a disciplined investment approach. The policy benchmarks will change over time as the Systems make meaningful progress towards the new long-term targets. The following table illustrates the Systems' Board of Trustees approved asset allocation as of June 30, 2023.

	Long-term	Policy
Investment Type	Target	Ranges
Public Risk Asset Programs		
U.S. Public Equity	23.0%	15% - 45%
Public Credit	0.0%	0% - 10%
Hedged Assets	6.0%	0% - 25%
Non-U.S. Public Equity	16.0%	8% - 28%
Total Public Risk Assets	45.0%	35% - 70%
Safe Assets		
U.S. Treasuries	15.0%	0% - 40%
U.S. TIPS	0.0%	0% - 30%
Cash & Cash Equivalents	0.0%	0% - 10%
Total Safe Assets	15.0%	10% - 40%
Private Risk Asset Programs		
Private Equity	21.0%	4% - 28%
Private Real Estate	11.0%	4% - 15%
Private Credit	8.0%	0% - 12%
Total Private Risk Assets	40.0%	10% - 50%
Total Fund	100.0%	

The Systems categorize their fair value measurements within the fair value hierarchy established by U.S. generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair

value of the asset and gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The Systems have classified the fair value measurements on the following page in accordance with the Board approved asset allocation discussed above. The classifications will not directly reconcile to total investments per the Statements of Fiduciary Net Position due to the considerations of cash holdings, other liabilities and accruals.

Level 1 - Unadjusted quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and modelderived valuations in which all significant inputs are observable.

Level 3 - Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Systems' assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability. The tables on the following page show the fair value leveling of the investments for the Systems.

Short-term securities generally include investments in money market-type securities and cash equivalents reported at cost which approximates fair value.

Equities within all assets classes that are classified in Level 1 are valued using prices quoted in active markets for those securities. Equity and equity derivative securities classified in Level 2 are securities whose values are derived daily from associated traded securities. Equity securities classified in Level 3 are valued with last trade data having limited trading volume.

Fixed income securities and derivatives within all assets classes that are classified in Level 2 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields,

maturities, call features and ratings. Matrix pricing is used to value securities based on the securities relationship to benchmark quoted prices. Such securities include U.S. Treasuries, corporate and agency bonds, bank loans, and mortgage backed securities. Level 2

fixed income securities have non-proprietary information that was readily available to market participants, from multiple independent sources, which are known to be actively involved in the market.

Total investments measured at the NAV	\$ 33,080,257,822	\$ 7,870,949,200	•	

The fair values of investments in certain public equity, hedged assets, and private risk assets are based on the investments' net asset value (NAV) per share (or its equivalent) and are presented in the above table. Investments that are measured at fair value using the net asset value (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

Public Equity Investments

The public equity investments include two passive U.S. equity funds, one active U.S. equity fund, three passive non-U.S. equity funds and four active non-U.S. equity funds. The passive equity funds provide for basic market exposure with daily liquidity. The active U.S. equity funds provide active industry specific strategies within U.S. markets while the active non-U.S. equity funds provide active investment strategies in the global equity and emerging markets.

Hedged Assets

The hedged assets investment strategy provides diversification and reduced volatility to the total portfolio. The purpose of this program is to enhance the overall risk/return profile through the inclusion of specialized investment strategies that typically generate returns in a different fashion (i.e., absent a high correlation to equities or bonds).

Asset Allocation/Global Macro includes an investment in a fund with the strategy of taking long and short positions based on top-down macroeconomic analysis (i.e., interest rates, foreign exchange rates, and commodity prices). Global strategies involve long and short positions in securities of diverse geographical regions such as developed and emerging markets.

Distressed Debt/Credit includes investments in two funds which seek returns by capitalizing on opportunities in financially distressed companies' debt and credit securities.

Diversified Beta includes investments in four funds with a risk parity approach which focuses on the allocation of risk across the portfolio.

Equity Focused includes investments in seven funds with the strategy of taking long positions in attractive equity securities and potentially short positions in unattractive equity securities.

Multi-Strategy includes investments in eight funds which represent a broad style of investing that seeks diverse sources of alpha generation and positive absolute returns by employing a variety of investment strategies. Strategies utilized may include, but are not limited to, convertible bond arbitrage, equity long/short, statistical arbitrage, and merger arbitrage.

Private Risk Assets

Private risk investments are typically very long-term in nature, not publicly traded and relatively illiquid. Investments are made in limited partnerships where redemptions are restricted over the life of the partnership. During the life of the partnerships, distributions are received as underlying portfolio investments are realized.

Private Equity investments provide financing for start-up companies, private middle market companies, firms in financial distress and public and non-public firms seeking buyout financing. Private equity investments can be classified into three basic sub-asset class categories: Venture Capital, Buyouts, and Debt-Related.

Private Credit investments are comprised primarily of debt-related investments that provide a current yield along with equity participation (usually warrants). Primary strategies are distressed debt, bankruptcy restructurings, mezzanine debt, bank loans, and other credit-drive or debt-related strategies.

Real Estate investments are intended to provide exposure to a diversified portfolio of institutional quality private real estate investments that will provide meaningful, consistent returns, and act as a hedge against inflation and a diversifier to the overall investment portfolio. The real estate portfolio includes closed-end funds where distributions from each investment will be received as the underlying investments are liquidated and open-end funds which offer redemption options.

Rate of Return

For the year ended June 30, 2023, the money-weighted rate of return, net of all investment expenses and fees, was 6.1%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested. Time-weighted returns (geometric return) for the year ended June 30, 2023 net of all investment expenses and fees, was 6.2%.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the Systems' investment in a single issue. To mitigate this risk, the Systems' investment policy prohibits investing more than 5% of the total investment portfolio into any single financial institution or issuer, excluding U.S. government securities. At June 30, 2023, the Systems did not have more than 5% of total investments in a single issue except for U.S. government securities.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Systems' investment policy restricts duration as a means of managing its exposure to fair value losses arising from increased interest rates. In addition, each manager must follow guidelines established relative to the duration of its benchmark. The portfolios are continually monitored to ensure compliance with these guidelines. The following table is inclusive of collateral pledged for securities lending collateral. The maturities of all debt securities are presented below:

Security Type	Fair Value at June 30, 2023		<1 year to maturity		1 to 5 years to maturity	6 to 10 years to maturity	Over 10 years to maturity
U.S. Treasuries	\$ 7,969,825,819	\$	359,131,881	\$	3,906,066,762	\$ 1,892,139,722	\$ 1,812,487,454

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Systems do not have a single investment policy designating the minimum allowable credit rating; however, each manager must follow guidelines established specifically for its managed portfolio. The portfolios are continually monitored to ensure compliance with these guidelines. The following table is inclusive of collateral pledged for securities lending collateral. The Systems' debt investments by credit rating category as of June 30, 2023 are presented in the following table.

Security Type	Fair Value at June 30, 2023	0/0	FDIC Insured	AAA	AA	A	Not Rated
U.S. Treasuries	\$ 7,969,825,819	83%	\$ —	\$7,969,825,819	\$ —	\$ _	\$ —
Repurchase agreements	31,050	0%	_	_	_	31,050	_
Municipals	64,906	0%	_	_	64,906	_	_
Bank Deposits	1,696,547,136	18%	1,696,547,136	_	_	_	_

Currency	(47,279,789)	(1%)	_	_	_	_	(47,279,789)
Total	\$ 9,639,691,656	100%	\$1,696,547,136	\$7,969,825,819	\$20,567,440	\$ 31,050	\$(47,279,789)
Percentage of Total Fixed Income	100%		17%	83%	0%	0%	0%

Note: Commingled Funds are presented at the weighted average credit quality. These funds do not carry a rating in and of themselves; however, the underlying securities are all rated. To more accurately reflect the credit risk of the Systems, these weighted averages are displayed. Obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government are not required to be disclosed; however, we feel it shows a more true picture of our fixed income holdings.

All collateral pledged in support of the Systems' operating deposits and repurchase agreements was held in agency securities with a quality rating of AAA.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The Systems do not have a single investment policy designating the allowable exposure to foreign currency; however, each manager must follow guidelines established specifically for its managed portfolio. The portfolios are continually monitored to ensure compliance with these guidelines. The Systems' exposure to foreign currency risk as of June 30, 2023 is presented in the following table.

Currency	Equity	Currency/ Short Term	Total
Australian Dollar	\$ 90,862,446	\$ 595,016 \$	91,457,462

Derivatives

Derivatives are generally defined as investment instruments whose cash flows or fair values are derived from the value of some other asset or index. The Systems are parties to derivatives which have off-balance sheet risk. These derivative instruments are used in the normal course of business to generate earnings and reduce exposure to fluctuations in market conditions. The Systems are exposed to various types of credit, market, and legal risk related to these investments. Investment staff monitors these types of investments with extreme care and is not aware of any undue risks at this time. All derivatives are considered investments. Derivatives are reported at fair value on the Statements of Fiduciary Net Position based on quoted market prices when available. In the instances that quoted market prices are unavailable, pricing is obtained via independent pricing sources.

The fair value balances and notional amounts of derivative instruments outstanding as of June 30, 2023, classified by type are as follows:

	Fair Value at June 3	30, 2023		
Investment Derivatives	Classification		Amount	Notional
Swaps				
Total return swaps - equity	Investments, at fair value	\$	102,250,571	\$ 1,485,329,308

Total Investment Derivatives		\$	107,713,015	\$ 2,427,263,262

Swaps - The Systems' investment managers may enter into various swaps including interest rate swaps, credit default swaps, currency swaps and equity and total return swaps. Swaps represent an agreement between two parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty who, in turn, agrees to make return interest payments that float with some reference rate. A credit default swap is a contract whereby the credit risk associated with an investment is transferred by entering into an agreement with another party, who in exchange for periodic fees, agrees to make payments in the event of a default or other predetermined credit event. A currency swap is a foreign exchange transaction that involves trading principal and interest in one currency for the same in another currency. A total return swap is a contract in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of the underlying asset. The underlying asset is typically an index, bond, etc. Gains and losses on swaps are determined based on fair values and are recorded in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. Net gains on swaps of \$258.9 million were recognized for the fiscal year ended June 30, 2023.

Futures - Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the Systems' credit risk. The net change in the value of futures contracts is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems recognized net gains on futures contracts of \$106.4 million during the fiscal year ended June 30, 2023.

Options - Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the Systems' investment managers receive a premium at the outset of the agreement and bear the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the Systems' investment managers pay a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option. Net gains or losses resulting from such obligations are included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems had no option activity during the fiscal year ended June 30, 2023.

Currency forwards - Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency rates on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net appreciation (depreciation) in fair value of investments on the Systems' Statements of Changes in Fiduciary Net Position. The Systems recognized net losses on such contracts of \$5.4 million during the fiscal year ended June 30, 2023.

Derivative Risk - Derivatives that are exchange traded are not subject to credit risk. No derivatives held are subject to custodial credit risk.

The Systems are exposed to interest rate risk on their interest rate swaps. As the variable portion of the swaps move in the market, the Systems' exposure increases and decreases. The Systems are exposed to termination risk. The Systems' investment managers or their counterparties may terminate a derivative if either party fails to perform under the terms of the contract.

The Systems' derivatives are governed by ISDA Master Agreements between the Systems and the Counterparties. These agreements set forth collateral requirements and applicable netting arrangements. Foreign currency risks are reflected on page 43.

The Systems could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. The Systems' investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. The Systems anticipate that the counterparties will be able to satisfy their obligations under the contracts.

The derivative financial instruments discussed involve, to varying degrees, elements of market risk to the extent of future market movements in excess of the amounts recognized in the Statements of Fiduciary Net Position. Market risk arises from the potential unfavorable change in the value of the underlying instruments. The contract or notional amounts of these instruments reflect the extent of the Systems' involvement in each class of financial instrument; however, these amounts do not represent the exposure to market loss. Additional derivatives may be held in limited partnerships and commingled funds that are not reflected below.

At June 30, 2023 the counterparties' credit ratings for currency forwards and swaps are subject to credit risk as shown below:

Derivative Counterparty Credit Ratings									
Quality Rating		Swaps	I	Forwards		Total			
A	\$	102,250,571	\$	5,462,444	\$	107,713,015			
Total subject to credit risk	\$	102,250,571	\$	5,462,444	\$	107,713,015			

Security Lending Activity

Under the "prudent person" authority of the governing statutes and in accordance with the policies set by the Board of Trustees, the Systems can lend securities to broker-dealers and banks pursuant to a form of loan agreement. The Systems' custodial bank is authorized to act as the Systems' agent to lend available securities to approved broker-dealers and banks subject to the receipt of acceptable collateral.

During the fiscal year, the Systems made a strategic decision to cease securities lending activity. All material activity in the program was completed by June 30, 2023. The Systems retain the ability to engage in securities lending activity in the future.

During the fiscal year, the Systems' custodial bank lent, on behalf of the Systems, securities to participating broker-dealers. The broker-dealers must provide collateral in the form of cash. The Systems did not impose restrictions during the fiscal year on the amount of loans that the custodial bank made on their behalf, however the decision to cease securities lending in the current year did impact activity. Borrowers were required to deliver collateral for each loan equal to: (1) in the case of loaned securities denominated in U.S. dollars or whose primary trading market was located in the United States, or sovereign debt issued by foreign governments, 102% of the fair value of the loaned securities and (2) in the case of loaned securities not denominated in U.S. dollars or whose primary trading market was not located in the United States, 105% of the fair value of the loaned securities.

Pursuant to the lending agreement, the custodial bank has an obligation to provide a form of indemnification to the Systems in the event of default by a borrower. There were no violations of the contractual provisions nor were there any borrower or lending agent default losses during the fiscal year.

The fair value of securities on loan as of June 30, 2023 was \$28,980. On June 30, 2023 the Systems had no credit risk exposure to borrowers as the cash and securities collateral amounts received exceeded amounts on loan. Loans are generally terminable on demand. However, with the prior approval of the Systems, loans

could be made on the basis of a specified termination date, with or without providing for the right of the Systems to terminate or substitute equivalent securities. As of June 30, 2023, there were no term loans.

Cash collateral is invested in separately managed accounts in accordance with the investment guidelines approved by the Systems. The primary investment objective is the preservation of principal. As of June 30, 2023, the cost basis of the invested cash collateral totaled \$31,050 and the estimated fair value totaled \$31,050.

The Systems recognized net depreciation of \$17,744 for the year ended June 30, 2023 on the invested collateral account. Such is reported as net appreciation (depreciation) in fair value of security lending collateral on the Statements of Changes in Fiduciary Net Position.

The weighted average duration of invested collateral as of June 30, 2023 was 3 days and equal to the average final maturity.

Note 5 - Capital Assets

Capital assets include tangible capital assets and intangible right-to-use assets. Capital assets are owned by PSRS. PSRS allocates depreciation and amortization expense to PEERS for the use of capital assets. PSRS has adopted capitalization thresholds used to identify whether assets are classified as capital assets or operating expenses.

Tangible capital assets are recorded at cost less depreciation accumulated since acquisition. The stated value does not purport to represent replacement or realized value. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation for tangible capital assets is calculated using the straight-line method, with estimated lives ranging from three to 40 years in the following major categories: computers and software, three years; vehicles, five years; equipment, five years; furniture and fixtures, seven years; building and land improvements, 15 years; pension administration system, 20 years; building, 40 years.

Intangible capital assets are recorded under GASB No. 87 *Leases*, and GASB No 96, *SBITAs*. The Systems signed a new building lease during the current fiscal year that is recorded as an intangible capital asset. The Systems reviewed all possible SBITAs and determined no SBITAs existed that met the required capitalization threshold.

The intangible right-to-use assets and the related lease liabilities are recorded at the commencement date of the related contract. The lease liability, included on the Statements of Fiduciary Net Position, is measured at the present value of expected payments over the contract term. The intangible right-to-use assets are based on the initial measurement of the liability, plus any payments made to the vendor at or before the commencement of the contract term. Intangible right-to-use assets are amortized over the shorter of the term of the contract or the useful life of the underlying asset. Interest expense is recognized ratably over the contract term.

The table below is a schedule of the capital assets account balances of June 30, 2022 and 2023, with changes to those account balances during the year ended June 30, 2023. Depreciation and amortization expense are allocated to investment or administrative expenses depending on the primary use of the capital asset. The right-to-use asset is an Investment Department capital asset.

PEERS	\$	7,401,637,172	\$	6,402,733,160	\$	998,904,012	86.5%	\$ 2,037,530,583	49.0%

Actuarial Assumptions – Actuarial valuations of the Systems involve estimates of the reported amount and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience for the Systems, derived from experience studies conducted every fifth year. The most recent comprehensive experience studies were completed in May 2021. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the studies and were effective with the June 30, 2021 valuations. Due to the passage of Senate Bill 75, selected PSRS retirement rate assumptions were amended at the October 30, 2023 Board meeting for the June 30, 2023 PSRS valuation. There were no other assumption changes for PSRS and no assumption changes for PEERS. The next experience studies are scheduled to be completed prior to the June 30, 2026 valuations.

The Schedules of Employer's Net Pension Liability presents multi-year trend information about whether the plan net positions are increasing or decreasing over time relative to the total pension liability. These schedules are presented in the required supplementary information following the notes to the financial statements. The total pension liability was determined by an actuarial valuation as of June 30, 2023. A summary of the significant actuarial assumptions as of June 30, 2023 are shown on the following pages.

Sensitivity of Net Pension Liability

The sensitivity of the net pension liability of employers to changes in the discount rate is presented below. The net pension liability of employers calculated using the discount rate of 7.3% is presented as well as what the employers' net pension liability would be using a discount rate that is 1.0% lower (6.3%) or 1.0% higher (8.3%) than the current rate.

		1% Decrease (6.3%)	Current Rate (7.3%)	1% Increase (8.3%)
PSRS	Net Pension Liability	\$ 15,559,104,792	\$ 8,360,522,958	\$ 2,399,709,372
PEERS	Net Pension Liability	\$ 1,896,393,220	\$ 998,904,012	\$ 250,248,018

Return

Inflation 2.00%

Total Payroll Growth

PSRS 2.25% per annum, consisting of 2.00% inflation, 0.125% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.125% of real wage growth.

PEERS 2.50% per annum, consisting of 2.00% inflation, 0.25% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.25% of real wage growth.

Individual Salary Growth

PSRS 2.625% - 8.875%, depending on service and including 2.00% inflation, 0.125% additional inflation due to the inclusion

of health care costs in pension earnings, 0.125% of real wage growth for productivity, and real wage growth for merit.

3.25% - 9.75%, depending on service and including 2.00% inflation, 0.25% additional inflation due to the inclusion of health care costs in pension earnings, 0.25% of real wage growth for productivity, and real wage growth for merit.

Cost-of-Living Increases

PEERS

Given that the actual increase in the CPI-U index from June 2022 to June 2023 was 2.97%, the Board approved an actual cost-of-living adjustment ("COLA") as of January 1, 2024 of 2.00%, in accordance with the Board's funding policy and Missouri statutes, compared to an assumed COLA of 2.00%. Future COLAs assumed in the valuation are 1.35% as of January 1. This COLA assumption is based on the 20-year stochastic analysis of inflation performed in the 2021 experience study, short-term expectation of COLA at the time of the experience study, and application of the Board's funding policy to those expectations. The assumption was re-evaluated for the June 30, 2022 valuations in light of the current inflationary environment, short- and long-term inflation assumptions reflected in the capital market forecasts from various investment advisors and analysts, and volatility of capital market assumptions in recent years. Based on this information, no change was made to the COLA assumption for the June 30, 2022 valuations. At June 30, 2023, the assumption was again revisited and given the current inflationary environment, and the current policy of the Board, no changes were made to the assumption for the current year. Additional information is included in the *Actuarial Section* of this report.

The COLA is compounded annually, beginning on the second January after retirement for PSRS and capped at an 80% lifetime increase.

The COLA is compounded annually, beginning on the fourth January after retirement for PEERS and capped at an 80% lifetime increase.

Retirement Rates

Detailed PSRS and PEERS retirement rate assumptions are included in the *Actuary Section* of this report. The PSRS service retirement rates were updated to reflect the impacts of Senate Bill 75 and the assumption that a segment of the population will retire later to receive the 2.55% formula factor after 32 years of service.

Mortality Assumption

Actives:

PEERS

PSRS Experience-adjusted Pub-2010 Teachers Mortality Table for Employees projected from 2010 to 2018 using the

MP-2020 improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males and females, with generational improvement after 2018 using the MP-2020 improvement scale.

Experience-adjusted Pub-2010 General (Below-Median Income) Mortality Table for Employees projected from 2010

to 2018 using the MP-2020 improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males and females, with generational improvement after 2018 using the MP-2020

improvement scale.

Non-Disabled Retirees, Beneficiaries and Survivors:

PSRS Mortality rates for non-disabled retirees and beneficiaries are based on the Pub-2010 Teachers Mortality Table for

Healthy Retirees and the Pub-2010 Teachers Mortality Table for Contingent Survivors, respectively. The tables are projected from 2010 to 2018 using the MP-2020 improvement scale and multiplied by the experience-based adjustment factors shown in the tables below at all ages for both males and females, with generational improvement after 2018

using the MP-2020 improvement scale.

	Males	Females

Long-Term Expected Rate of Return

The long-term expected rate of return on investments was determined in accordance with Actuarial Standard of Practice (ASOP) No. 27, Selection of Economic Assumptions for Measuring Pension Obligations. ASOP No. 27 provides guidance on the selection of an appropriate assumed rate of return. The long-term expected rate of return on the Systems' investments was determined using a building-block method in which best-estimate ranges of expected future real rates of returns (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return and the assumed asset allocation for each major asset class as of June 30, 2023 are summarized below.

Asset Class	Target Asset Allocation	Long-Term Expected Real Return Arithmetic Basis
U.S. Public Equity	23.0 %	4.81 %
Public Credit	0.0 %	0.80 %
Hedged Assets	6.0 %	2.39 %
Non-U.S. Public Equity	16.0 %	6.88 %
U.S. Treasuries	15.0 %	-0.02 %
U.S. TIPS	0.0 %	0.29 %
Private Credit	8.0 %	5.61 %
Private Equity	21.0 %	10.90 %
Private Real Estate	11.0 %	7.47 %

The long-term expected rate of return used to measure the total pension liability was 7.3% as of June 30, 2023 and is consistent with the long-term expected geometric return on plan investments. The projection of cash flows used to determine the discount rate assumed that employer contributions would be made at the actuarially calculated rate computed in accordance with assumptions and methods stated in the funding policy adopted by the Board of Trustees, which requires payment of the normal cost and amortization of the unfunded actuarially accrued liability in level percent of employee payroll installments over 30 years utilizing a closed period, layered approach. Based on this assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

Note 7 – Retirement Plans

Section 401(a) Defined Benefit Plan

All full-time System employees holding valid Missouri educator certificates are covered by PSRS. All other eligible employees are members of PEERS. Both Systems provide retirement and disability benefits, annual cost-of-living adjustments and death benefits to plan members and beneficiaries. Chapter 169 RSMo contains the statutory provisions of both Systems.

PSRS members were required to contribute 14.5% of their annual covered salary during fiscal years 2023, 2022, and 2021. PSRS, as the employer, was required to match that amount. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions set in Section 169.030 RSMo. Employer contributions to PSRS totaled \$146,545 for the 2023 fiscal year, \$129,254 for the 2022 fiscal year and \$107,209 for the 2021 fiscal year. The amounts for these years are equal to the required contributions. PEERS members were required to contribute 6.86% of their annual covered salary during fiscal years 2023, 2022 and 2021. PSRS, as the employer, was required to match that amount. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. Employer contributions to PEERS totaled \$1,058,176 for the 2023 fiscal year, \$900,225 for the 2022 fiscal year, and \$866,145 for the 2021 fiscal year. The amounts for these years are equal to the required contributions.

PSRS and PEERS, as the administrators for the defined benefit pension plans, are also a participating employer of the Systems. The administrative expenses of the Systems are included in the deductions to the Systems' fiduciary net position. While the employer contributions of the other participating employers are funded from outside revenue sources, the employer contributions of PSRS and PEERS are funded from sources already recognized as revenues - earnings on plan investments. Attempting to allocate a portion of the net pension liability to PSRS would result in an allocation of the net pension liability to the other participating employers.

Accordingly, PSRS will exclude its contributions from the employer proportionate share calculation for the reporting of a net pension liability, by assigning itself a proportionate share of 0%.

Section 457 Deferred Compensation Plans

A voluntary Section 457 deferred compensation plan is administered to provide additional retirement benefits for employees. The plan provides for employer-matching contributions up to a set maximum. The total contributions are subject to the limitations established in IRC Section 457. The Board of Trustees has authority to establish the employer contribution levels. For most employees, the System will match \$50 plus 0.52% of salary per month. For certain employees, the System will make employer-paid contributions equal to annual limitations established in IRC Section 457, if eligible. This is governed by individual employment contracts.

All employees immediately vest in the employer-matching and employer-paid contributions. Employer-matching contributions totaled \$153,323 and employer-paid contributions totaled \$74,250 for the 2023 fiscal year. Employee contributions totaled \$649,252 for the 2023 fiscal year. Employer-matching contributions totaled \$129,717 and employer-paid contributions totaled \$66,500 for the 2022 fiscal year. Employee contributions totaled \$619,524 for the 2022 fiscal year.

Maintenance of individual member accounts and custody of assets have been contracted to a third-party administrator and investment custodian. Total contributions are sent directly to the third-party administrator by the employer. Employees can self-direct investments of their contributions and their respective share of matching contributions in a number of investment options. Because the System does not hold the plan's assets and does not have significant administrative responsibilities, the plan's assets and changes in net position are not reported in the Systems' financial statements.

The Systems established an unfunded Section 457(f) non-qualified deferred compensation plan for certain employees. The plan is subject to Internal Revenue Code section 457(f), and to the extent applicable, Internal Revenue Code section 409A. Employees approved for participation in the plan by the Systems' Board of Trustees may acquire a vested interest in a deferred compensation award which is credited to the account of the member under terms approved by the Board of Trustees. The value of the member's account shall be subject to a risk of forfeiture based on the applicable vesting schedule determined for the member. As of June 30, 2023, employees had a vested interest under the plan of \$672,029 and disbursements of \$150,864 were made from the plan for the year then ended.

Section 401(a) Defined Contribution Plan

The Systems established a 401(a) defined contribution plan for certain employees. The employees are approved for participation in the plan by the Systems' Board of Trustees. The plan is a tax qualified plan under Section 401(a) of the Internal Revenue Code and all contributions by or on behalf of employees are tax deferred until time of withdrawal. All employees immediately vest in employer-paid contributions. Employer-paid contributions totaled \$122,000 for the 2023 fiscal year.

Maintenance of individual member accounts and custody of assets have been contracted to a third-party administrator and investment custodian. Total contributions are sent directly to the third-party administrator by the employer. Employees can self-direct investments of their contributions in a number of investment options. Because the System does not hold the plan's assets and does not have significant administrative responsibilities, the plan's assets and changes in net position are not reported in the Systems' financial statements.

Note 8 – Other Post-Employment Benefit Plans

Post-Employment Staff Retiree Healthcare Plan

Plan Description, Funding Policy and Benefits **Provided** – The Public School Retirement System of Missouri Staff Retiree Healthcare Program (SRHP) is a single-employer defined benefit other post-employment benefit (OPEB) plan administered by PSRS. SRHP is administered as required by RSMo 169.590. SRHP provides a healthcare premium implicit rate subsidy to eligible staff retirees and their dependents provided they pay 100% of the blended healthcare premium. The blended healthcare premium is based on all active and retired employees. Retiree healthcare benefits are funded on a pay-as-you-go basis, with premiums determined annually. Therefore, no formal trust has been established for the SRHP. The PSRS/PEERS Board of Trustees determines the funding of benefits and any benefit amendments. There is no continuing obligation to provide benefits beyond each calendar year. SRHP does not issue a stand-alone public financial report.

Employees covered by benefit terms:

Retirees and spouses of retirees receiving benefits	14
Active employees	153
Total	167

OPEB Liability – The components of the net OPEB Liability of the SRHP as of June 30, 2023 are as follows:

Total OPEB Liability - Beginning of the year	\$ 2,996,971
Service Costs	120,275
Interest Costs	115,648
Experiences (gains) losses	37,982
Assumption changes	2,229
Plan amendments	_
Benefit payments	(17,008)
Total OPEB Liability - End of year	\$ 3,256,097
OPEB Plan Fiduciary Net Position	\$ _
Net OPEB Liability	\$ 3,256,097

OPEB Expense – The components of the OPEB expense for the year ended June 30, 2023 are as follows:

Service Costs	\$ 120,275
Plan Amendments	_
Interest Costs	115,648
Recognition of deferred (inflows) outflows of	
resources related to:	
Liability experiences (gains) losses	14,691
Assumption changes (gains) losses	(204,513)
Total Recognition of deferred (inflows)	
outflows of resources	(189,822)
Total collective OPEB expense recognized	\$ 46,101

Actuarial Method and Assumptions – The total OPEB liability was determined by an actuarial valuation as of June 30, 2023. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial assumptions and methods used in the valuation are based on prior plan experience and industry trends. The nature of the plan design and overall plan size does not allow for full scale periodic experience studies; therefore, such a study has not been conducted. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and healthcare cost trends. Amounts determined regarding the total OPEB liability and expense are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

In the June 30, 2023 actuarial valuation, the following actuarial assumptions and methods were used:

Post-Employment Health Plan

Measurement date	June 30, 2023
Valuation date	June 30, 2023
Actuarial cost method	Entry Age Normal
Actuarial value of assets	No Assets (pay-as-you-go)
Amortization method	Level Percent Open
Discount rate	3.68% per year effective June 30, 2023
	3.72% per year effective June 30, 2022
Wage inflation	2.50% per year
Healthcare trend rate	5.75% for fiscal year 2024, decreasing by one-quarter percentage point per year down to 4.75% in 2028, decreasing to 4.60% in 2029, and decreasing to an ultimate rate of 4.50% in 2030 and thereafter.
Mortality	
Active members	Based on Experience-adjusted Pub-2010 Mortality Tables with generational projections using the MP-2020 Improvement Scale.
Disabled and Non-	Based on Experience-adjusted Pub-2010 Mortality Tables with generational projections using the MP-2020
disabled retirees and	Improvement Scale.
beneficiaries	

Discount Rate - GASB Statement No. 75 requires plans not administered through a trust to utilize the yield or index rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher. The Systems utilized the U.S. General Obligation AA Municipal Bond Yield Curve for 20 years for the June 30, 2023 and 2022 valuations. The June 30, 2023 rate was 3.68% and the June 30, 2022 rate utilized was 3.72%. The movement in the yield on the 20 Year U.S. General Obligation AA Municipal Bond is considered an assumption change for reporting purposes.

Deferred Inflows and Outflows of Resources - As of June 30, 2023, the Systems reported deferred outflows of resources and deferred inflows of resources from the following sources related to the SRHP:

		Deferred Inflows of Resources		
-				
\$	215,905	\$	_	
	_		1,391,938	
\$	215,905	\$	1,391,938	
		<u> </u>	of Resources 0: \$ 215,905 \$	

Amounts reported as collective deferred (inflows) /outflows of resources are to be recognized in pension expense as follows:

Year Ending June 30:		
2024	\$ 189,822	
2025	189,822	
2026	189,822	
2027	178,095	
2028	172,718	
Thereafter	 255,754	
	\$ 1,176,033	

Sensitivity of the net OPEB liability to changes in the discount rate and health care cost trend rate – The following table presents the sensitivity of the net OPEB liability to changes in the discount rate. The net OPEB liability calculated using the discount rate of 3.68% is presented as well as what the net OPEB liability would be using a discount rate that is 1.0% lower (2.68%) or 1.0% higher (4.68%) than the current rate.

Discount Rate Sensitivity											
	1% Decrease	Current Rate	1% Increase								
	(2.68%)	(3.68%)	(4.68%)								
Net OPEB Liability	\$ 3,616,816	\$ 3,256,097	\$ 2,932,983								

The following table presents the sensitivity of the net OPEB liability to changes in the healthcare trend rate. The net OPEB liability calculated using the healthcare trend rate of 5.75% is presented as well as what the net OPEB liability would be using a healthcare trend rate that is 1.0% lower (4.75)% or 1.0% higher (6.75)% than the current rate.

Trend Rate Sensitivity											
	1% Decrease	Current Rate	1% Increase								
	(4.75)%	(5.75)%	(6.75)%								
Net OPEB Liability	\$ 2,866,053	\$ 3,256,097	\$ 3,716,413								

PSRS maintains a Post-Employment Health Plan ("PEHP") for employees. Upon termination, an employee will receive payment at the rate of one day of pay for each two days of accrued sick leave up to 100 days of accrued sick leave (50 days paid). Any days above 100 will be forfeited. All payments under the PEHP in excess of \$1,000 will be transferred into a PEHP account which can be used to pay health insurance premiums for the employee or dependent at any time in the future. If an employee is retiring, the payments can be transferred back to PSRS on a monthly basis to cover the cost of health insurance for the retiree. The amount paid into the PEHP was \$59,664 for five employees during 2023.

Note 9 - Risk Management

The Systems are exposed to various risks of loss related to natural disasters, errors and omissions, loss of assets, torts, etc. The Systems have chosen to cover such losses through the purchase of commercial insurance. There have been no material insurance claims filed or paid during the past three years.

The Systems have a disaster recovery plan that provides for continued computer operations at a remote location should the retirement office be unavailable for normal operations.

Note 10 - Commitments and Contingencies

Commitments to the future purchase of investments at June 30, 2023 totaled \$1,406,200,448.

Total unfunded capital commitments to private real estate, private equity and other alternative investments totaled approximately \$7.9 billion as of June 30, 2023. The unfunded commitments are not recorded in the Statements of Fiduciary Net Position.

Certain legal proceedings are pending with PSRS and PEERS arising from normal activities. Although unable to predict the outcome of these matters, the Systems believe the final outcome of these actions will not have a material adverse effect on the Systems' financial statements.

This page has intentionally been left blank.

Notes to the Schedules of Required Supplementary Information

The information presented in the required supplementary schedule was determined as part of the actuarial valuation at the date indicated. Additional information as of the latest actuarial valuation follows.

Changes of assumptions

During fiscal year 2021, comprehensive experience studies were conducted. All economic and demographic assumptions were reviewed and updated where appropriate based on the results of the studies and were effective with the June 30, 2021 valuations. As part of the studies, the payroll growth, salary increases and mortality rates were adjusted to more closely reflect actual experience. The investment rate of return was reduced from 7.5% to 7.3% and the inflation rate was adjusted to 2.0% from 2.25%. The adjustment in inflation also resulted in an adjustment to the COLA assumptions. Due to the passage of Senate Bill 75, selected PSRS retirement rates were amended at the October 30, 2023 Board meeting for the June 30, 2023 valuation. There were no other assumption changes for PSRS and no assumption changes for PEERS. Additional information is included in the *Actuarial Section* of this report.

Actuarial Methods and Assumptions:

The actuarially determined contribution rates in the schedule of employers' contributions are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine contribution rates reported in the schedule.

Actuarial Cost Method Entry

Entry Age Normal Level Percent of Payroll

Amortization Method

Remaining amortization period

PSRS 19.0 years
PEERS 19.8 years

Asset valuation method 5-year smoothing of actual returns above or below expected returns

Closed, level percent for 30 years

Measurement DateJune 30, 2023Valuation DateJune 30, 2023Investment Rate of Return7.30%

Inflation 2.00%

Total Payroll Growth

PSRS 2.25% per annum, consisting of 2.00% inflation, 0.125% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.125% of real wage growth.

PEERS 2.50% per annum, consisting of 2.00% inflation, 0.25% additional inflation due to the inclusion of health care costs in

pension earnings, and 0.25% of real wage growth.

Individual Salary Growth

PSRS 2.625% - 8.875%, depending on service and including 2.00% inflation, 0.125% additional inflation due to the inclusion of

health care costs in pension earnings, 0.125% of real wage growth for productivity, and real wage growth for merit.

PEERS 3.25% - 9.75%, depending on service and including 2.00% inflation, 0.25% additional inflation due to the inclusion of

health care costs in pension earnings, 0.25% of real wage growth for productivity, and real wage growth for merit.

Cost-of-Living Increases

Given that the actual increase in the CPI-U index from June 2022 to June 2023 was 2.97%, the Board approved an actual cost-of-living adjustment ("COLA") as of January 1, 2024 of 2.00%, in accordance with the Board's funding policy and Missouri statutes, compared to an assumed COLA of 2.00%. Future COLAs assumed in the valuation are 1.35% as of January 1. This COLA assumption is based on the 20-year stochastic analysis of inflation performed in the 2021 experience study, short-term expectation of COLA at the time of the experience study, and application of the Board's funding policy to those expectations. The assumption was re-evaluated for the June 30, 2022 valuations in light of the current inflationary environment, short- and long-term inflation assumptions reflected in the capital market forecasts from various investment advisors and analysts, and volatility of capital market assumptions in recent years. Based on this information, no change was made to the COLA assumption for the June 30, 2022 valuations. At June 30, 2023, the assumption was again revisited and given the current inflationary environment, and the current policy of the Board, no changes were made to the assumption for the current year. Additional information is included in the Actuarial Section of this report.

The COLA is compounded annually, beginning on the second January after retirement for PSRS and capped at an 80% lifetime increase.

The COLA is compounded annually, beginning on the fourth January after retirement for PEERS and capped at an 80% lifetime increase.

Notes to the Schedules of Required Supplementary Information - Continued

Measurement DateJune 30, 2023Valuation DateJune 30, 2023

Retirement Rates

Detailed PSRS and PEERS retirement rate assumptions are included in the Actuary Section of this report. The PSRS service retirement rates were updated to reflect the impacts of Senate Bill 75 and the assumption that a segment of the population will retire later to receive the 2.55% formula factor after 32 years of service.

Mortality Assumption

Actives:

PSRS Experience-adjusted Pub-2010 Teachers Mortality Table for Employees projected from 2010 to 2018 using the MP-2020

improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males

and females, with generational improvement after 2018 using the MP-2020 improvement scale.

PEERS Experience-adjusted Pub-2010 General (Below-Median Income) Mortality Table for Employees projected from 2010 to

2018 using the MP-2020 improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males and females, with generational improvement after 2018 using the MP-2020 improvement scale.

Non-Disabled Retirees, Beneficiaries and Survivors:

PSRS Mortality rates for non-disabled retirees and beneficiaries are based on the Pub-2010 Teachers Mortality Table for

Healthy Retirees and the Pub-2010 Teachers Mortality Table for Contingent Survivors, respectively. The tables are projected from 2010 to 2018 using the MP-2020 improvement scale and multiplied by the experience-based adjustment factors shown in the tables below at all ages for both males and females, with generational improvement after 2018 using

the MP-2020 improvement scale.

 Males
 Females

 Non-Disabled
 1.10
 1.04

 Contingent
 1.18
 1.07

PEERS Mortality rates for non-disabled retirees and beneficiaries are based on the Pub-2010 General (Below-Median Income)

Mortality Table for Healthy Retirees and the Pub-2010 General (Below-Median Income) Mortality Table for Contingent Survivors, respectively. The tables are projected from 2010 to 2018 using the MP-2020 improvement scale and multiplied by the experience-based adjustment factors shown in the tables below at all ages for both males and females, with

generational improvement after 2018 using the MP-2020 improvement scale.

	Males	Females
Non-Disabled	1.13	0.94
Contingent	1.01	1.07

Disabled Retirees

PSRS Experience-adjusted Pub-2010 Teacher Disability Mortality Table, projected from 2010 to 2018 using the MP-2020

improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males

and females, with generational improvement after 2018 using the MP-2020 improvement scale.

PEERS Experience-adjusted Pub-2010 General Disability Mortality Table projected from 2010 to 2018 using the MP-2020

improvement scale and multiplied by the healthy retiree experience-based adjustment factors at all ages for both males

and females, with generational improvement after 2018 using the MP-2020 improvement scale.

Letter from Russell Investments

November 21, 2023

To the Members of the Board:

Fiscal year 2023 continued the financial market and political extremes of 2022. In fiscal year 2023, the Systems encountered strong equity markets, rising interest rates, continued war in Ukraine, and, thankfully, a moderation in the rise in inflation.

Today, investors look ahead to see how higher interest rates affect both the equity and bond markets. In the near term we think it bodes well for the likelihood that the Systems will achieve the actuarial assumed rate of return.

For fiscal year ended June 30, 2023, the Systems earned an investment return of 6.2%, net of all fees and expenses, and ranked in the 74th percentile for U.S. Public Plan peers with assets greater than \$1 billion. The fiscal year 2023 investment return underperformed the policy benchmark return of 9.3%. This was a year that demonstrated the impact of diversification, specifically the impact of the timing lag for private versus public market assets. While the PSRS/PEERS's investment return from alternative asset classes detracted from the one-year number, the two-year number for annualized return is in the top third of peers. While last year was a year where Public Equity beta and Public Bond beta had a negative impact on trailing 1-year total returns, this year, the opposite occurred, with Public Equity delivering a strong 17.6%.

The new asset allocation, adopted in April 2022 has served the Systems' members well, meeting this period of heightened volatility with resilience, allowing the Systems to invest for the long horizon. This long horizon view was further strengthened by the establishment of an investment staff presence in a new St. Louis office, adding to an already best in class investment staff.

Lastly, we at Russell have enjoyed engaging with Missouri PSRS/PEERS, and as always are looking forward to the coming year and the capital market path that unfolds.

Sincerely,

Michael Hall Managing Director

Letter from the Chief Investment Officer

December 1, 2023

To the Members of the Systems:

On behalf of the PSRS and PEERS Board of Trustees and the internal investment staff, I present the following report on the Systems' investments for the fiscal year ended June 30, 2023. The theme for this year's Financial Report is *Adapt*, which is also a key term in the financial markets. The PSRS/PEERS Board of Trustees and investment staff have adapted over the last decade by embracing asset allocation changes that improved the long-term investment performance for the Systems.

The investment backdrop for fiscal year 2023 was marked by rising interest rates, elevated inflation, banking failures, escalating China-U.S. tensions, the continued Ukraine/Russian war and AI-related advances. The Systems' investment in global stocks supported the fiscal year 2023 total fund performance while diversification into other asset classes provided mixed results. For example, bonds produced negative returns for the third consecutive year, and real estate was re-priced lower. The PSRS and PEERS investment return was 6.4% (or 6.2% net of all fees and expenses) for fiscal year 2023.

Key Points within this year's Financial Report

As you review the financial information in this report for the fiscal year ended June 30, 2023, it is important to be aware of the following points:

- The PSRS and PEERS investment returns for the last five and ten years, exceeded 74% of the peer group as defined by the Wilshire TUCS universe of public pension plans with assets in excess of \$1 billion.
- The Systems have generated the investment returns while taking less risk (as measured by standard deviation) than the policy benchmark¹ and less risk than two-thirds of comparable public funds over all time periods.
- The PSRS and PEERS internal investment staff and external investment managers added value above the policy benchmark of almost \$7.0 billion net of all fees and expenses over the last 10 years. This outperformance was due to portfolio construction by internal Investment Staff as well as active management on the part of external managers.
- The PSRS and PEERS investment returns for the last 10-year time period exceeded the return of a passive
 portfolio of 60% global stocks and 40% bonds by 2.2% per year, resulting in added value above a traditional
 portfolio of \$11.9 billion.
- The investment returns reported throughout this publication are mostly net of investment fees and expenses. The investment return net of all fees and expenses was 6.2% for PSRS and PEERS.
- Investment performance throughout this report is calculated using a time-weighted rate of return based on fair values.
- The total invested assets of both PSRS and PEERS were \$55 billion on June 30, 2023, making the combined entity larger than all other public retirement plans in the State of Missouri combined, and the 44th largest defined benefit plan in the United States.

¹The plan policy benchmark is a standard to measure investment performance and indicates the return of the PSRS/PEERS asset allocation if passive market rates of return were achieved.

Fiscal Year 2023 Year in Review

The internal investment staff, under the direction of the PSRS and PEERS Board of Trustees, has adopted a disciplined and diversified investment portfolio that includes allocations to multiple asset classes. Over time, each specific asset class within the PSRS and PEERS' investment portfolio performs a valuable function.

Investments in publicly traded stocks produced substantial returns in fiscal year 2023. U.S. stocks returned 19.0% for the fiscal year ended June 30, 2023 (as measured by the Russell 3000 Index), non-U.S. developed stocks moved 18.8% higher (as measured by the MSCI EAFE Index), and emerging market stocks increased 1.8% (as measured by the MSCI Emerging Markets Index). Interest rates continued to significantly increase as the yield on the 10-year Treasury note moved from 3.01% at the beginning of the fiscal year to 3.81% on June 30, 2023. This increase in yield contributed to negative absolute returns for bonds as the Bloomberg U.S. Treasury Index declined -2.1% in fiscal year 2023.

The PSRS and PEERS non-traditional asset classes (private equity, private credit, private real estate and hedged assets) provided mixed support to the overall investment return in fiscal year 2023. The Real Estate portfolio was written down in fiscal year 2023 (-6.1% return) after generating a return of almost 30% in fiscal year 2022. Real estate experienced historically good performance in the post COVID-19 (highly inflationary) environment but declined in the current year due to waning demand and higher interest rates. The Private Equity portfolio was essentially flat (return of -0.7%) after multiple years of double-digit positive performance. The Hedged Asset program produced a low return (+2.5%) in fiscal year 2023 but offered substantial diversification benefits to other parts of the portfolio. Finally, the Private Credit portfolio continued to produce very consistent returns in a volatile market, producing a strong absolute return of 9.3% for the year.

The PSRS and PEERS investment return was enhanced by excess return (alpha) in a few asset classes. The alpha was a direct result of effective implementation through both security selection and portfolio construction. For example, the Systems' Real Estate portfolio² and Non-U.S. Equity portfolio³ outperformed their assigned benchmarks by 4.6% and 3.2%, respectively, in fiscal year 2023. From a tactical standpoint, the internal investment staff maintained an overweight to both U.S. and non-U.S. equity throughout the year. Additionally, the Systems were overweight to cash due to rising interest rates. The overweight to stocks and cash were additive to total portfolio performance for the year.

Fiscal Year 2024 Portfolio Strategy

The PSRS/PEERS asset allocation will always be balanced with a significant investment in return-seeking assets such as stocks and private equity but also a healthy allocation to more defensive investments such as Treasury securities, cash and hedged assets. In fiscal year 2024, the Systems' Private Risk Assets composite will remain a focus for the investment staff.

PSRS/PEERS began building a private investment platform almost twenty years ago to generate long-term returns superior to the public markets, to take advantage of market inefficiencies, and to increase diversification. The Systems' expectations have been met over the long-term as the PSRS/PEERS private equity and private credit portfolios have produced returns substantially in excess of public market returns. Furthermore, the PSRS and PEERS allocation to private real estate has provided consistent income that offers a premium over traditional fixed income investments. The nature of private investing requires a process of portfolio construction that takes years to develop. This is particularly true for a plan with the substantial assets of PSRS/PEERS. Over the years, the Systems have continued to build on this successful investment platform that serves as an alternative to traditional public markets. At the close of fiscal year 2023, the Systems had over \$18.0 billion invested in Private Risk Assets representing 33.6% of total PSRS/PEERS' assets.

²Benchmark: NFI-ODCE net Index

³Benchmark: MSCI ACWI ex U.S. net Index

Letter from the Chief Investment Officer, continued

The internal investment staff initiated a private equity co-investment program in 2014 to allow the Systems to make direct investments in private companies alongside private equity managers with whom PSRS/PEERS have an existing relationship. The investment staff implemented a similar program within private credit in fiscal year 2020 that allows the investment staff to lend directly to private operating businesses across various industries. Both the equity and lending opportunities are researched and vetted by both internal investment staff and an external consultant. The private equity co-investment and direct credit investments are compelling because they are executed with no direct investment fees and no performance-based fees. As of September 30, 2023, the Systems had committed \$2 billion to 166 private co-investment portfolio companies. The portfolio has generated an annualized since inception return of 19.5% through June 30, 2023. As importantly, the program generated total fee savings of approximately \$333 million over that time period relative to traditional private equity investments. As of September 30, 2023, the Systems had also committed \$2 billion to 125 direct credit investments. The portfolio has generated an annualized since inception return of 11.7% through June 30, 2023 and generated total fee savings of approximately \$68 million over that time period relative to traditional private credit investments.

To meet the needs of an expanded investment opportunity set within private markets, the Systems opened a secondary office in the St. Louis area in fiscal year 2023. The secondary office is expected to facilitate enhanced investment staff recruitment/retention and long-term succession planning.

Fiscal Year 2024 Macro

As I write this annual letter at the end of November 2023, we are five months into fiscal year 2024. The investment markets remain fragile due to the combination of elevated inflation and higher interest rates that are beginning to constrain economic growth. It appears that the Federal Reserve will not increase interest rates further. The concern now moves to a possible recession and the timing of potential interest rate cuts. We would expect market returns to be volatile going forward as investors are faced with a troubled regional bank sector, anemic housing market, high-profile military conflicts, sticky inflation and "higher-for-longer" interest rates. Therefore, as an institutional investor in an uncertain environment, PSRS and PEERS will continue to maintain a balanced asset allocation with a long-term view. We will remain focused on prudently investing in opportunities that will protect the Systems' capital and produce attractive returns over the longer term.

Conclusion

Under the support and guidance of the Board of Trustees, the investment program at PSRS and PEERS will continue to *Adapt* to changing market conditions. The Systems will work to produce long-term investment returns that provide our 307,000 retirees, active teachers and school employees with the financial security they have earned and deserve.

Respectfully,

Craig A. Husting, CFA Chief Investment Officer

Cran a. Mt.

Investment Policy Summary

The Board of Trustees of the Public School Retirement System of Missouri and Public Education Employee Retirement System of Missouri (PSRS and PEERS, also referred to as the Systems) is charged with the responsibility of investing the assets of the Systems in a manner consistent with the fiduciary standards set forth in the 'prudent person' rule. To that end, the Board has adopted the following principles to guide all investment-related decisions:

- 1. Act in the exclusive interest of the members of the Systems,
- 2. Maximize total return within prudent risk parameters, and
- 3. Preserve the long-term purchasing power of the Systems.

The investment portfolios of PSRS and PEERS represent all contributions to the plans, from members and their employers, as well as all net earnings on these assets. These funds are held in support of both current and future liabilities. In total, approximately 63% of every dollar used to pay retirees is generated from investment earnings¹.

The Board of Trustees of PSRS and PEERS approved the commingling of assets for purposes of investment as allowed by state statute in January 2013. In order to implement this change, PSRS and PEERS adopted the Missouri Education Pension Trust Agreement (MEPT), which is managed by the PSRS and PEERS Board of Trustees and Investment Staff. Effective July 1, 2013, the invested assets of the Systems were pooled and invested in MEPT. All assets held by MEPT are for the exclusive benefit of PSRS and PEERS. Each of the Systems has equity in MEPT based on funds contributed and earnings allocated. Earnings of MEPT are allocated based on the average daily balances of each of the respective Systems. Individual investments in MEPT are not specifically identified to the respective Systems. Due to the fact all invested assets are invested in MEPT, the rate of return for each of the Systems is approximately the same. Therefore, the following discussions focus on MEPT in total and not the individual Systems.

Board of Trustees

It is the responsibility of the Board of Trustees (Board) to establish and maintain policies and objectives for all aspects of the Systems' investment program including the determination of long-term policies for risk tolerance and asset allocation.

In keeping with its obligation to serve as the governing fiduciary, any changes to the investment policy or investment implementation manuals require the Board's approval.

As one of the largest public pension funds in the United States, the Systems' operational requirements are complex. In order to properly administer the Systems and carry out investment strategies, the Board relies heavily on both internal staff and external service providers. Due to the number of parties involved, their roles as fiduciaries are clearly identified to ensure distinct lines of responsibility and proper controls exist, while providing increased operational efficiency and elimination of duplication of effort.

Executive Director

The Executive Director (Director) is appointed by, and serves at the pleasure of the Board. The Director is responsible for planning, organizing and administering all operations of the Systems under the broad policy guidance and direction of the Board. The Director, with the assistance of the investment staff, monitors the performance of the investment portfolio; ensures that funds are invested in accordance with Board policies; and ensures that proper internal controls are developed to safeguard the assets of the Systems. In fulfilling these responsibilities, the Director relies heavily on the Chief Investment Officer and external asset consultants.

Chief Investment Officer

The Chief Investment Officer (CIO) serves at the pleasure of the Director yet has a direct link to the Board on investment-related issues. The CIO's primary access to the Board includes, but is not limited to, submission of investment reports, information, or communications required by the investment policy and any other information or opinions specifically requested by the Board with regard to the investment program. The CIO is the individual primarily responsible for providing

Roles and Responsibilities

¹ Based on a twenty-five year average for fiscal years 1999-2023.

direction for the investment program. It is the CIO's responsibility to work with the Director, the general consultant, specialty consultants, and other external service providers, with the assistance of the internal staff, in advising the Board on policies related to the investment program. The CIO has responsibilities related to hiring and terminating service providers.

Critical functions of the CIO include recommendations for implementation decisions related to the investment plan and for the strategic allocation of the portfolio within broad ranges approved by the Board.

External Asset Consultants

The Systems employ Russell Investments (Russell) as a general consultant and Albourne America, LLC (Albourne), Pathway Capital Management (Pathway) and The Townsend Group (Townsend) as specialty consultants. Russell is an independent resource available to collaborate with the Board and staff on the investment process. This typically includes regular meetings with the Board to provide an independent perspective on the Systems' goals, structure, performance and external service providers. Additionally, Russell may be involved with the strategic allocation shifts for the portfolio.

The specialty consultants work on specific programs within the overall investment program. Albourne is utilized for the Private Credit, Private Equity, Hedged Assets and Alpha Overlay programs. Pathway is a consultant for the Private Equity and Private Credit programs and Townsend consults on the Private Real Estate program.

External Investment Managers

The Systems employ external investment managers. The external money managers may be structured as public or private entities in the form of a partnership, limited liability company, trust, separately managed account, commingled account, or some other form of operational structure in which assets may be held by an external custodian selected and monitored by the external manager.

Managers are given explicit written directions detailing their particular assignments or they follow the investment program outlined in their offering documents or Limited Partnership Agreements, and will construct and manage investment portfolios that are consistent with the investment philosophy and disciplines for which they were hired. Discretion is delegated to the managers to carry out investment actions as directed by the Systems.

Master Custodian

JP Morgan Chase Bank, NA (JP Morgan) serves as the master custodian for the Systems. The master custodian holds most cash and securities for the Systems, except in cases where investment in a partnership, commingled account, or unique asset class makes it impossible to do so. The Systems thoroughly evaluate the structure of all investments and their custody arrangements. JP Morgan is responsible for providing the official book of record for investment performance reporting and accounting, and serves as an additional layer of risk control in safekeeping the Systems' assets.

Investment Objective

Based on the long-term investment returns available from a well-diversified, prudently invested portfolio, the Board has adopted an objective to achieve a **total nominal investment return of 7.3% with a real rate of return of at least 5.3% per annum over time.**² The long-term investment return objective of 7.3% became effective for fiscal year 2022 investment performance. The investment objective was previously 8.0% effective from 1980 through fiscal year 2016, 7.75% effective for fiscal year 2017, 7.6% effective for fiscal year 2018 and 7.5% effective for fiscal year 2019 through fiscal year 2021.

In order to achieve the investment objective, the Systems have developed a portfolio that is prudently invested across a broad array of assets that reflects the long-term nature of the Systems' pension obligations. The principles of diversification, risk control and competitive rates of return provide the framework for selecting an asset allocation that is expected, over longer periods of time and in the aggregate, to give the Systems the most competitive long-term return within a prudent level of risk.

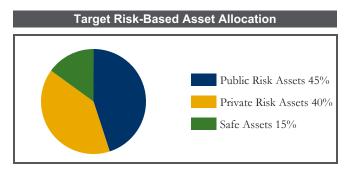

² The real rate of return is the rate by which the long-term total return exceeds the long-term inflation rate. The Board of Trustees shall employ an actuarial consultant for purposes of determining the inflation rate to be used in calculating the pension obligations. The assumed inflation rate as of June 30, 2023 was 2.0% per annum.

Understanding Risk

Selection of an appropriate asset allocation is one of the most important decisions made by a retirement plan. Within that asset allocation, it is important to not only consider the expected investment return, but also to understand the risks. The importance of risk consideration for institutional investors is critical to long-term success. To that end, the Systems employ an effective and intuitive risk-based approach to setting and reporting the asset allocation decision. The Systems developed a risk-based asset allocation to clearly define the prudent risks taken within its investment portfolios. The Systems consider a variety of risks including, but not limited to, liquidity risk, volatility, tail risk (the possibility that an investment will move much more than expected) and the ability to meet the Systems' assumed rate of return when structuring the portfolio.

This analysis results in an asset allocation to Public Risk Assets, Safe Assets and Private Risk Assets. The target risk-based asset allocation is illustrated in the pie chart below. During fiscal year 2022, the Board of Trustees increased the Private Risk Assets target by 5% to 40% and proportionately decreased the Safe Assets target to 15%. These changes are discussed further in the following Asset Allocation section. Within each risk allocation, the Systems' investment portfolio includes long-term commitments to specific asset programs.

Asset Allocation

The asset allocation decision is generally regarded as the most important decision in the investment management process since it is crucial to achieving the long-term objectives established by the Board. In that light, it is the Board's responsibility to determine the appropriate policy asset allocation based upon several criteria with input and guidance from internal staff and Russell. These criteria are as follows:

1. The expected rate of return for each asset classification;

- The expected risk of each asset classification (expressed as the standard deviation of the rate of return);
- 3. The correlation of returns between asset types;
- The investment objectives and risk constraints of the Systems (including, but not limited to, liquidity needs and the expected time horizon);
- 5. The funded ratio and cash flow requirements for PSRS and PEERS; and
- 6. The impact of the Systems' return volatility on the contribution rate.

The Board of Trustees most recently amended the longterm target asset allocation during fiscal year 2022 as a result of the 2022 asset allocation/liability study. The allocation to each investment program considers both the risk tolerance of the Systems and the long-term return objective. The new long-term target asset allocation is expected to maintain similar levels of total portfolio risk while allowing for more efficient investment returns. However, given the nature of investing in Private Risk Assets, it is expected to take several years to implement through a disciplined investment approach. The policy benchmarks will change over time as the Systems make meaningful progress to the new long-term targets. The changes to the asset allocation were as follows: Private Risk Assets increased by 5% to 40% and Safe Assets decreased by 5% to 15%. Within Safe Assets, U.S. Treasuries decreased from 20% to 15% and within Private Risk Assets, Private Equity increased from 16% to 21%.

The following chart details the long-term target and interim target asset allocations for fiscal year 2023. The interim policy allocations have been established to reflect the continued funding of Private Risk Assets and the progress towards the Systems' long-term asset allocation objective. During fiscal year 2023, the Public Credit program was wound down and achieved the long-term allocation of zero. For performance measurement purposes, the interim policy will serve as the basis for establishing the total plan policy benchmark until the on-going process of funding Private Risk investments is meaningfully complete.

Target Asset Allocation and Policy Ranges					
	Fiscal Year 2023	As Amended in 2022			
Investment Type	Interim Target	Long-Term Target	Policy Ranges		
Public Risk Asset Programs					
U.S. Public Equity	24.0%	23.0%	15% - 45%		
Public Credit	0.0%	0.0%	0% - 10%		
Hedged Assets	6.0%	6.0%	0% - 25%		
Non-U.S. Public Equity	16.0%	16.0%	8% - 28%		
Total Public Risk Assets	46.0%	45.0%	35% - 70%		
Safe Assets Programs					
U.S. Treasuries	18.0%	15.0%	0% - 40%		
U.S. TIPS	0.0%	0.0%	0% - 30%		
Cash & Cash Equivalents	0.0%	0.0%	0% - 10%		
Total Safe Assets	18.0%	15.0%	10% - 40%		
Private Risk Asset Programs					
Private Equity	19.0%	21.0%	4% - 28%		
Private Real Estate	11.0%	11.0%	4% - 15%		
Private Credit	6.0%	8.0%	0% - 12%		
Total Private Risk Assets	36.0%	40.0%	10% - 50%		
Total Fund	100.0%	100.0%			

The Board recognizes the cyclical nature of the investment markets and it has allowed the internal staff to capitalize upon opportunities by changing the allocation of each asset class or sub-asset class within broad strategic bands or policy ranges (as indicated in the previous table). The flexibility given to the internal staff in establishing the strategic mix provides opportunities for the Systems to take advantage of changing market conditions. To ensure appropriate controls, the Director, CIO and Russell must unanimously agree upon all material strategic changes prior to implementation.

Total Plan Leverage

The Board of Trustees approved the use of total plan leverage in fiscal year 2020. Leverage may be utilized (through futures, swaps, or other derivative instruments) to efficiently implement portfolio rebalancing and/or to apply modest leverage to total plan assets. The total direct leverage at the fund level shall not exceed 10% of the portfolio.

Performance Objectives and Monitoring Process

Generating a total nominal rate of return net of expenses of at least 7.3% and a real rate of return net of expenses of at least 5.3% per annum is an important consideration in the asset allocation decision and the primary performance objective for the Systems over long periods of time. The need for a long-term focus is necessary to preclude the temptation to overreact to events in the financial markets that have no relevance to long-term asset/liability management of the Systems. The resulting dilemma is the conflicting requirement to evaluate investment policy implementation over shorter time periods while maintaining a long-term focus on meeting the return objectives. In order to determine if the Systems' short-term and long-term objectives are being achieved, the Board evaluates performance relative to policy and strategic benchmarks. The policy benchmarks allow the Systems to be judged by performance relative to a defined set of broad market indices (i.e., the Systems' long-term asset allocation objective). The strategic benchmarks allow the Board to consider the

additional value generated from the latitude given to the internal staff to alter the asset class or sub-asset class allocations.

Policy Decisions

The value added through policy decisions is measured by the difference between the policy benchmark return and the actuarial required rate of return objective (defined as Real Return Objective + Inflation). A policy benchmark return greater than the actuarial required rate of return reflects value added. A policy benchmark return less than the actuarial required rate of return reflects losses or shortfalls in performance in funding the liabilities of the Systems. These policy decisions are measured over long periods of time.

Strategy Decisions

Strategy decisions are asset class or sub-asset class allocation choices made by the internal staff to deviate from the policy benchmark weights, with approval from the Director, CIO and Russell that the proposed material deviation is in compliance with the Board's investment policy. The value added through the decisions to overweight and/or underweight these sub-asset classes is measured by the difference between the strategic benchmark return and the policy benchmark return. This difference captures the value added by internal staff through asset class or sub-asset class strategic decisions relative to the Board's broad policy allocation decisions. A strategic benchmark return greater than the policy benchmark return reflects value added through the allocation decisions. A strategic benchmark return less than the policy benchmark return reflects losses to the fund's performance based upon strategy decisions.

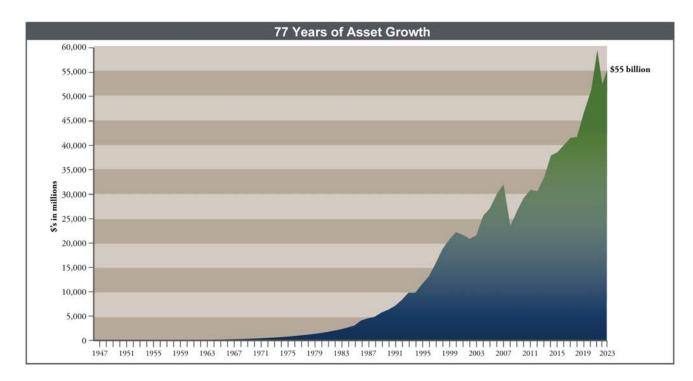

Implementation Decisions

Implementation decisions are manager selection choices made by the internal staff with the approval of the Director, CIO, Managing Director and a consultant(s). The value added through these manager selection decisions is measured by the difference between the actual portfolio return and the strategic benchmark return. An actual portfolio return greater than the strategic benchmark return reflects value added through these manager selection decisions. An actual portfolio return less than the strategic benchmark return reflects losses to the fund's performance based upon implementation decisions.

Risk Controls

The Board recognizes that even though the Systems' investments are subject to short-term volatility, it is critical that a long-term investment focus be maintained. Given the importance of the broad asset allocation decision to the Systems' long-term investment success, internal staff is required to conduct an asset allocation/ liability study at least every five years to examine the appropriate long-term investment strategies for the Systems. As previously discussed in the asset allocation section, an asset/liability study was most recently conducted in fiscal year 2022. In addition, the CIO must annually evaluate the asset allocation mix and any strategic allocation of the portfolio and provide a report to the Board on the results of that evaluation. This ongoing review of the asset allocation process helps to ensure the asset allocation is being monitored and modified as needed to meet the financial obligations of the Systems.

Total Fund Review

The Systems' total invested assets were \$55.0 billion as of June 30, 2023. The graph above illustrates the long-term growth in assets since the inception of PSRS in 1946 and PEERS in 1965.

Investment Performance³

The Systems earned an investment return of 6.4% for fiscal year 2023 (6.2% net of all investment expenses and fees) with an ending fair value of invested assets of \$55.0 billion. The Systems' well-structured investment portfolio added approximately \$3.2 billion in investment earnings to the growth of assets during the year.

As illustrated in the following table, the Systems' Public Risk program performed especially well for the year driven by strong equity market returns with the U.S. Public Equity portfolio returning 18.1% and the Non-U.S. Public Equity portfolio increasing 15.9%. Within Private Risk Assets the Private Credit portfolio also did well producing a 9.3% return for the year. Each of these asset classes strongly contributed to the total return of the Systems while providing diversification from the U.S. Treasuries and Private Real Estate markets.

Total Fund Performance				
	Total

** The extended time periods reflect the blended returns of the historical actuarial required rates of return, as previously discussed in the Investment Objective section.

Investment Performance Relative to Benchmarks

The Board has established a long-term objective (actuarial required rate of return) to achieve a total investment return of at least 7.3% per year and a real rate of return of at least 5.3% per year. The fiscal year 2023 total plan return of 6.4% fell marginally short of the long-term objective of 7.3%. However, over long periods of time, PSRS and PEERS continue to produce investment returns that meet or exceed the Systems' objective. The annualized investment return for the Systems is 7.7% (7.5% net of all investment expenses and fees) over the last 30 years.

In order to determine if the Systems' short-term and long-term objectives are being achieved, the Board utilizes three benchmarks by which the Systems' progress may be judged: (1) performance relative to a policy benchmark (defined set of broad market indices that reflects the Systems' long-term asset allocation, or market beta), (2) performance relative to a strategic benchmark which indicates value added by the internal staff, and, to a lesser extent, (3) performance relative to other public pension systems and their investment managers as a reference point of oversight.

The internal staff presents to the Board a detailed attribution of the total fund performance at the end of each fiscal year. Value is added over and above expected market returns if the strategic benchmark exceeds the policy benchmark (i.e., the internal staff made positive strategic decisions) and/or if the actual total fund return exceeds the strategic benchmark (i.e., positive implementation decisions). The Statistical Performance section on the following page shows that for all extended time periods the total fund return exceeded the strategic benchmark, and the strategic benchmark exceeded the policy benchmark. These excess returns demonstrate the significant added value by internal staff through both strategic asset allocation decisions and implementation decisions.

The fiscal year 2023 return of 6.4% (6.2% net of all investment expenses and fees) underperformed the policy benchmark return of 9.3% by 290 basis points. However the Systems' earned 750 basis points in excess return over the policy benchmark return of -10.3% during a period of very weak markets in fiscal year 2022 and earned 580 basis points in excess return over the policy benchmark return of 22.9% in fiscal year 2021, a period of very strong markets. The Systems' three-year return over this time period of 10.0%, outperformed the policy benchmark return of 6.4% by 360 basis points. Performing well over time, during periods of both strong and weak markets, signifies the Systems' well structured and diversified investment portfolio's ability to deliver higher returns and lower risk than the policy benchmark. Additionally, the total fund return has exceeded the policy benchmark in six of the last ten fiscal years. Over this ten-year time period, the total fund return has exceeded the policy benchmark by 150 basis points, on an annualized basis, resulting in approximately \$7.0 billion in excess performance (net of all investment expenses and fees) to the Systems, indicating that internal staff and active investment management have added value to the Systems.

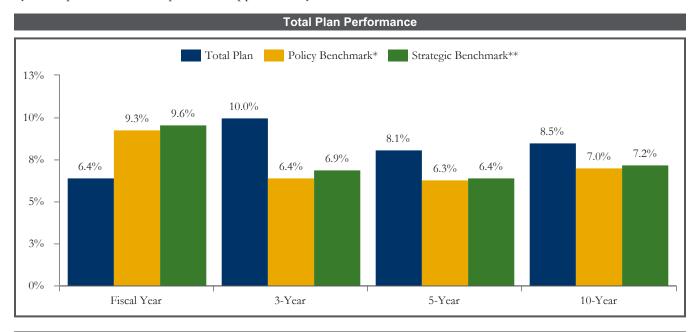

The Systems utilize the Trust Universe Comparison Services (TUCS) to compare the total return and risk levels of the Systems relative to other public pension funds with assets in excess of \$1 billion. As the chart on page 75 indicates, the total fund return has exceeded the median return of other large public funds over all extended time periods. The Systems have taken substantially less risk than comparable funds during all time periods yet have consistently provided higher long-term investment returns.

Statistical Performance

One of the primary investment objectives of the Systems is to achieve returns similar to the market but at lower risk or volatility levels. To that end, internal staff monitors a number of quantitative risk statistics related to the total investment portfolio as well as individual composites. The following table indicates that the Systems have taken less risk than the policy benchmark (as measured by standard deviation) over all time periods while achieving higher long-term returns, thereby indicating strong risk-adjusted performance.

Beta measures the volatility, or systematic risk, of a security or portfolio in comparison to the market as a whole. If a portfolio has a beta of 1.0, it indicates that the portfolio moves in unison with the market. The Systems' portfolios have a beta of less than 1.0 relative to the policy benchmark, indicating less market volatility. The Systems' beta relative to the MSCI All Country World Index (MSCI ACWI net Index) is less than 0.50. This signifies that the Systems' portfolio moves up or down approximately less than half as much as the world stock index.

^{**} As of June 30, 2023; 41.7% Russell 3000 Index, 23.5% MSCI ACWI ex-USA net Index, 13.7% Bloomberg U.S. Treasury Index, 10.6% NFI-ODCE, 5.2% ICE BofA U.S. High Yield Index, 4.3% Bloomberg U.S. Intermediate Credit Index, and 1.9% ICE BofA 3-Month U.S. Treasury Note Index. The Total Plan Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

The following chart shows the relationship between fair value returns (actual rate of return), the actuarially assumed rate of return and the utilization of an actuarial asset valuation method of smoothed assets. To reduce volatility in employer and employee contribution rates, a common actuarial practice of "asset smoothing" is utilized. The application of this practice results in full recognition of returns at the actuarial assumed rate and recognizes any annual excess or deficiency relative to the assumed rate over a period of five years.

- * The Actual Rate of Return (fair value return) consists of all investment gains and losses (net of investment expenses) on the fair value of assets each year.
- ** The Actuarial Assumed Rate of Return is the assumed rate of return on the actuarial value of assets and is used in establishing contribution rates and pension obligations, including the net pension liability.
- *** Investment earnings in excess or deficient of the assumed rate of return are smoothed over a 5-year period for actuarial funding purposes. Twenty percent of the excess or deficiency is recognized annually for a 5-year period. This calculation results in the Smoothed Rate of Return.

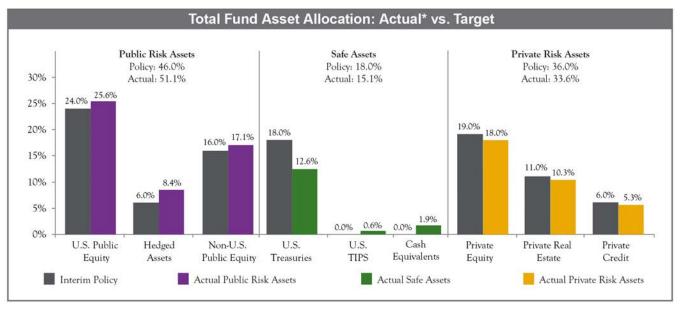

Asset Allocation: Actual Versus Target

The long-term target asset allocation is expected to take several years to implement given the nature of investing in Private Risk Assets. As discussed in the Investment Policy Summary: Asset Allocation section, the interim policy allocations have been established to reflect meaningful progress towards the new long-term targets and for policy benchmark weights.

The June 30, 2023 interim policy allocation was 46% Public Risk Assets, 18% Safe Assets and 36% Private Risk Assets. In fiscal year 2023 the interim asset class targets were updated to reflect the progress made in funding the Private Risk programs. Private Equity increased from 18% to 19%, Real Estate increased from 10% to 11% and Private Credit increased from 3% to 6% while Public Credit decreased from 5% to 0%. These sub-asset class target allocation updates resulted in a 5% increase in Private Risk Assets from 31% to 36% and a corresponding 5% decrease in Public Risk Assets from 51% to 46%.

As illustrated in the chart below, internal staff utilized the flexibility built into the investment policy to strategically overweight or underweight certain asset classes throughout the year. Strategic decisions within the Public Risk Assets program included an overweight to U.S. Equities and Non-U.S. Equities which provided meaningful returns to the Systems in fiscal year 2023.

As discussed in the Investment Policy Summary: Asset Allocation section the use of total plan leverage is allowed to efficiently implement portfolio rebalancing. The Systems utilized approximately 0.7% leverage of total plan assets during fiscal year 2023 by rebalancing into U.S. Public Equities during the market decline in calendar year 2022. The leverage was then liquidated near the end of fiscal year 2023, following the strong U.S. Public Equity market performance in 2023, creating additional added value to the Systems by internal staff. The Total Plan leverage as of June 30, 2023 is 0.0%.

^{*} Total Plan assets include 0.2% invested in an operating cash account that is not reflected in the chart above.

Public Risk Assets Summary

As of June 30, 2023, Public Risk Assets had a fair value of approximately \$28.1 billion, representing 51.1% of total plan assets.

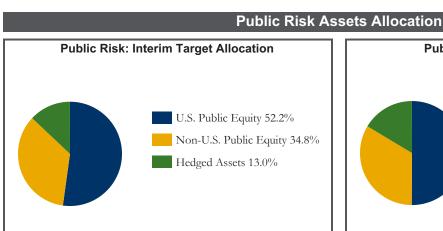

Investment Program Description

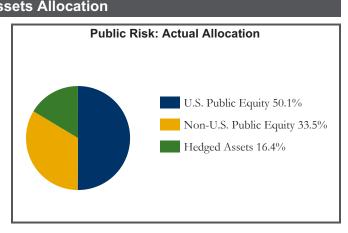

The Board of Trustees has adopted an asset allocation policy that includes a significant allocation to Public Risk Assets. The four programs within the Public Risk Assets composite are U.S. Public Equity, Public Credit, Hedged Assets and Non-U.S. Public Equity. Each program within the Public Risk allocation is a separate multi-manager composite that is treated generally as a single portfolio. Each program serves a specific and distinct role within the overall Public Risk composite and also within the overall total plan allocation. Over time, the Public Risk composite and its sub-components serve as an effective and efficient vehicle to supply the underlying beta exposure to a portfolio of global risk assets required by the Systems' asset allocation policy, while providing the opportunity to achieve excess returns above that of a passive benchmark through the prudent combination of passive investment vehicles and a wide range of active investment strategies.

Structure

The Systems' allocation to Public Risk Assets at the end the fiscal year 2023 was 51.1% compared to the interim target allocation of 46%. The internal staff strategically increased the total plan's allocation to Public Risk Assets throughout the year from an allocation of 49.6% at the beginning of the year. The Systems' also utilized total plan leverage within the Public Risk Assets composite to efficiently implement portfolio rebalancing into U.S. Public Equities during market declines in calendar year 2022. The leverage was then liquidated near the end of fiscal year 2023 following the strong U.S. Public Equity market performance in 2023. Additionally, with the continued funding of the Private Risk programs (specifically, Private Credit), the Public Credit Program was fully liquidated during fiscal year 2023 as expected with its long term target allocation of 0.0%.

As of June 30, 2023, the Systems' Public Risk allocation was 50.1% in the U.S. Public Equity program, 33.5% in the Non-U.S. Public Equity program and 16.4% in the Hedged Assets program. Each of these programs is discussed in more detail on the following pages.

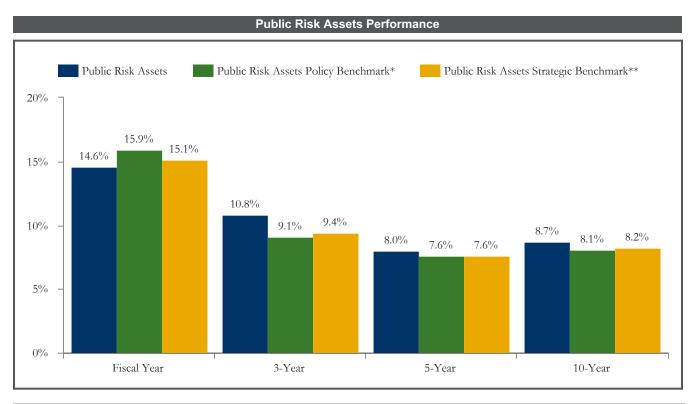

Market Overview

Fiscal year 2023 was a challenging year for the financial markets including inflation at multi-decade highs, aggressive central bank rate hikes, banking sector instability and slowing economic growth. Despite the difficult market environment, the Russell 3000 Index (broad measure of the U.S. stock market) produced a 19.0% return for the year. The Non-U.S. equity markets also performed well but not to the same extent as the U.S. equity markets with the MSCI ACWI ex-USA Index (broad measure of the international stock markets) increasing 12.7% for the year. Bond

markets experienced considerable interest rate and spread volatility during the year however corporate credit markets managed to produce a modest gain with the Bloomberg U.S. Intermediate Credit Index increasing 1.6%.

Performance

The Systems' Public Risk portfolio produced a very strong absolute return of 14.6% for fiscal year 2023. As shown in the table and graph below, the Systems' Public Risk composite has performed well over long periods of time, providing significant absolute returns and 60 basis points of annualized excess return over the last ten years. The positive performance of the portfolio relative to the policy benchmark indicates value added by the internal staff through both strategic asset allocation decisions and manager selection decisions.

Public Risk Assets Statistical Performance						
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year		
Annualized Return	14.6%	10.8%	8.0%	8.7%

^{*} The Public Risk Assets Policy Benchmark is composed as follows: 55.4% Russell 3000 Index, 38.1% MSCI ACWI ex-USA net Index and 6.5% Bloomberg U.S. Intermediate Credit Index.

^{**} The Public Risk Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

U.S. Public Equity Program Summary

As of June 30, 2023, the U.S. Public Equity program had a fair value of approximately \$14.1 billion, representing 25.6% of total plan assets.

Investment Program Description

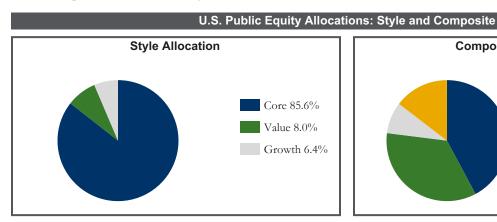

U.S. Public Equity is comprised of the Large-Cap, Small-Cap and Alpha Overlay programs which seek to provide long-term capital appreciation and dividend income in excess of inflation through the investment in domestic equity securities. Returns above a purely passive investment benchmark are targeted through the use of a wide variety of active investment strategies that may employ exposure to both equity securities and other types of investments. The primary *beta* exposure is achieved through investments in passive investment vehicles (including derivatives), traditional long-only active domestic equity management, and active long/short approaches. *Alpha* (or, excess returns above a passive alternative) is expected to be achieved through traditional long-only active domestic equity management, active long/short approaches and alpha overlay strategies (described in greater detail at the end of this section).

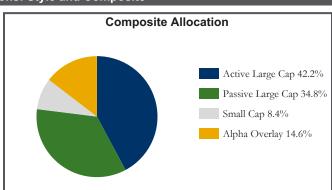

Structure

As of June 30, 2023, 34.8% of the U.S. Public Equity composite was passively managed. The remainder of the portfolio was actively managed and diversified across a broad array of capitalization ranges and investment styles, including the Small-Cap and the Alpha Overlay programs. Both programs represent multi-manager pools of assets managed within the overall U.S. Public Equity structure. The Small-Cap program encompasses small capitalization assets. The Alpha Overlay composite focuses on the separation of returns into alpha and beta, and encompasses alternative equity mandates including hedge fund portfolios.

Exposure to the various segments of the domestic equity market (i.e., growth-oriented, value-oriented, and core) and to the approved investment strategy types are achieved through the identification, selection and on-going management of investment advisors qualified to serve as fiduciaries to the Systems.

The pie charts below depict the U.S. Public Equity portfolio by presenting the style structure of the portfolio as well as the composite allocation as of June 30, 2023.

Market Overview

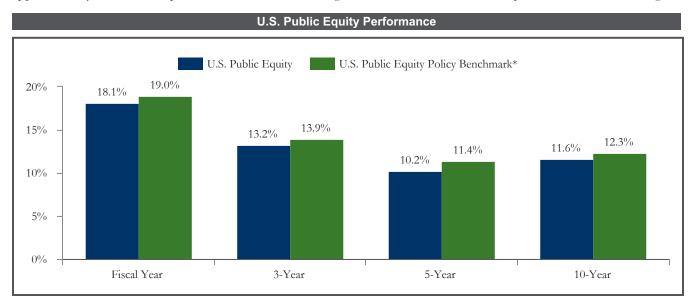

The U.S. equity markets performed very well overall for fiscal year 2023 following significant market declines during calendar year 2022. For fiscal year 2023, large cap stocks outperformed small cap stocks while growth styles performed especially well in comparison to value styles. The comprehensive measure of the U.S. stock market (Russell 3000 Index) increased 19.0% while large-cap stocks (Russell 1000 Index) increased 19.4% and small-cap stocks (Russell 2000 Index) increased 12.3% for the year. Large-cap growth stocks (Russell 1000 Growth Index)

outperformed large-cap value stocks (Russell 1000 Value Index) with a return of 27.1% compared to 11.5% while small-cap growth stocks (Russell 2000 Growth Index) outperformed small cap value stocks (Russell 2000 Value Index) with a return of 18.5% compared to 6.0%.

Performance

The total return for the U.S. Public Equity program was 18.1% compared to the benchmark return of 19.0% for the fiscal year ended June 30, 2023. Within the U.S. Public Equity program, the Large-Cap program returned 18.7%, Alpha Overlay returned 16.6% and the Small-Cap program returned 15.1% for the year.

As indicated in the table and graph, the U.S. Public Equity portfolio has produced very strong absolute returns over all time periods reported. Over long periods of time, the Systems' U.S. Public Equity portfolio is designed to deliver approximately 50-100 basis points of excess return through a combination of active and passive investment strategies.

U.S. Public Equity Statistical Performance								
Portfolio Characteristics Fiscal Year 3-Year 5-Year 10-Year								
U.S. Public Equity Return	18.1%	13.2%	10.2%	11.6%

Investment Advisors

As of June 30, 2023, the Systems had contracts with 17 external investment advisors who managed 20 portfolios that comprised 85.4% of the U.S. Public Equity portfolio. The remaining 14.6% of the portfolio was in the Alpha Overlay program described in the next section. The Systems repositioned the Large-Cap program during the year by terminating a mandate with Lazard Asset Management while adding a new mandate with GQG Partners.

Alpha Overlay Program Summary

As of June 30, 2023, the Alpha Overlay program had a fair value of approximately \$2.1 billion, representing 3.7% of total plan assets.

Investment Program Description

The Alpha Overlay portfolio resides within the U.S. Large-Cap Equity program. The Alpha Overlay portfolio has been constructed to assist in meeting the long-term goals established for the overall U.S. Large-Cap Equity allocation. Specifically, Alpha Overlay provides broad exposure to large-cap U.S. stocks using S&P 500 total return swaps, while the returns of a select portfolio of hedge fund strategies provide the opportunity to earn excess returns above the passive S&P 500 Index. By combining the market exposure obtained through the S&P 500 total return swaps with the diversified exposures to investment strategies focused on alpha generation, the combined portfolio is constructed and managed to produce a return stream with volatility and beta characteristics similar to the passive S&P 500 Index, while generating excess returns (or alpha) of approximately 200-250 basis points over longer periods of time.

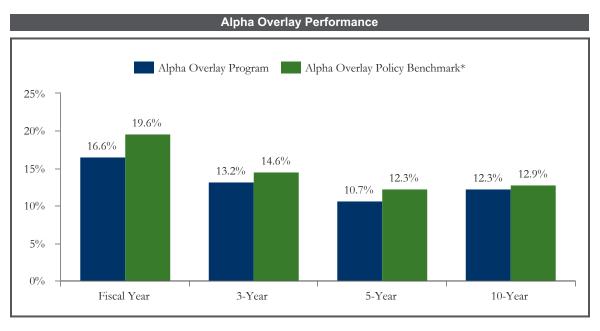

Structure

As of June 30, 2023, 33.9% of the Alpha Overlay composite assets were passively managed by NISA Investment Advisors using S&P 500 total return swaps to attain equitization. An additional 57.9% of the portfolio was actively managed across a diversified range of multi-strategy and market neutral hedge fund mandates. The remaining 8.2% of the portfolio was actively managed by Zevenbergen Capital in a long-only mandate. The chart below displays the specific investment advisor exposure within the composite as of June 30, 2023.

	Alpha Overlay Investment Adviso		Fair Value	% of Total Plan

Total		\$	2,054,514,072	3.7%

Performance

The fiscal year 2023 return for the Alpha Overlay program was 16.6%, underperforming the benchmark return of 19.6% by 300 basis points. As shown in the table and graph below, the Alpha Overlay composite has produced significant long-term absolute returns while maintaining a risk profile (standard deviation and beta) lower than the benchmark.

Alpha Overlay Statistical Performance						
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year

^{*} The Alpha Overlay Policy Benchmark is the S&P 500 Index.

Non-U.S. Public Equity Program Summary

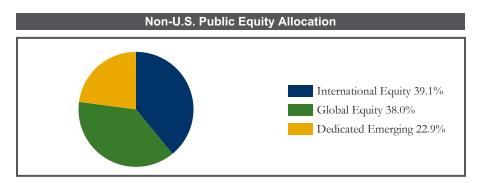

As of June 30, 2023, the Non-U.S. Public Equity program had a fair value of approximately \$9.4 billion, representing 17.1% of total plan assets.

Investment Program Description

The Non-U.S. Public Equity program provides long-term capital appreciation and dividend income in excess of inflation through exposure to public equity securities on a global basis. Specific investment strategies approved for the Non-U.S. Public Equity program include passive investment vehicles, traditional long-only active equity management and active long/short approaches. Exposure to the various segments of the global equity market (i.e., U.S., developed non-U.S., emerging, growth-oriented, value-oriented, and core) and to the approved investment strategy types are achieved through the identification, selection and on-going management of investment advisors qualified to serve as fiduciaries to the Systems. The Non-U.S. Public Equity portfolios provide an element of diversification relative to the domestic equity portfolios. Currency is an aspect of international investing that can impact the performance and volatility of the asset class over the short-term. However, over the long-term, the effect from currency is expected to be neutral.

Structure

As of June 30, 2023, 9.9% of the Non-U.S. Public Equity composite was passively managed. The remainder of the portfolio was actively managed and diversified across capitalization ranges, styles and a number of developed and emerging market countries. The pie chart below indicates broad exposure by investment mandate within the composite.

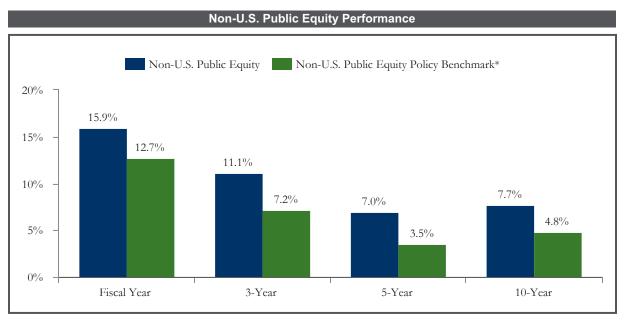

Market Overview

Stock markets throughout the world experienced significant volatility in fiscal year 2023 including a sharp sell-off during most of calendar year 2022 followed by a strong rebound since the third quarter of 2022. For example, the MSCI World net Index declined by 25.4% over the first three quarters of calendar year 2022 followed by an increase of 26.3% over the next three quarters. Overall, for the fiscal year ended June 30, 2023, equity markets performed very well. International markets (MSCI EAFE net Index) increased 18.8%, outperforming global stocks (MSCI World net Index) increasing 18.5% and emerging markets (MSCI EM net Index) increasing 1.8%.

Performance

The Non-U.S. Public Equity program has continued to produce excellent relative and very strong absolute returns. The program generated a total return of 15.9% for fiscal year 2023, outperforming the policy benchmark of 12.7% by 320 basis points. As shown in the table and graph below, the Systems' Non-U.S. Public Equity composite has substantially outperformed the benchmark over all time periods. Over long periods of time, the Systems' Non-U.S. Public Equity program is designed to deliver approximately 100-150 basis points of excess returns through a combination of active and passive investment strategies. The Non-U.S. Public Equity program's returns have exceeded these expectations.

Non-U.S. Public Equity Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Non-U.S. Public Equity Return	15.9%	11.1%	7.0%	7.7%

Hedged Assets Program Summary

As of June 30, 2023, the Hedged Assets program had a fair value of approximately \$4.6 billion, representing 8.4% of total plan assets.

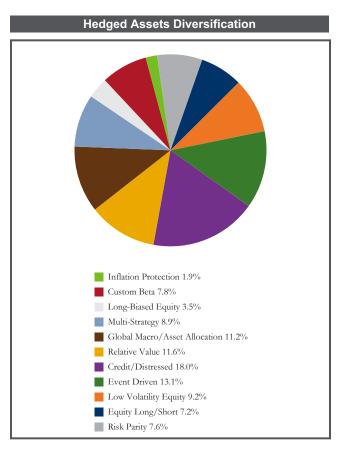

Investment Program Description

The Hedged Assets program's objective is to provide diversification to the total portfolio and reduce volatility within the Public Risk composite. The purpose of this program is to enhance the overall risk/return profile of the Public Risk composite through the inclusion of specialized investment strategies that typically generate returns in a different fashion (i.e., absent a high correlation to equities or bonds). These strategies may utilize leverage as allowed within their governing documents. The returns from these strategies have historically had a low-to-moderate correlation with the traditional equity markets, thus providing diversification benefits in addition to portfolio return enhancement. These strategies seek to control risks and maintain a focus on absolute returns. The inherent nature of these vehicles to serve as a "hedge" provides for the expectation that the program will lag the equity market during times when equities are performing above the long-term averages. However, when equities are performing below the long-term averages, the program would be expected to outperform the equity market. In addition, managers within this asset class have historically possessed significantly lower volatility relative to traditional equity managers.

Structure

The Systems have retained Albourne America, LLC (Albourne) as its hedged asset consultant. Albourne is an independent global advisory firm with a significant focus on hedge funds. The Systems utilize direct investments into hedge funds as opposed to incorporating fund-offunds. The Systems' internal staff believes the benefits of direct investments, including lower fees, customized portfolio exposures, direct access to manager knowledge, and higher levels of transparency outweighed the benefit of quicker implementation offered by fund-of-funds.

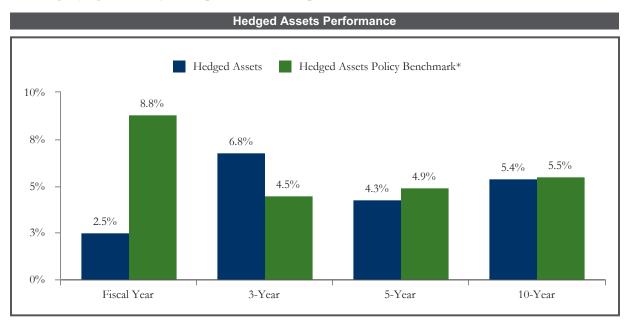

The following chart indicates the strategy diversification of the Hedged Assets program as of June 30, 2023. The Systems manage the Hedged Assets portfolio to a blended benchmark of 25% Russell 3000 Index, 25% MSCI ACWI ex-USA net Index, and 50% Bloomberg U.S. Intermediate Credit Index.

Performance

The total annualized return on the Systems' Hedged Assets portfolio was 2.5%, compared to the benchmark return of 8.8% for the fiscal year ended June 30, 2023.

Over the past ten years, the Hedged Assets program has underperformed its policy benchmark by 10 basis points. The performance relative to the policy benchmark is reasonable however, given the significant performance of equities over this time period. The Russell 3000 Index was up an annualized 12.3% over the past ten years and the MSCI ACWI net Index was up an annualized 8.8%. As discussed previously, the hedging characteristics of the Hedged Assets program provide for the expectation that its performance will lag equity markets and/or its policy benchmark during periods of higher-than-normal equity returns. The Hedged Assets program is expected to outperform in more normal and down markets. As the table indicates, the longer-term performance was accomplished by assuming less than one-half of the volatility of the MSCI All Country World Index and achieving a beta of less than 0.40 to the index, signifying that the Systems' portfolio moves up or down less than half as much as the world stock index.

Safe Assets Summary

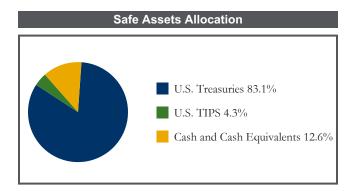

As of June 30, 2023, Safe Assets had a fair value of approximately \$8.3 billion, representing 15.1% of total plan assets.

Investment Program Description

The Safe Assets program is intended to act as a source of safety and income for the Systems. The program is designed to create substantial diversification to the total fund and reduce volatility through low correlation to other asset classes. Specifically, the Safe Assets portfolio should provide asset protection at the total fund level in periods of economic stress.

Structure

As of June 30, 2023, NISA Investment Advisors was the only external investment manager within the Safe Assets program. Additionally, the Safe Assets program includes an FDIC insured interest-bearing account with a competitive yield at J.P. Morgan. The assets held within the program exhibit high liquidity and safety. The Systems' allocation to Safe Assets decreased from 16.6% as of June 30, 2022 to 15.1% as of June 30, 2023. The pie chart below depicts the Safe Assets program by showing the composite allocations as of June 30, 2023.

Market Overview

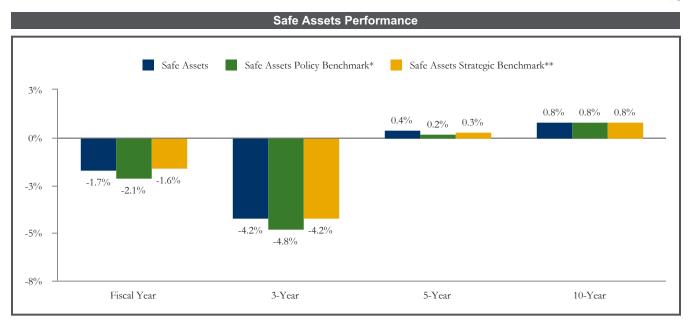

Treasury markets continued to experience negative returns during fiscal year 2023 as the yield on the 10-year Treasury increased to 3.8% on June 30, 2023, up from 3.0% on June 30, 2022. Treasury yields ended the year higher across the yield curve as the Federal Reserve took aggressive policy action with rapidly raising interest rates in response to multi-decade high inflation readings. The comprehensive measure of the U.S. Treasuries market (Bloomberg U.S. Treasuries Index) declined by 2.1% while the TIPS market (Bloomberg U.S. TIPS 1-10 Year Index) was down 0.9% for the year. Treasuries underperformed other fixed income markets during the year. High yield, or lower quality bonds (ICE BofA U.S. High Yield Index) increased 8.9%, investment grade credit corporate bonds (Bloomberg U.S. Intermediate Credit Index) increased 1.6%, and a broader measure of the U.S. bond market (Bloomberg U.S. Aggregate Index) decreased by 0.9% for the year.

Performance

The total return for the Safe Assets portfolio was -1.7% compared to the benchmark return of -2.1% for the fiscal year ended June 30, 2023. The Systems' opportunistic allocation to U.S. TIPS and shorter duration cash and cash equivalents contributed to the 40 basis points of excess return achieved during the year.

The absolute return of the Safe Assets portfolio is relatively modest over longer time periods. However, the Safe Assets portfolio is designed to provide asset protection at the total fund level in periods of economic stress and ultimate liquidity to the Systems. An allocation to Safe Assets allows the Systems to accept market risk in other portions of the total fund portfolio.

Safe Assets Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Safe Assets Return	-1.7%	-4.2%	0.4%	0.8%	
Annualized Policy Benchmark Return*	-2.1%	-4.8%	0.2%	0.8%	
Annualized Strategic Benchmark Return**	-1.6%	-4.2%	0.3%	0.8%	
Excess Return	0.4%	0.6 %	0.2%	%	
Annualized Standard Deviation of Composite	7.4%	5.3%	5.0%	3.9%	
Annualized Standard Deviation of Policy Benchmark*	7.5%	5.4%	5.2%	4.1%	
Beta to Policy Benchmark*	0.98	0.98	0.97	0.95	
Beta to MSCI ACWI net Index	0.29	0.17	0.05	0.03	

^{*} Effective July 1, 2020 the Safe Assets Policy Benchmark is the Bloomberg U.S. Treasury Index. The 80.0% Bloomberg U.S. Treasury Index and 20.0% Bloomberg TIPS 1-10 Yrs. Index is used in prior periods.

The Systems have specifically taken less risk compared to the policy benchmark due to the inclusion of the cash and cash equivalents portfolios. Additionally, the Safe Assets program had a beta slightly less than 1.0 relative to the policy benchmark indicating less market volatility. Most importantly, the Safe Assets portfolio exhibits a beta of approximately zero relative to the MSCI ACWI net Index indicating no correlation to risk assets. These statistics support one of the primary objectives of Safe Assets: diversification from other risk assets in the total fund.

^{**} The Safe Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

Statistics

The following table displays the statistical characteristics of the Systems' Safe Assets program as of June 30, 2023 with comparisons shown to the Bloomberg U.S. Treasury Index. Additionally, the top ten Safe Assets holdings as of June 30, 2023 are shown in the table below the characteristics.

Total		\$	8,325,726,097	15.1%

Private Risk Assets Summary

As of June 30, 2023, Private Risk Assets had a fair value of approximately \$18.5 billion, representing 33.6% of total plan assets.

Investment Program Description

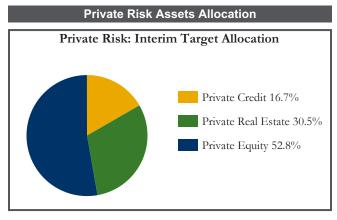

The allocation to Private Risk investments is viewed as a separate asset class for inclusion in the Systems' overall investment portfolios. The process of building the Systems' Private Risk program and fully funding the target allocation is expected to occur over a period of several years. Additional new investments will be necessary beyond the funding period in order to maintain the long-term target allocation. The three programs within the Private Risk Assets composite are Private Equity, Private Real Estate and Private Credit. Each program within the Private Risk allocation is a separate multi-manager composite that is treated generally as a single portfolio. Each program serves a specific and distinct role within the overall Private Risk composite and also within the overall total plan allocation. Over time, the Private Risk composite serves as a long-term vehicle to supply the underlying beta exposure to a portfolio of private assets.

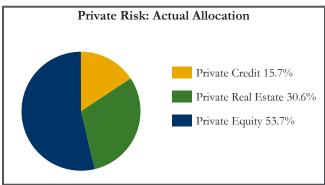

Investments in Private Risk Assets differ substantially from the Systems' public markets asset classes (Public Risk Assets and Safe Assets) in part because they are typically very long-term in nature, not publicly traded, relatively illiquid and offer the potential for substantially higher returns (along with a commensurate level of risk). The illiquid nature of Private Risk Assets can result from the form of the asset or security itself, or it can be a function of the investment structure being utilized (e.g., a limited partnership).

Due to the fact that Private Risk Assets are not publicly traded, pricing and performance measurements prior to the realization of gains are less reliable than in the traditional publicly traded asset classes. The Systems continually monitor the valuation policies and procedures utilized for such investments.

Structure

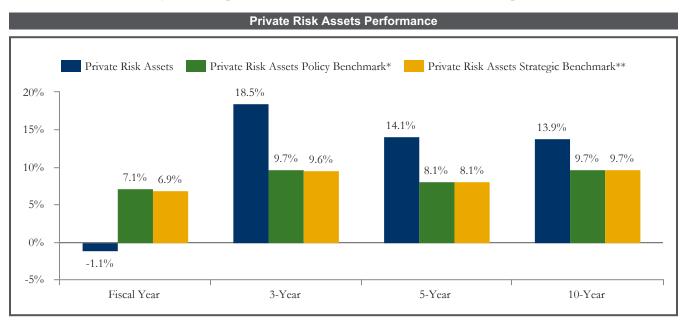

As of June 30, 2023, 53.7% of Private Risk Assets were invested in the Private Equity program, 30.6% in the Private Real Estate program and 15.7% in the Private Credit program. Each of these programs is discussed in more detail on the following pages.

Performance

The total return for the Private Risk portfolio was -1.1% compared to the policy benchmark return of 7.1% for the fiscal year ended June 30, 2023. The pricing and performance methodology utilized for private assets can provide for significant performance variances over short time periods. For instance, the Systems utilize liquid benchmarks (e.g., Russell 3000 Index) to measure an illiquid (Private Equity) asset class. Thus, there will be significant performance differences over short time periods in volatile markets. Due to the long-term nature of Private Risk assets, the performance can be more appropriately judged over a longer timeframe. As the table below indicates, the Private Risk portfolio has produced excellent absolute and relative returns over all extended time periods. The ten-year return exceeded the benchmark by 420 basis points. These excess returns are net of fees and expenses.

Private Risk Assets Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Private Risk Assets Return	-1.1%	18.5%	14.1%	13.9%	
Annualized Policy Benchmark Return*	7.1%	9.7%	8.1%	9.7%	
Annualized Strategic Benchmark Return**	6.9%	9.6%	8.1%	9.7%	
Excess Return	-8.2%	8.8%	6.0%	4.2%	

^{*} The Private Risk Assets Policy Benchmark is composed as follows: 39.6% Russell 3000 Index, 30.5% NFI-ODCE Index, 13.2% MSCI ACWI ex-USA net Index and 16.7% ICE Bof.A U.S. High Yield Index.

^{**} The Private Risk Assets Strategic Benchmark changes monthly based on the actual asset allocation at the end of the previous month.

Private Equity Program Summary

As of June 30, 2023, the Private Equity program had a fair value of approximately \$9.9 billion, representing 18.0% of total plan assets.

Investment Program Description

The Private Equity asset class is comprised of investment opportunities not typically included within the public equity and fixed income markets. Private Equity investments provide financing for start-up companies, private middle market companies, firms in financial distress and public and non-public firms seeking buyout financing. Private Equity investments can be classified into three basic sub-asset class categories:

- Venture Capital,
- · Buyouts, and
- Debt-Related.

Investments in the sub-asset classes can be made in the U.S. or foreign countries. In total, the allocation to non-U.S. Private Equity investments will not exceed 50.0% of the overall Private Equity target allocation. The risks associated with Private Equity will be viewed both in isolation and within the context of the entire fund.

In January 2014, the Board of Trustees approved the development and implementation of a Private Equity Co-Investment program. The full implementation of the Co-Investment program has advanced the goals and objectives of the overall Private Equity program by obtaining additional exposure to underlying portfolio company investments through direct equity investments made on a side-by-side basis with private equity funds where the Systems have an existing relationship. Co-Investments serve to increase exposure to the Private Equity asset class with little or no additional fees and/or performance carry paid to the underlying private equity partnerships. The objective of the Co-Investment program is to leverage existing, high-quality relationships with private equity managers in order to increase commitments to the asset class in a format that does not materially increase overall risk, while simultaneously helping to lower fees and performance carry.

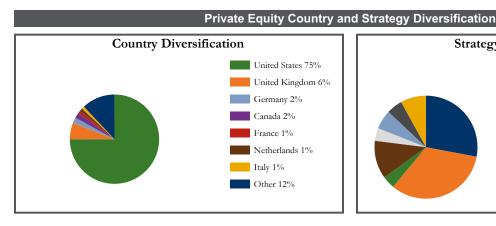

Structure

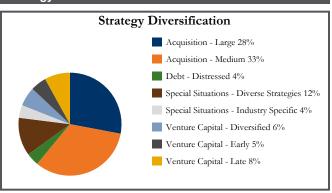

As of June 30, 2023, Private Equity assets committed* for investment were \$15.4 billion. The fair value of funds that had been drawn down and actually invested as of June 30, 2023 was approximately \$9.9 billion, representing 18.0% of total plan assets. The Systems' private equity investment commitments that have not yet been funded were approximately \$4.2 billion as of June 30, 2023.

The objective of the Systems' allocation to Private Equity is to achieve returns that are higher than those attainable in the public equity markets with the added benefit of diversification. The long-term and illiquid nature of the Private Equity asset class dictates that capital must be invested at a measured pace. Pathway Capital Management has been retained by the Systems to provide private equity investment management services through three structures; a discretionary fund-of-funds relationship, an advisory relationship and a co-investment program. Additionally, the Systems have invested in private equity secondary funds and also utilize Albourne America, LLC to provide private equity advisory services.

The pie charts on the following page show the diversification (utilizing the fair value of invested assets) of the Systems' Private Equity holdings as of June 30, 2023 from both strategy and country perspectives.

^{*} Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds.

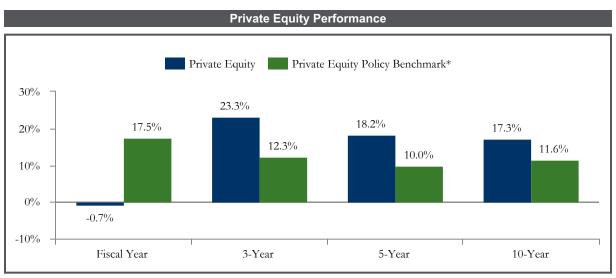

Market Overview

Private equity markets declined throughout fiscal year 2023. The buyout and venture capital segments experienced sharp declines in investment activity after recent record setting years due to rapidly rising interest rates, an uncertain economic environment and constrained financial markets. For fiscal year 2023, the Systems' private equity program experienced its first negative return since fiscal year 2009, after several recent years of very strong returns.

Performance

The total return for the Private Equity program was -0.7%, compared to the benchmark return of 17.5% for the fiscal year ended June 30, 2023. The Private Equity benchmark utilizes a blend of liquid public equity indices (e.g., Russell 3000 Index) to measure an illiquid (Private Equity) asset class. As such, there could be significant performance differences over short time periods in volatile markets. Due to the long-term nature of the asset class, the performance of a Private Equity portfolio can be more appropriately judged over a longer timeframe. As the table below indicates, the Private Equity portfolio has produced excellent absolute and relative returns over all extended time periods. The ten-year return exceeded the benchmark by 570 basis points. These excess returns are net of fees and expenses.

Private Equity Statistical Performance					
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year	
Annualized Private Equity Return	-0.7%	23.3%	18.2%	17.3%	
Annualized Policy Benchmark Return*	17.5%	12.3%	10.0%	11.6%	
Excess Return	-18.2%	11.0%	8.2%	5.7%	

^{*} Effective October 1, 2019 the Private Equity Policy Benchmark is 75% Russell 3000 Index and 25% MSCI ACWI ex-USA net Index. The Russell 3000 Index is used for prior periods.

Private Equity Partnerships

As of June 30, 2023, the Systems were invested in 246 separate partnerships with 82 firms within the Private Equity asset class. In fiscal year 2023, the Systems committed to 15 new partnerships for \$452 million. Additionally, the Systems received total distributions from the private equity partnerships of approximately \$871 million in fiscal year 2023.

INVESTMENT SECTION

Private Credit Program Summary

As of June 30, 2023, the Private Credit program had a fair value of approximately \$2.9 billion, representing 5.3% of total plan assets.

Investment Program Description

Investments in Private Credit are similar to Private Equity investments in that they are typically very longterm in nature, not publicly traded, relatively illiquid, and offer the potential for substantially higher returns (along with a commensurate level of risk). The Private Credit portfolio also differs from the Private Equity portfolio and is a separate and distinct composite within Private Risk Assets. The Private Credit asset class is comprised primarily of credit and credit-oriented investments that often provide a current yield, but also includes a wide range of investments and security types including various forms of equity exposure. Primary strategies are distressed debt, direct lending, bankruptcy restructurings, mezzanine debt, bank loans and other credit-driven, income-focused and debt-oriented investment strategies. Investments can be made in the U.S. or foreign countries. In total, the allocation to non-U.S. Private Credit investments will not exceed 50% of the overall Private Credit target allocation. The risks associated with Private Credit will be viewed both in isolation and within the context of the entire fund.

In October 2019 the Board of Trustees approved the development and implementation of a Private Credit Direct Investment program. The Direct Investment program is expected to further advance the goals and objectives of the overall Private Credit program by obtaining additional exposure to underlying credit and credit-related investments. This exposure may be obtained through co-investments made on a side-by-side basis with private credit funds, real estate funds, and credit oriented and real estate oriented fund managers where the Systems are an investor or by investing in debt-oriented securities associated with private equity portfolio companies where the original equity investment occurred through private equity funds that the Systems have an existing relationship with. The Direct Investments serve to increase exposure to the Private Credit asset class with little or no additional fees and/or performance carry paid to the underlying private equity or private credit partnerships. The objective of the Direct Investment Program is to leverage existing, highquality relationships with private credit, credit-oriented, real estate and private equity managers in order to increase commitments to the asset class in a format that does not materially increase overall risk, while simultaneously helping to lower fees and performance carry.

Structure

As of June 30, 2023, Private Credit assets committed* for investment were \$5.3 billion. The fair value of funds that have been drawn down and actually invested as of June 30, 2023 was approximately \$2.9 billion, representing 5.3% of total assets. The Systems' private credit investment commitments that have not yet been funded were approximately \$1.6 billion as of June 30, 2023.

The objective for the Systems' allocation to Private Credit is to achieve returns that are higher than those attainable in the public markets with the added benefit of diversification. The long-term and illiquid nature of the Private Credit asset class dictates that capital must be invested at a measured pace. Pathway Capital Management has been retained by the Systems to provide private credit investment management services through three structures; a discretionary fund-of-funds relationship, an advisory relationship, and a direct investment program. Albourne America, LLC has also been retained to provide private credit advisory services.

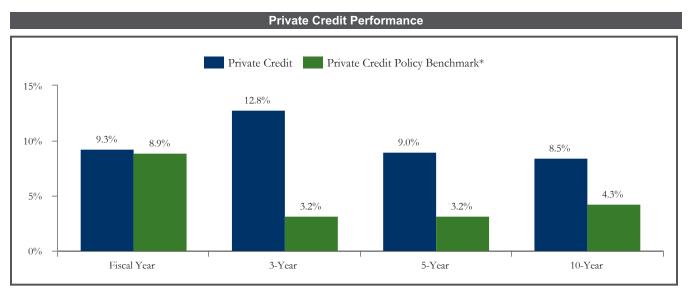

Market Overview

Credit markets were resilient during fiscal year 2023 despite many headwinds including aggressive Fed funds rate hikes, increased interest rate and spread volatility, and the emergence of regional banking stress. The high yield market as measured by the private credit benchmark, ICE BofA U.S. High Yield Index, returned 8.9% for fiscal year 2023 as compared to a -12.7% return for fiscal year 2022. The recent market volatility has led to a decrease in high yield bond issuance activity throughout the year however, indicators of distress in the high yield credit market remains low.

^{*} Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds.

Performance

The total return for the Private Credit program was 9.3% compared to the benchmark return of 8.9% for the fiscal year ended June 30, 2023. Short-term returns can be volatile for the Private Credit program in comparison to a public benchmark, as discussed previously; private assets are more appropriately evaluated over longer time frames. As the table below indicates, the Private Credit portfolio has produced significant absolute and relative returns over all reported time periods. The ten-year return exceeded the benchmark by 420 basis points. These excess returns are net of fees and expenses.

		Private Credit Statistical Performance										
cal Year	3-Year	5-Year	10-Year

^{*} The Private Credit Policy Benchmark is the ICE BofA U.S. High Yield Index.

Private Credit Partnerships

As of June 30, 2023, the Systems were invested in 42 separate partnerships with 22 firms within the Private Credit asset class. Five new commitments were made to the Private Credit asset class during fiscal year 2023 for \$360 million. The Systems received total distributions from the private credit partnerships of approximately \$447 million in fiscal year 2023.

INVESTMENT SECTION

Private Real Estate Program Summary

As of June 30, 2023, the Private Real Estate program had a fair value of approximately \$5.6 billion, representing 10.3% of total plan assets.

Investment Program Description

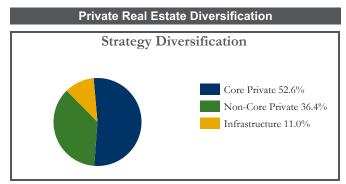

The Real Estate allocation is intended to provide exposure to a diversified portfolio of institutional quality private real estate investments that will provide meaningful, consistent returns and act as a hedge against inflation and as a diversifier to the overall investment portfolio. The specific objectives of the real estate allocation will be to optimize yield and return, preserve capital and enhance portfolio value across market cycles. The risks associated with Private Real Estate will be viewed both in isolation and within the context of the entire fund.

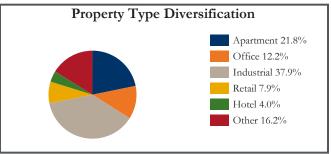

Structure

As of June 30, 2023, the Systems' Private Real Estate assets committed* for investment were \$7.9 billion. The fair value of funds that had been drawn down and actually invested as of June 30, 2023 was approximately \$5.6 billion, representing 10.3% of total assets. The Systems' private real estate investment commitments that had not yet been funded were approximately \$2.1 billion as of June 30, 2023.

Within the overall Real Estate allocation, the Systems have established a 55% target allocation to non-core real estate (inclusive of infrastructure) and a 45% allocation to core private real estate. Non-core investments represent those properties and/or investment strategies that require specialized acquisition and management expertise or skill to mitigate the business and leasing risk that may be associated with individual investments. Non-core investments have greater associated risk compared to core investments. Core investments include existing, substantially leased income-producing properties located mainly in metropolitan areas that exhibit reasonable economic diversification and growth.

* Committed capital reflects the total amount of capital that the Systems are legally obligated to supply to the partnerships and funds as the capital is needed to invest in underlying holdings. Fair value reflects capital that has actually been drawn and invested by the partnerships and funds. The following pie charts indicate the diversification (utilizing the fair value of invested assets) of the Systems' Real Estate holdings as of June 30, 2023 from both the strategy and property type perspectives.

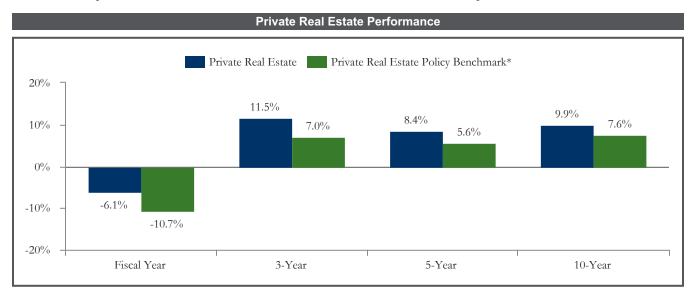

Market Overview

The Private Real Estate benchmark, NCREIF Fund Index – Open Diversified Core Equity (NFI-ODCE), returned -10.7% for fiscal year 2023 compared to a 28.3% return for fiscal year 2022. After producing a historically high return in fiscal year 2022, the real estate market experienced increased borrowing costs and significant repricing throughout fiscal year 2023 resulting in the largest 1-year negative return in the NFI-ODCE index since 2010. Real estate values declined across all property sectors for the year with the office sector being the largest contributor to the negative return.

The Systems maintain a sizable allocation to high-quality, stabilized real estate assets (core) due to the secure income return. Additionally, the Systems have an allocation to non-core assets to enhance return to the overall real estate portfolio. The Systems will continue to focus real estate efforts on investments that complement the existing portfolio.

Performance

The total return for the Private Real Estate program was -6.1% compared to the benchmark return of -10.7% resulting in 460 basis points of excess return for the fiscal year ended June 30, 2023. Despite the negative return for the year, the Systems' Private Real Estate program has produced very strong absolute and relative returns for all extended time periods as noted below. These excess returns are net of fees and expenses.

Private Real Estate Statistical Performance										
Portfolio Characteristics	Fiscal Year	3-Year	5-Year	10-Year						
Annualized Private Real Estate Return	-6.1 %	11.5%	8.4 %	9.9%						
Annualized Policy Benchmark Return*	-10.7 %	7.0%	5.6%	7.6%						
Excess Return	4.6%	4.5%	2.8%	2.3%						

^{*} Effective January 1, 2016, the Real Estate Policy Benchmark is the NCREIF Open End Diversified Core Equity Index (NFI-ODCE). The NCREIF Property Index is used for prior periods.

Private Real Estate Partnerships

As of June 30, 2023, the Systems were invested in 85 separate partnerships with 39 firms within the Private Real Estate asset class. In fiscal year 2023, the Systems committed to 5 new partnerships totaling \$525 million. The Systems also received total distributions from the real estate partnerships of approximately \$383 million during the year.

ACCIAldet to Excel

We take pride in our ability to find solutions, to adapt to situations as they develop and to excel at what we do. What does it take to excel? First, the willingness and ability to change, sometimes relatively quickly. Second, it takes an overall organizational philosophy that supports adaptation and makes it a seamless part of everyday operations. Third, it takes bigger picture thinking and genuine pride in what one does. At PSRS/PEERS, we rise to the occasion and adapt to the new normal with grace and resilience.

Certification of Actuarial Results

November 27, 2023

Board of Trustees Public School Retirement System of Missouri Public Education Employee Retirement System of Missouri 3210 West Truman Boulevard Jefferson City, MO 65109

Re: Certification of Actuarial Results as of June 30, 2023

Dear Members of the Board:

At your request, we have performed actuarial valuations of the Public School Retirement System ("PSRS") and the Public Education Employee Retirement System ("PEERS") of Missouri as of June 30, 2023. An actuarial valuation of each System is performed annually for purposes of preparing the required accounting information under Governmental Accounting Standards and for purposes of determining the Actuarially Determined Contribution under the Board's funding policy. Our June 30, 2023 actuarial valuation reports have been prepared pursuant to an engagement letter between PSRS and PEERS of Missouri and PwC US and are intended solely for the use and benefits of PSRS and PEERS of Missouri and not for reliance by any other person.

The actuarial valuations are based upon:

- a. Benefit Provisions Our understanding of the benefit provisions in effect on the valuation date under Missouri Revised Statutes Chapter 169 which include the amendments of Senate Bill 75 and Senate Bill 20 (HCS/SS/SB 75 and CCS/SB 20) that were passed prior to the June 30, 2023 valuation date. Senate Bill 75 fully encompasses the changes made by Senate Bill 20 (Senate Bill 20 included the same provisions as Senate Bill 75 except for the "pop-up" provision for certain retirees who nominated a same-sex domestic partner). Therefore, we focus on the impact of Senate Bill 75 which contained the following provisions that became became effective on August 28, 2023:
 - Provide a 2.55% benefit factor for PSRS members who have 32 or more years of service at retirement
 - Increase the salary limit for PSRS retirees working in non-certificated positions to 133% of the annual Social Security earnings limit from August 28, 2023 to June 30, 2028, and then to 100% of the annual Social Security earnings limit thereafter which would increase the employer contributions made to PEERS
 - Modify the Critical Shortage Employment provision to expand the allowed lifetime limit on time worked from two years to four
 years and increase the potential number of Critical Shortage positions available for PSRS retirees who are teaching
 - Allow certain retirees who nominated a same-sex domestic partner as beneficiary for lifetime monthly benefits under a Joint-and-Survivor benefit option to have their monthly retirement benefit "pop-up" to the amount they would have received if they had not elected to receive reduced monthly benefits
- b. Data Relative to the Members of the Systems Data for all members of each System as of June 30, 2023 was provided by PSRS and PEERS of Missouri staff. PwC US relied on the data provided. PwC US reviewed the data for reasonableness relative to the prior year data, but the data was not audited.
- c. Assets of the Fund The values of the trust fund assets as of June 30, 2023 for each System were also provided by PSRS and PEERS of Missouri. An actuarial value of assets, with investment gains and losses relative to the assumed return recognized over five years, is used in the development of the Actuarially Determined Contribution Rates.
- d. Actuarial Cost Method The actuarial cost method utilized for accounting purposes is the Entry Age Normal, Level Percent method, as required by GASB Statement No. 67. The Board has elected in its funding policy to use the same cost method in the determination of the Actuarially Determined Contribution Rates. The objective of this method is to allocate the cost of benefits as a level percentage of pay over the entire career of each member. On a funding basis, any Unfunded Actuarial Accrued Liability ("UAAL") is separately financed as a level percentage of payroll over a fixed 30-year period, where a new 30-year amortization base is established for the gain or loss that occurred during the year prior to the valuation date. Increases in the Actuarial Accrued Liability caused by changes in the benefit provisions are amortized over a fixed 20-year period. The passage of Senate Bill 75 (HCS/SS/SB 75) resulted in a decrease in the Actuarial Accrued Liability for PSRS and the gain was amortized over a 30-year period. There was no impact on the Actuarial Accrued Liability for PEERS related to this legislation.

PwC US, One North Wacker Drive Chicago, IL,60606 T: (312) 298 2000, F: (312) 298 2001, www.pwc.com/us

Certification of Actuarial Results, continued

e. Actuarial Assumptions - The actuarial assumptions used for the June 30, 2023 valuations were based on an experience study that was completed for each System in May 2021. All economic and demographic assumptions were reviewed and certain assumptions were updated for the June 30, 2021 valuations, where appropriate, based on the results of the 2021 experience study. The retirement rates assumption was updated for the June 30, 2023 PSRS valuation due to the passage of Senate Bill 75 (HCS/SS/SB 75). Otherwise the assumptions remain consistent with the June 30, 2021 and June 30, 2022 valuations. The next experience study is scheduled to be completed prior to the 2026 valuation.

For accounting purposes, the actuarial assumptions and methods used in this valuation were selected and approved by the Board and are in accordance with our understanding of GASB Statement No. 67.

For funding purposes, the actuarial assumptions and methods were selected and approved by the Board and are consistent with the funding policy adopted by the Board and summarized below. In general, the methods provide orderly funding of all benefits being accrued, as well as funding of the Unfunded Actuarial Accrued Liability over a period of 30 years. The five-year smoothing method elected by the Board in determining the Actuarial Value of Assets may accelerate or lengthen the effective funding period, depending on whether investment gains or losses are experienced. In our opinion, the actuarial assumptions and methods are reasonable for purposes of the actuarial valuations and meet the parameters set by the Actuarial Standards of Practice.

In order to establish long-term, consistent methods for pre-funding the benefits of each System, the Board of Trustees has adopted a funding policy. The objective is to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, the funded ratio is defined as the Actuarial Value of Assets divided by the Actuarial Accrued Liability determined under the Entry Age Normal Level Percent cost method and the actuarial assumptions adopted by the Board.

The Board has identified the following principles to guide its funding policy:

- Maintain adequate assets so that current plan assets plus future contributions and investment earnings should be sufficient to fund all benefits expected to be paid to members and their beneficiaries.
- 2. Maintain stability of contribution rates, consistent with other funding objectives.
- 3. Maintain public policy goals of accountability and transparency. Each policy element is clear in intent and effect, and each should allow an assessment of whether, how, and when the funding requirements of the plan will be met.
- 4. Promote intergenerational equity. Each generation of members and employers should incur the cost of benefits for the employees who provide services to them, rather than deferring those costs to future members and employers.
- 5. Provide a reasonable margin for adverse experience to help offset risks.
- Review the investment earnings assumption in conjunction with the periodic asset / liability study and in consideration of the Board's risk profile.
- 7. Review demographic and economic assumptions in conjunction with the periodic experience study performed by an actuary.
- 8. Continue progress of systematic reduction of the Unfunded Actuarial Accrued Liabilities ("UAAL") while keeping the member and employer contribution rates at or near 14.5% of pay for PSRS and 6.86% of pay for PEERS, the contribution rates first paid during 2011-2012.

The Actuarially Determined Contribution Rates developed from the June 30, 2023 valuations reflect these principles.

We provide the following information that was used by PSRS and PEERS of Missouri staff to prepare the required schedules and other data in the Actuarial Section:

- · Schedules of Funding Progress
- Required Contribution Rates and Amortizations of Unfunded Liability
- Reconciliation of Unfunded Actuarial Accrued Liability
- Solvency Tests
- Schedules of Active Member Valuation Data
- Schedules of Retirees and Beneficiaries Added to and Removed from Retirement Rolls

We also provided the information that was used by PSRS and PEERS of Missouri staff to prepare the following schedules and other data in the Financial Section:

- Sensitivity of the Net Pension Liabilities to Changes in the Discount Rate
- Schedules of Changes in the Employers' Net Pension Liability
- Schedules of Employers' Net Pension Liability
- Schedules of Employer Contributions

In preparing the results presented herein, we have used and evaluated actuarial models in accordance with Actuarial Standards of Practice ("ASOP") No. 56. PwC US uses the ProVal valuation system developed by Winklevoss Technologies, LLC in performing valuations of pension and postretirement benefit plans. We have utilized the ProVal software to prepare the valuation results presented herein. ProVal is used to value participant data through projecting retirement benefits and applying plan specific assumptions, methods and plan provisions under applicable accounting and funding standards. PwC US is not aware of any material limitations or known weaknesses in the ProVal software.

A range of results, different from those presented in this report could be considered reasonable. Future actuarial measurements may differ significantly from the current measurement presented in this report due to a number of factors including but not limited to: plan experience differing from that anticipated by the economic and demographic assumptions; increases or decreases expected as part of the natural operation of the methods used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); rounding conventions; and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

To the best of our knowledge, our actuarial reports are complete and accurate and have been prepared in accordance with generally accepted actuarial principles and practices and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. Our calculations also reflect our understanding of the requirements of Missouri state law. The undersigned actuaries are members of the Society of Actuaries and other professional organizations, including the American Academy of Actuaries, and meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States relating to pension plans. There is no relationship between the PwC US practitioners involved in this engagement and PSRS and PEERS of Missouri that may impair our objectivity.

We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Plans administered by PSRS and PEERS of Missouri as of June 30, 2023 based on the underlying census data, asset information and selected assumptions and methods.

Sincerely,

Cindy Fraterrigo, FSA, EA, MAAA Principal, PwC US Tax LLP

Cirdy Draturiza

PSRS Summary Plan Description

The Public School Retirement System of Missouri (PSRS) became operative July 1, 1946. It was established by an Act of the Missouri Legislature and is governed by Chapter 169 of the Revised Statutes of Missouri. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PSRS is a defined benefit plan funded on an actuarial reserve basis, which establishes the availability of funds to pay benefits as prescribed by law. The System is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

Administration – The administration of PSRS is vested in a seven-member Board of Trustees, composed of three elected active PSRS members, one elected active Public Education Employee Retirement System of Missouri (PEERS) member, and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both Systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or a PEERS retiree, are named by the governor to serve four-year terms. The appointed trustees must be residents of school districts included in the System but not employees of such districts nor state employees nor state elected officials.

The Board appoints an executive director who is responsible for employment of the retirement office staff, routine operation of the System, and acts as an advisor to the Board on all matters pertaining to the System.

Member Participation – PSRS membership is automatic for certificated, full-time employees of public school districts in Missouri (except the St. Louis city and the Kansas City school districts), public two-year colleges in Missouri, PSRS and certain statewide non-profit educational associations that have previously elected to join. Non-profit educational associations are no longer allowed to join the System. Certificated, part-time employees whose services would qualify them for membership in PEERS are contributing members of PSRS unless PEERS membership is elected. The vast majority of PSRS members are not covered by Social Security. However, there are a few exceptions due to

specific guidance from the Social Security Administration. Those members who are also covered by Social Security contribute to PSRS at two-thirds the rate of other members and receive two-thirds benefits.

Members working in covered employment are considered active members. Such members contribute 14.5% of total retirement salary to PSRS. The contributions are deducted and remitted by the employer and are credited by PSRS to individual member accounts. Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRC 414(h)(2). Contributions are not considered income for such purposes until they are paid as a lump-sum refund or monthly benefits.

Interest at a rate set each year by the Board of Trustees is credited to individual member accounts each June 30 on the previous June 30 balance. The interest rate, set annually by the Board, was 2.0% on June 30, 2023. Since PSRS is a defined benefit plan, benefits are based upon the member's final average salary and years of service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

In addition to service earned for covered employment, members may purchase service in various categories including several types of leave, out-of-state school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-Employment Rights Act of 1994 (USERRA).

Members who have contributions on deposit with PSRS but are not working in covered employment are considered inactive members.

Employer Participation – The employers served by PSRS withhold members' contributions from salary payments and contribute an amount equal to those contributions at a current rate of 14.5% of payroll. Employer contributions and investment earnings on those funds are placed by PSRS in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. Employers are responsible for remitting contributions promptly and for furnishing contribution information and new membership information to PSRS. Employers also provide needed data when members apply for monthly benefits or for refunds upon termination of employment.

Survivor Benefits – The designated beneficiary of a member who dies before retirement is eligible for a lump-sum refund of the member's contributions and interest. If the beneficiary is an eligible dependent and the member dies while in covered employment with at least two years of service, or while eligible for disability retirement benefits, monthly survivor benefits based on a percentage of the member's salary for the last full year of covered service can be elected instead of a lump-sum refund. Monthly survivor benefits may also be payable to qualified dependents of an inactive member who has at least five years of service.

In lieu of a lump-sum refund or monthly survivor benefits, survivors with an insurable interest and beneficiaries of disability retirees may elect to receive monthly benefits under the Joint-and-Survivor 100% benefit plan. Such benefits are payable when the member would have been eligible for early or normal service retirement.

Refund of Contributions – Member contributions and interest are fully refundable upon termination of covered employment or death. All service and benefit rights are forfeited upon voluntary refund or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the service forfeited through termination of a previous membership by repaying the money refunded plus interest.

Membership Termination – Membership is terminated by death, retirement, refund of contributions or absence from covered employment by a non-vested member for five consecutive school years.

Disability Retirement Benefits – Disability retirement benefits are payable to eligible members who have met service and eligibility requirements and who, because of permanent disability, are unable to earn a livelihood in any occupation. In most instances, the disability retirement benefit is calculated at 50% of the member's salary for the last full year of service.

Service Retirement Benefits – Service retirement benefits are payable to members who have terminated covered employment and have met certain eligibility requirements.

Benefit Formula – All service retirement benefits are based on a formula which multiplies final average salary by the applicable benefit factor, by the years of service

and, in the case of early retirement, by an age-reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service by 36 months to arrive at a monthly average; the applicable factor is determined by the type of retirement eligibility; total service is the amount accumulated at retirement for covered employment and purchased service; and the age-reduction factor, when applicable, is determined by the age at retirement.

Normal Retirement – A member may retire with benefits calculated under the standard (2.5%) benefit factor at age 60 with five years of service, at any age with 30 years of service, or when a combination of age and service equals 80 or more. Effective August 28, 2023 members with 32 years or more of service may retire under a 2.55% benefit factor.

Early Retirement – A member may retire with benefits calculated under the standard (2.5%) formula with an age-reduction factor applied, at age 55 with five years of service or at any age with 25 years of service, as long as they do not qualify for Rule of 80.

A special provision allows members under age 55 with 25.0 to 29.9 years of service to retire with benefits calculated under a modified benefit factor ranging from 2.2% to 2.4% with no age-reduction factor applied.

Payment Options – A retiring member may choose to receive the maximum benefits payable under the Single Life benefit plan, or may elect to receive a reduced benefit under one of three Joint-and-Survivor benefit plans or under one of two Term-Certain benefit plans, to provide survivor benefit coverage in varying degrees after the retiree's death.

Certain benefit minimums apply to normal or early retirement with 15 or more years of service. The minimums for 15 but fewer than 25 years of service are reduced if a Joint-and-Survivor or a Term-Certain benefit plan is elected and/or if an age-reduction factor is applicable because of early retirement. The minimums for 25 or more years of service are reduced only if a Joint-and-Survivor or a Term-Certain benefit plan is selected.

The Partial Lump Sum Option (PLSO) is available to qualified members. This option allows qualified members to choose to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time, lump-sum payment at retirement.

Cost-of-Living Adjustments – Cost-of-living adjustments (COLAs) are provided beginning the second January after retirement to service and disability retirees, and to Joint-and-Survivor and Term-Certain beneficiaries of deceased retirees. Lifetime COLAs are limited to 80% of the original retirement benefit.

The Department of Labor Consumer Price Index for Urban Consumers (CPI-U) for the previous fiscal year is used as a guideline for the annual COLA which is set by the Board. By law, if the change in CPI-U is 2% or more, the COLA must be at least 2%, but no more than 5%. If the change in CPI-U is between 0% and 2%, the Board may grant a COLA of 0% to 5%. If the change in CPI-U is less than 0%, no increase can be given. If it is 5% or more, the Board is required to give a 5% increase. Under the funding policies adopted by the Board, the following applies:

- If the June to June change in the CPI-U is less than 2% for consecutive one-year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

Member Handbook – A *Member Handbook* containing detailed information concerning the retirement program is available on our website or can be obtained from the retirement office upon request.

PEERS Summary Plan Description

The Public Education Employee Retirement System of Missouri (PEERS) was established by an Act of the Missouri Legislature to begin operations on November 1, 1965, and is governed by Chapter 169 of the Revised Statutes of Missouri. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PEERS is a defined benefit plan funded on an actuarial reserve basis, which establishes the availability of funds to pay benefits as prescribed by law. The System is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

Administration – The law provides that the responsibility for the operation and administration of the retirement system is vested in the Public School Retirement System of Missouri (PSRS) Board of Trustees sitting as the Board of Trustees for PEERS. The Board is comprised of three elected active PSRS members, one elected active PEERS member and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both Systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or a PEERS retiree, are named by the governor to serve four-year terms. The appointed trustees must be residents of school districts included in the System but not employees of such districts nor state employees nor state elected officials.

The Board appoints an executive director who is responsible for employment of the retirement office staff, routine operation of the System, and acts as an advisor to the Board on all matters pertaining to the System.

Member Participation – PEERS membership is automatic, regardless of position, for all persons not covered by PSRS who are employed for 20 or more hours a week on a regular basis in a position that normally requires at least 600 hours during the school term by the public school districts in Missouri (except the St. Louis city and the Kansas City school districts), public two-year colleges in Missouri (except St. Louis Community College), PSRS and statewide non-profit educational associations that have elected to join.

Members working in covered employment are considered active members. Such members contribute 6.86% of their total retirement salary to PEERS. The contributions are deducted by the employer and are credited by PEERS to individual member accounts. PEERS members are also covered by Social Security.

PEERS membership can be elected by employees with Missouri educator certificates who work in any position for 17 or more hours weekly but less than full time; however, PSRS membership is automatic if a PEERS election is not made. The election to join PEERS must be filed with the Board within 90 days after entering first time, part-time employment.

Since July 1, 1989, member contributions have been taxdeferred for federal and state income tax purposes under IRC 414(h)(2). Contributions are not considered as income for federal or state income tax purposes until they are paid in a lump-sum refund or in monthly benefits.

Individual accounts are maintained for all PEERS members. Interest is credited each June 30 on the previous June 30 balance. The interest rate, set annually by the Board, was 2.0% on June 30, 2023. Since PEERS is a defined benefit plan, benefits are based upon the member's final average salary and years of service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

In addition to service earned for covered employment, members may purchase service in various categories including several types of leave, out-of-state school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Members who have contributions on deposit with PEERS but are not currently working in covered employment are considered inactive members.

Employer Participation – The employers served by PEERS withhold members' contributions from salary payments and contribute an amount equal to employee contributions at a current rate of 6.86% of payroll. Employer contributions and investment earnings on those funds are placed in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. It is the responsibility of the employers to remit contributions promptly and

for furnishing contribution information and new membership information to PEERS. Employers also provide needed data when members apply for benefits or refund of contributions upon termination of employment.

Survivor Benefits – When a member dies before retirement, the designated beneficiary becomes eligible for a lump-sum refund of the employee's contributions and interest. In lieu of a lump-sum refund, survivors with an insurable interest and beneficiaries of disability retirees may elect to receive monthly benefits under the Joint-and-Survivor 100% benefit plan. Such benefits are payable when the member would have been eligible for early or normal service retirement.

Refund of Contributions – Member contributions and interest are fully refundable upon termination of covered employment or death. All service and benefit rights are forfeited upon voluntary refund or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the service forfeited through termination of a previous membership by repaying the money refunded plus interest.

Membership Termination – Membership is terminated by death, retirement, refund of contributions or absence from covered employment by a non-vested member for five consecutive school years.

Disability Retirement Benefits – Disability retirement benefits are payable to members who have met service and eligibility requirements and who, because of permanent disability, are unable to earn a livelihood in any occupation. The disability retirement benefit is calculated at 90% of the normal service retirement benefit.

Service Retirement Benefits – Service retirement benefits are payable to members who have terminated covered employment and who have met certain eligibility requirements.

Benefit Formula – All service retirement benefits are based on a formula which multiplies final average salary by the applicable benefit factor, by the years of service and, in the case of early retirement, by an age-reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service by 36 months to arrive at a monthly average; the applicable factor is determined by the type of retirement

eligibility; total service is the amount accumulated at retirement for covered employment and purchased service; and the age-reduction factor, when applicable, is determined by the age at retirement.

Because of the conversion of the System from a formula integrated with Social Security to the present basis, a special "frozen benefit" is in effect for certain members for service prior to July 1, 1973.

Normal Retirement – A member may retire with benefits calculated under the standard (1.61%) formula at age 60 with five years of service, at any age with at least 30 years of service, and at the point where the member's age plus service equals 80 or more (Rule of 80). A member may retire under the standard (1.61%) formula when the member qualifies for Rule of 80 or 30-and-Out and will receive an additional 0.8% multiplier until reaching minimum eligibility age for Social Security benefits (currently age 62).

Early Retirement – A member may retire with benefits calculated under the standard (1.61%) formula with an age-reduction factor applied at age 55 with five years of service, or at any age with 25 years of service, as long as they do not qualify for Rule of 80.

A special provision allows members under age 55 with 25.0 to 29.9 years of service to retire with benefits calculated under a modified benefit factor ranging from 1.51% to 1.59% with no age-reduction factor applied.

Payment Options – A retiring member may choose to receive the maximum benefits payable under the Single Life benefit plan, or may choose to receive a reduced benefit under one of three Joint-and-Survivor benefit plans or under one of two Term-Certain benefit plans, to provide survivor benefit coverage in varying degrees after the retiree's death.

Another option, the Accelerated Payment Plan (APP), allows members to receive a higher PEERS benefit prior to minimum Social Security eligibility age (currently age 62). When the minimum Social Security eligibility age is attained, the member's PEERS benefit is reduced and remains at a reduced level for the remainder of their retirement.

The Partial Lump Sum Option (PLSO) is available to qualified members. This option allows qualified members to choose to have their lifetime monthly benefits actuarially reduced in exchange for the right to also receive a one-time, lump-sum payment at retirement.

Cost-of-Living Adjustments – Cost-of-living adjustments (COLAs) are provided starting the fourth January after retirement to service and disability retirees, and to Joint-and-Survivor and Term-Certain beneficiaries of deceased retirees. Lifetime COLAs are limited to 80% of the original retirement benefit.

The Department of Labor Consumer Price Index for Urban Consumers (CPI-U) for the previous fiscal year is used as a guideline for the annual COLA which is set by the Board of Trustees. By law, if the change in CPI-U is 2% or more, the COLA must be at least 2%, but no more than 5%. If the change in CPI-U is between 0% and 2%, the Board may grant a COLA of 0% to 5%. If the change in CPI-U is less than 0%, no increase can be given. If it is 5% or more, the Board is required to give a 5% increase. Under the funding policies adopted by the Board, the following applies:

- If the June to June change in the CPI-U is less than 2% for consecutive one-year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

Member Handbook – A Member Handbook

containing detailed information concerning the retirement program is available on our website or can be obtained from the retirement office upon request.

PSRS and PEERS Summary of Actuarial Assumptions and Methods

The Board is responsible for the adoption of the Systems' Funding Policies and assumptions. A summary of the current Funding Policy is included in the Certification of Actuarial Results.

The actuarial assumptions and methods utilized for funding and financial reporting purposes differ slightly. The primary difference between the two methods is the fact that financial reporting requires the recognition of investment gains at market with no smoothing.

Inflation

Inflation is assumed to be 2.00% per annum. (effective 6/30/21)

Payroll Growth

Total payroll growth for PSRS is assumed to be 2.25% per annum, consisting of 2.00% inflation, 0.125% real wage growth due to the inclusion of active health care costs in pension earnings, and 0.125% of real wage growth due to productivity. (effective 6/30/21)

Total payroll growth for PEERS is assumed to be 2.50% per annum, consisting of 2.00% inflation, 0.25% real wage growth due to the inclusion of active health care costs in pension earnings, and 0.25% of real wage growth due to productivity. (effective 6/30/21)

Individual Salary Growth

PSRS

Individual salaries are assumed to increase each year with inflation of 2.00%, real wage growth generated by the cost of active health care of 0.125% (since health care costs are included in pension earnings), real wage growth due to productivity of 0.125%, and additional real salary growth for merit, promotion, and seniority. (effective 6/30/21)

				Merit,	Total Individual
Service	Inflation	Health Care Cost	Productivity	Promotion, Seniority	Salary Growth
0	2.00%	0.125%	0.125%	6.625%	8.875%
1	2.00%	0.125%	0.125%	3.325%	5.575%
2	2.00%	0.125%	0.125%	2.775%	5.025%
3	2.00%	0.125%	0.125%	2.666%	4.916%

21	2.00%	0.25%	0.25%	0.85%	3.35%
22	2.00%	0.25%	0.25%	0.80%	3.30%
23+	2.00%	0.25%	0.25%	0.75%	3.25%

Investment Return

It is assumed that investments of the Systems will return a yield of 7.30% per annum, net of system expenses (investment and administrative). (effective 6/30/21)

Cost-of-Living Adjustments

The Board's cost-of-living adjustment policy is as follows:

- If the June to June change in the CPI-U is less than 2.00% for consecutive one-year periods, a cost-of-living increase of 2.00% will be granted when the cumulative increase is equal to or greater than 2.00%, at which point the cumulative increase in the CPI-U will be reset to zero. For the following year, the starting CPI-U will be based on the June value immediately preceding the January 1 at which the 2.00% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2.00%, but less than 5.00%, a cost-of-living increase of 2.00% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5.00%, a cost-of-living increase of 5.00% will be granted.

The actuarial assumption assumed a 2.0% COLA for January 1, 2024 and then 1.35% for all years thereafter.

The COLA applies to service retirements and beneficiary annuities. The COLA does not apply to the benefits for inservice death payable to spouses (where the spouse is over age 60), and does not apply to the spouse with children pre-retirement death benefit, the dependent children pre-retirement death benefit, or the dependent parent death benefit. The total lifetime COLA cannot exceed 80% of the original benefit. Future COLAs for current benefit recipients reflect actual cumulative adjustments granted at the time of valuation. (effective 6/30/21)

Mortality Rates

Active Member Mortality

PSRS

Mortality rates for PSRS active members are based on experience-adjusted PubT-2010 (Teachers) base mortality table for employees with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.10 at all ages for males and 1.04 at all ages for females. The Plan-specific experience adjustments are equivalent to the experience adjustment factors used for the retiree mortality rates. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

PSRS Active Member Mortality							
Age	Male	Female					
20	0.380	0.144					
30	0.314	0.186					
40	0.543	0.356					
50	1.150	0.729					
60	3.031	1.758					
70	7.345	4.608					

PEERS

Mortality rates for PEERS active members are based on experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for employees with generational projection using the MP-2020 improvement scale, multiplied by an adjustment factor of 1.13 at all ages for males and 0.94 at all ages for females. The Plan-specific experience adjustments are equivalent to the experience adjustment factors used for the retiree mortality rates. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

PEERS Active Member Mortality						
Age	Male	Female				
20	0.470	0.130				
30	0.760	0.228				
40	1.277	0.488				
50	2.319	0.965				
60	5.494	2.348				
70	10.908	5.384				

Service Retiree Mortality

PSRS

Mortality rates for PSRS non-disabled retirees are based on experience-adjusted PubT-2010 (Teachers) base mortality table for retirees with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.10 at all ages for males and 1.04 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

	PSRS Non-Disabled Retiree Mort	ality
Age	Male	Female
40	0.543	0.346
50	1.150	0.729
60	4.098	3.134
70	11.085	7.316
80	39.441	27.929
90	139.533	101.816
100	346.404	285.220
110	543.543	491.628

PEERS

Mortality rates for PEERS non-disabled retirees are based on experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for retirees with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.13 at all ages for males and 0.94 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

	PEERS Non-Disabled Retiree M	ortality
Age	Male	Female
40	1.277	0.488
50	7.670	3.790
60	12.769	5.259
70	22.199	10.211
80	62.227	32.768
90	175.692	110.953
100	355.852	257.795
110	558.367	444.356

Beneficiary and Survivor Mortality

PSRS

Mortality rates for PSRS beneficiaries and survivors are based on experience-adjusted PubT-2010 (Teachers) base mortality table for contingent survivors with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.18 at all ages for males and 1.07 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

	PSRS Beneficiary and Survivor Mo	ortality
Age	Male	Female
40	0.583	0.366
50	7.788	3.287
60	12.460	6.987
70	23.659	13.226
80	58.963	36.434
90	162.753	117.627
100	371.597	293.448
110	583.073	505.809

PEERS

Mortality rates for PEERS beneficiaries and survivors are based on experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for contingent survivors with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.01 at all ages for males and 1.07 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

	PEERS Beneficiary and Survivor Mo	ortality
Age	Male	Female
40	1.141	0.555

110	499.071	505.809

Disability Retiree Mortality

PSRS

Mortality rates for PSRS disabled retirees are based on experience-adjusted PubT-2010 (Teachers) base mortality table for disabled retirees with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.10 at all ages for males and 1.04 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

PSRS Disability Retiree Mortality						
Age	Male	Female				
40	8.348	7.221				
50	16.622	14.806				
60	28.728	21.355				
70	40.412	27.194				
80	75.352	59.536				
90	171.028	137.904				
100	346.404	285.220				
110	543.543	491.628				

PEERS

Mortality rates for PEERS disabled retirees are based on experience-adjusted PubG-2010 (General Employees) base mortality table for disabled retirees with generational projection using the MP-2020 improvement scale multiplied by an adjustment factor of 1.13 at all ages for males and 0.94 at all ages for females. Illustrative rates per 1,000 members at various ages are as follows (effective 6/30/21):

	PEERS Disability Retiree Mortality						
Age	Male	Female					
40	8.576	6.526					
50	17.075	13.383					
60	29.511	19.302					
70	41.514	24.579					
80	77.407	53.811					
90	175.692	124.644					
100	355.852	257.795					
110	558.367	444.356					

Retirement Rates

Retirement is assumed in accordance with the following rates per 1,000 eligible members (rates were effective 6/30/23 for PSRS and 6/30/21 for PEERS):

	PSRS Active Member Retirement												
						Yea	rs of Serv	ice

Withdrawal Rates

Termination of membership prior to eligibility for retirement from all causes other than death, disability or retirement is assumed in accordance with the following illustrative rates per 1,000 members: (effective 6/30/16):

PSRS Acti Member Witho		PEERS Act Member Witho	
Years of Service	Rate	Years of Service	Rate
0	240.0	0	350.0
1	115.0	1	230.0
2	100.0	2	180.0
3	80.0	3	150.0
4	70.0	4	125.0
5	60.0	5	100.0
10	28.0	10	55.0
15	15.0	15	33.0
20	10.0	20	18.0
25+	0.0	25+	0.0

Refund of Contributions

Active members who terminate employment with less than five years of service and inactive members with less than five years of service are assumed to take an immediate refund of their contributions.

Active members who terminate employment with five or more years of service, but prior to satisfying the age and service requirements for service retirement, and inactive members with five or more years of service are assumed to select the option that has the greater present value between an immediate refund of their contributions and a life annuity deferred to their earliest retirement age. (effective 6/30/16)

Active members who terminate employment with five or more years of service and satisfy the age and service requirements for service retirement upon termination, and inactive members with five or more years of service and currently eligible for service retirement are assumed to select an immediate life annuity. (effective 6/30/16)

Disability Rates

Retirement for disability prior to age 60 is assumed in accordance with the following illustrative rates per 1,000 eligible members:

PSRS A Member I (effective	Disability	Member	Active Disability 6/30/16)
Age	Rates	Age	Rates
25	0.0017%	25	0.0017%
30	0.0080%	30	0.0080%
35	0.0220%	35	0.0160%
40	0.0480%	40	0.0320%
45	0.0880%	45	0.0640%
50	0.1290%	50	0.1220%
55	0.1660%	55	0.2100%

Interest on Member Accounts

1.00% per annum (effective 6/30/21)

Service Purchases

A 0.75% load for PSRS (effective 6/30/21) and a 1.50% load for PEERS (effective 6/30/16) is added to the Normal Cost to account for anticipated losses resulting from service purchases and reinstatements.

Provisions for Expenses

There is no specific provision for expenses. The implicit assumption is that investment and administrative expenses are paid from investment income in excess of 7.3% per annum. (effective 6/30/21)

Dependent Assumptions

(effective 6/30/16)

- Marriage Assumptions (Pre-retirement) 70% of male and female members are assumed to be married. Beneficiaries are assumed to be of the opposite sex from the member. Male spouses are assumed to be two years older than female spouses.
- Beneficiary Assumptions (Post-retirement)
 Retired members, regardless of gender, are assumed to be three years older than their joint annuitant.

Survivor Benefits (Pre-retirement PSRS Only)

All active members under age 50 are assumed to have two dependent children. Each child is assumed to receive payments of \$860 per month for 18 years if the member is under age 32 and grading down to zero years if the member is age 50. (effective 6/30/16)

Return of Unused Member Account Balance

A cash refund feature is included in the valuation of annuity benefits to reflect that cumulative annuity payments to members may not be less than the amount of contributions paid by the member. (effective 6/30/16)

Actuarial Cost Method

The actuarial cost method is Entry Age Normal - Level Percent of Payroll.

The normal cost is calculated separately for each active member and is equal to the level percentage of payroll needed as an annual contribution from entry age to retirement age to fund projected benefits. The actuarial accrued liability on any valuation date is the accumulated value of such normal costs from entry age to the valuation date. (1947)

Asset Valuation Method

The Actuarial Value of Assets is a smoothed value of assets. The actuarial value at June 30 of the prior year is projected by increasing the amount by 7.3% interest, adding contributions with 7.3% interest for half the year, and subtracting benefit payments for half the year. Twenty percent of the difference between the actual returns at fair value for the year and expected return from the projection of the prior year actuarial value, along with corresponding amounts from each of the prior four years is added to the actuarial value. The Actuarial Value of Assets was reset to fair value at June 30, 2003. The methodology remains unchanged. (1994)

Amortization of Unfunded Actuarial Accrued Liability

Gains and losses occurring from census experience different than assumed and assumption changes are amortized over a 30-year period as a level percent of payroll. A new gain or loss base is established each year based on the additional gain or loss during that year and that base is amortized over a new 30-year period. The purpose of the method is to give a smooth progression of the costs from year to year and, at the same time, provide for an orderly funding of the unfunded liabilities. Increases in the Actuarial Accrued Liability caused by changes in the benefit provisions are amortized over 20 years.

The method for amortizing the unfunded Actuarial Accrued Liability was changed from a rolling 30-year method to the closed 30-year method described above effective June 30, 2011.

For accounting, gains and losses occurring from census experience different than assumed and assumption changes are amortized into expense over the average expected future service of all plan participants (active and inactive). Gains and losses occurring from investment experience different than assumed are amortized into expense over a five-year period. The effect of plan changes on the plan liability are fully recognized in expense in the year in which they occur.

NOTE: Dates reflect the effective date as adopted by the Board of Trustees.

ACCO Matt for our Members

PSRS/PEERS has historically been, and continues to be, a forward-thinking organization. Even after 77 years in the public pension arena, we continue to adapt to succeed, be proactive and excel. Our members can rest assured that their Retirement Systems remain financially strong and their benefits remain stable and well-funded. We will continue to adapt and serve with excellence now, and in the future.

Statistical Summary

Benefit Recipients

The largest percentage of the Systems' benefit recipients are service retirees. Service retirement benefits are payable to members who have met age and service requirements. The number of PSRS service retirees on the payment rolls increased by 1,658 from 61,604 at June 30, 2022 to 63,262 at June 30, 2023. The number of PEERS service retirees on the payment rolls increased by 1,390 from 32,891 at June 30, 2022 to 34,281 at June 30, 2023.

Disability benefits in PSRS and PEERS are paid to members who are unable to earn a livelihood due to permanent disability and who have met certain eligibility requirements. The number of PSRS disability retirees on the payment rolls decreased by 6 from 1,032 at June 30, 2022 to 1,026 at June 30, 2023. The number of PEERS disability retirees on the payment rolls decreased by 9 from 776 at June 30, 2022 to 767 at June 30, 2023.

In both PSRS and PEERS, beneficiary payments are available to survivors if the retiree elected this option. Three Joint-and-Survivor benefit plans and two Term-Certain benefit plans are available. In PSRS, survivor benefits are also available to designated beneficiaries of members who die before retirement.

The charts on page 136 detail the number of benefit recipients by type and monthly benefit amount for each System.

Pension Funding

An unfunded actuarial accrued liability (UAAL) for pension benefits generally represents the difference between the present value of all benefits estimated to be payable to plan members as a result of their age, salary, and service through the valuation date and the actuarial value of plan assets available to pay those benefits. This amount changes over time as a result of changes in accrued benefits, pay levels, rates of return on investments, changes in actuarial assumptions, and changes in the demographics of the employee base. Each year an external actuary performs a valuation to determine the present value of the benefits payable (actuarial accrued liability) and compares this to the assets available to arrive at the funded status of the Systems.

The charts on page 144 show a comparison of the assets and liabilities of the Systems over time. At June 30, 2023, PSRS was 85.9% pre-funded and PEERS was 87.3% pre-funded. At June 30, 2022, PSRS was 85.2% pre-funded and PEERS was 87.3% pre-funded. Detailed information on actuarial assumptions can be found in the *Actuarial Section* of this report.

Changes in Net Position

The charts on page 137 detail a 10-year history of the additions (revenue) and deductions (expenses) of the Systems.

Other charts in this section detail demographic information concerning our members and employers.

The data in this section was derived from internal sources and the annual actuarial valuation reports.
